

St William's Catholic Academy:

Calculation Guidance For Multiplication and Division

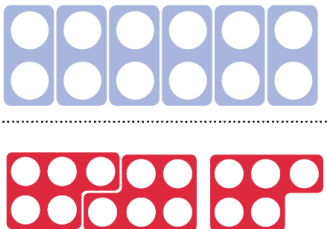

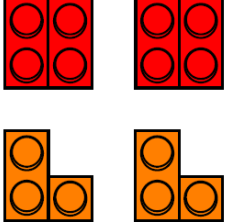

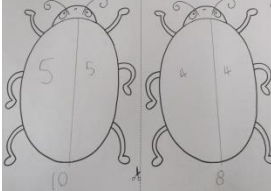

(Last Reviewed Spring Term 2023)

	EFYS	YEAR 1	YEAR 2	YEAR 3	YEAR 4	YEAR 5	YEAR 6
	<p><u>Multiplication</u> Recognise and make equal groups Doubling in a practical way.</p>	<p>Counting in multiples using concrete materials. Solve one step word problems using arrays and other concrete materials.</p>	<p>Show that multiplication can be done in any order (commutative) Solve problems using arrays and other concrete materials.</p>	<p>Write and calculate mathematical statements for multiplication using the times tables they know. Multiply 2 digit by 1 digit numbers using base 10 progressing to formal written methods.</p>	<p>Multiply two digits and three digit numbers by a one-digit number using a written formal method. Solve multiplication two-step problems in context choosing appropriate operations</p>	<p>Identify multiples and factors, including all factor pairs of a number. Multiply numbers up to 4 digits by a one or two-digit number using a formal written method including long multiplication for two digit numbers. Multiply numbers <i>(including decimals)</i> by 100, 100 and 1000.</p>	<p>Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication. Identify common multiples.</p>
<p>Key language: double, times, multiplied by, the product of, groups of, lots of, equal groups.</p>							
	<p><u>Division</u> Halving and sharing in a practical way. Division as grouping</p>	<p>Solve one step word problems using arrays and other concrete materials.</p>	<p>Show that with division the biggest number has to go first. Solve problems using arrays and other concrete materials.</p>	<p>Write and calculate mathematical statements for division using the times tables they know. Divide 2 digit by 1 digit numbers using base 10 or other concrete materials. Division with a remainder using concrete objects and number facts.</p>	<p>Divide numbers up to 3 digits by a one-digit number using the formal written method. Division with a remainder.</p>	<p>Divide numbers up to 4 digits by a one-digit number using the formal written method. Interpret remainders appropriately for the context. Divide numbers <i>(including decimals)</i> by 100, 100 and 1000.</p>	<p>Use short division to divide a 4-digit number by a 2-digit number. Use long division to divide a 4-digit number by a 2-digit number. Solve multi step problems involving division.</p>
<p>Key language: share, group, divide, divided by, half</p>							

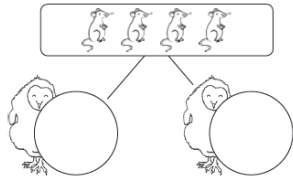

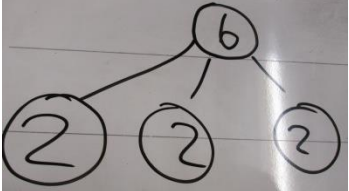

Progression In Multiplication Tables At St.William's (Whole School View)

Skill	Year Grp	Representations and Models Used
Recall and use multiplication and division facts for the 2x Table	2	Bar Model, Counters, Money/coins, Ten Frames, Bead Strings, Number Lines, Number Shapes and Everyday Objects.
Recall and use multiplication and division facts for the 5x Table	2	Bar Model, Counters, Money/coins, Ten Frames, Bead Strings, Number Lines, Number Shapes and Everyday Objects.
Recall and use multiplication and division facts for the 10x Table	2	Base 10, Counters, Money/coins, Ten Frames, Bead Strings, Number Lines, Number Shapes and 100 square.
Recall and use multiplication and division facts for the 3x Table	3	Counters, Everyday Objects, Bead Strings, Number Lines, Number Shapes and 100 square.
Recall and use multiplication and division facts for the 4x Table	3	Counters, Everyday Objects, Bead Strings, Number Lines, Number Shapes and 100 square.
Recall and use multiplication and division facts for the 8x Table	3	Everyday Objects, Bead Strings, Number Tracks, Number Shapes and 100 square.
Recall and use multiplication and division facts for the 6x Table	4	Everyday Objects, Bead Strings, Number Tracks, Number Shapes and 100 square.
Recall and use multiplication and division facts for the 7x Table	4	100 square, Number Shapes, Bead Strings and Number lines.
Recall and use multiplication and division facts for the 9x Table	4	100 square, Number Shapes, Bead Strings and Number lines.
Recall and use multiplication and division facts for the 11x Table	4	Base 10, 100 square, Place Value Counters and Number lines.
Recall and use multiplication and division facts for the 2x Table	4	Base 10, 100 square, Place Value Counters and Number lines.
To multiply and divide by 10, 100 and 1000	5	Place Value Counters and Base 10
To fluently use and apply multiplication and division facts up to 12 x 12	5/6	

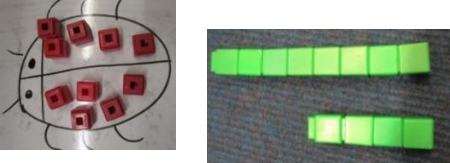

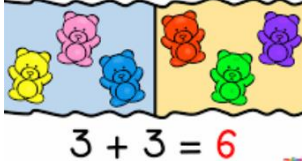

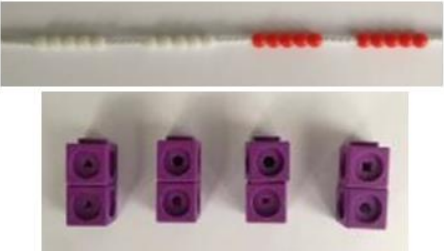

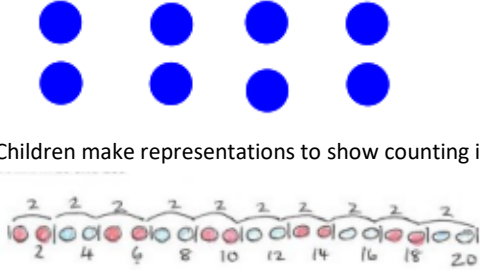

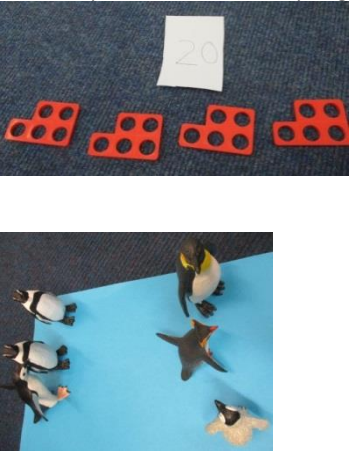

EYFS Multiplication

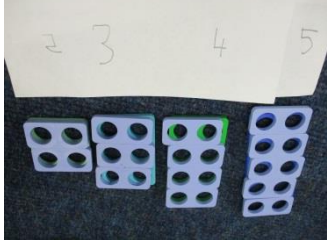

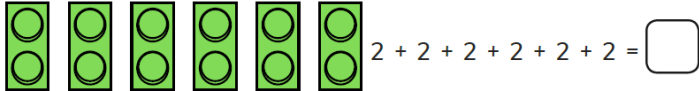

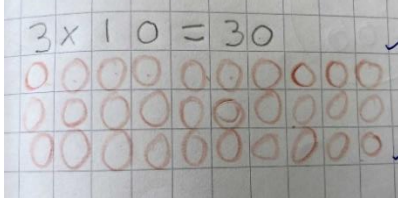

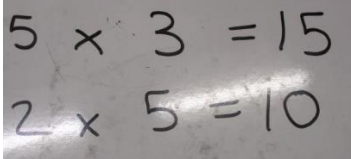

Objective & Strategy	Concrete	Pictorial	Abstract
Repeated addition	 <p>Use numberframes (le.g. Numicon) to count in 2's.</p> <p>How many wellies needed for 3 children?</p>	 <p>Use pictures to count in 2's and 5's.</p>	$2 + 2 + 2 = \square$ $3 + 3 + 3 = \square$
Doubling	 <p>Use manipulatives to practically double.</p>	 <p>Use pictures double 4's and 2's.</p>	 <p>Writing doubles using a template.</p>

EYFS Division.

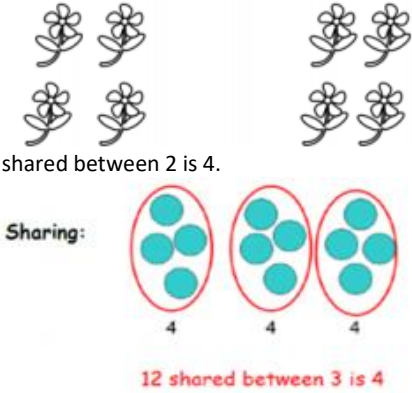

Objective & Strategy	Concrete	Pictorial	Abstract
Sharing	 <p>Sharing the fruit equally into bowls.</p>	 <p>Use pictures to count in 2's and 5's.</p>	 <p>Sharing 6 into 3.</p>

Y1 Multiplication

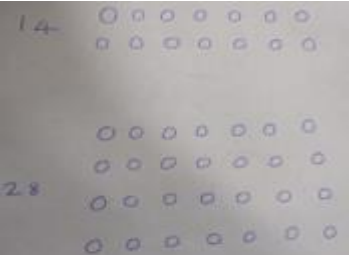

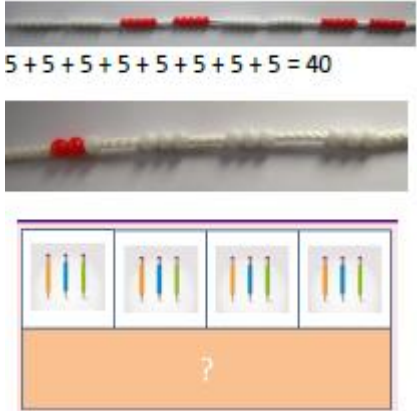

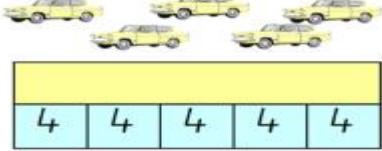

Objective & Strategy	Concrete	Pictorial	Abstract
Doubling	<p>Use practical activities using manipulatives including cubes and Numicon to demonstrate doubling.</p> 	<p>Draw pictures to show how to double numbers.</p> <p>What is double 3?</p> 	<p>Double 4 is 8. Double 5 = 10</p>
Counting in multiples	<p>Count the groups as children skip counting, children may use their fingers as they are skip counting.</p> 	 <p>Children make representations to show counting in multiples.</p>	<p>Count in multiples of numbers aloud.</p> <p>Write sequences with multiples of numbers.</p> <p>2,4,6,8,10...</p> <p>5,10,15,20,25,30.....</p>
Making equal groups and counting the total	<p>Use manipulatives to create equal groups.</p> 	<p>Draw and make representations.</p> 	<p>$3 \times 2 = 6$</p> <p>$2 \times 3 = 6$</p>

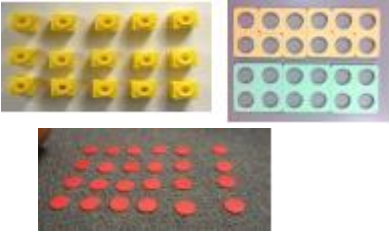

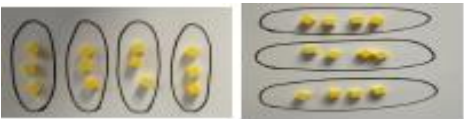

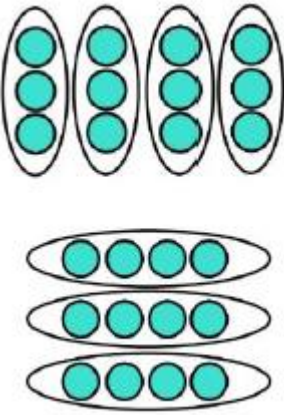

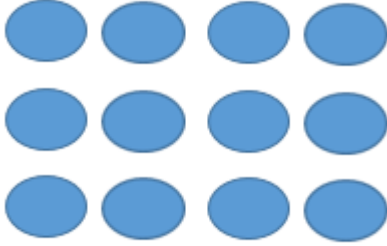

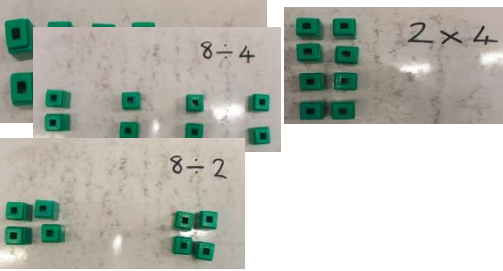

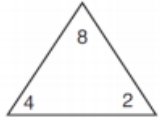

Repeated addition	Using different objects to add equal groups. 	Use pictorial including numberlines to solve problems. 	2+2+2+2=8
Understanding arrays	Use objects laid out in arrays to find the answers to 2 lots of 5 3 lots of 2 etc. 	Draw representations of arrays to show understanding. 	$3 \times 2 = 6$ $2 \times 5 = 10$ 

Y1 Division

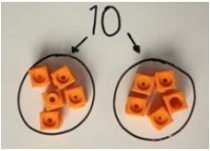

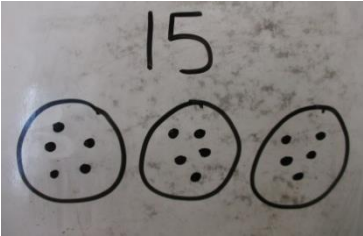

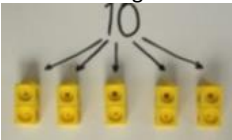

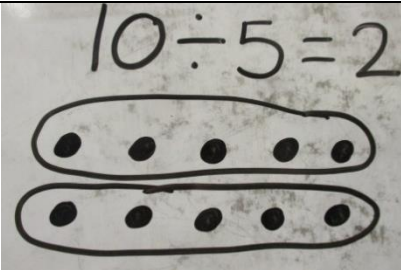

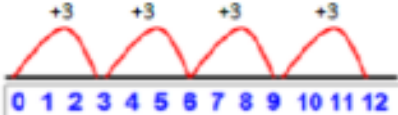

Objective & Strategy	Concrete	Pictorial	Abstract
Division as sharing	I have 10 cubes; can you share them equally in 2 groups? 	Children use pictures or shapes to share quantities 	12 shared between 3 is 4

Y2 Multiplication

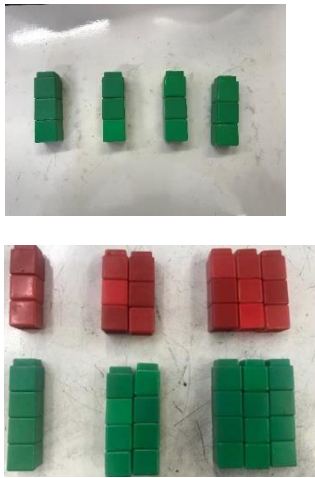

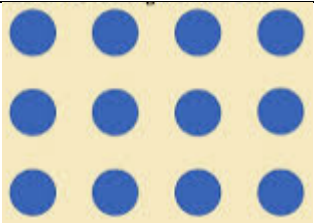

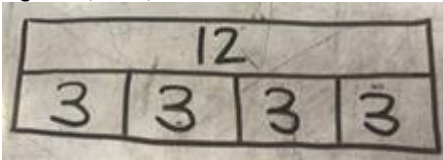

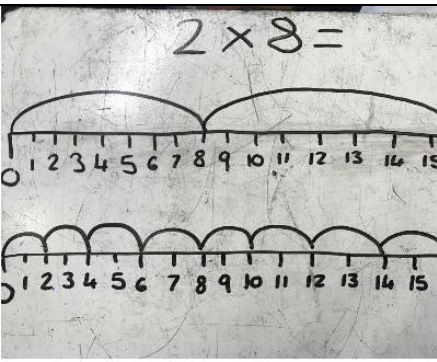

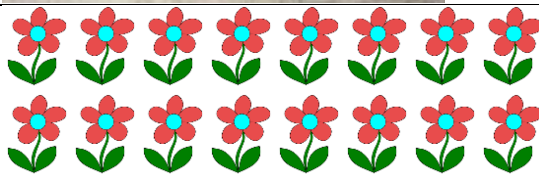

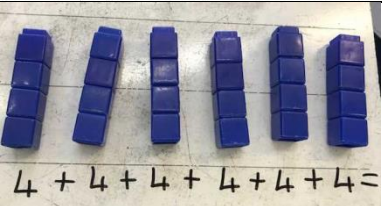

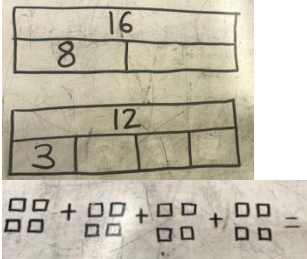

Objective & Strategy	Concrete	Pictorial	Abstract
<p>Doubling</p>	<p>Model doubling using dienes and PV counters.</p> 	<p>Draw pictures and representations to show how to double numbers.</p> 	<p>Partition a number and then double each part before recombining it back together.</p>
<p>Counting in multiples of 2, 3, 4, 5, 10 from 0 (repeated addition)</p>	<p>Count the groups as children are skip counting, children may use their fingers as they are skip counting. Use bar models.</p>  <p>$5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 = 40$</p>	<p>Number lines, counting sticks and bar models should be used to show representation of counting in multiples.</p> <p>Use the bar model to calculate how many wheels there are altogether:</p>  <p>___ × ___ = ___</p>	<p>Count in multiples of a number aloud. Write sequences with multiples of numbers.</p>

<p>Multiplication is commutative</p>	<p>Create arrays using counters and cubes and Numicon.</p>  <p>Pupils should understand that an array can represent different equations and that, as multiplication is commutative, the order of the multiplication does not affect the answer.</p> 	<p>Use representations of arrays to show different calculations and explore commutativity.</p> 	<p>$12 = 3 \times 4$ $12 = 4 \times 3$</p>  <p> $4 + 4 + 4 = 12$ $3 + 3 + 3 + 3 = 12$ $4 \times 3 = 12$ $3 \times 4 = 12$ </p>
<p>Using the Inverse</p> <p>(This should be taught alongside division, so pupils learn how they work alongside each other).</p>	<p>Use concrete apparatus to show number families.</p> 	 <p> <input type="text"/> × <input type="text"/> = <input type="text"/> <input type="text"/> × <input type="text"/> = <input type="text"/> <input type="text"/> ÷ <input type="text"/> = <input type="text"/> <input type="text"/> ÷ <input type="text"/> = <input type="text"/> </p>	<p> $2 \times 4 = 8$ $4 \times 2 = 8$ $8 \div 2 = 4$ $8 \div 4 = 2$ $8 = 2 \times 4$ $8 = 4 \times 2$ $2 = 8 \div 4$ $4 = 8 \div 2$ </p> <p>Show all 8 related fact family sentences.</p>

Year 2 Division

<p>Division as sharing</p>	 <p>I have 10 cubes. can you share them equally in 2 groups?</p>	<p>Children use pictures or shapes to share quantities</p>  <p>15 shared between 3 is 5.</p>	<p>12 shared between 3 is 4</p>
<p>Division as grouping</p>	<p>Divide quantities into equal groups. Use cubes, counters, objects or place value counters to aid understanding.</p> 	 <p>Use number lines for grouping</p>  <p>Think of the bar as a whole. Split it into the number of groups you are dividing by and work out how many would be within each group.</p>	<p>$28 \div 7 = 4$ Divide 28 into 7 groups. How many are in each group?</p>

Year 3 Multiplication and Division

Objective & Strategy	Concrete	Pictorial	Abstract
<p>Recall and use multiplication and division facts for the 3,4 and 8 multiplication tables.</p>		 <p>How many altogether? What would the calculation be? How many different calculations can you think of? e.g. $3 \times 4 =$, $4 \times 3 =$, $12 \div 3 = 4$ etc</p> 	<p>$3 \times 4 =$ $4 \times 3 =$ $12 = 3 \times 4$ $12 = 4 \times 3$ $12 \div 3 = 4$ $12 \div 4 = 3$</p> <p>Mary has 3 friends. She has 12 sweets in total. If she shares them equally how many sweets will each child have?</p>
<p>Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (x), division (\div) and equals (=) signs.</p>		 <p>What could the calculation be?</p>	<p>2 multiplied by 8 is equal to? How many eyes do 8 people have altogether?</p> <p>$2 \times _ = 16$ $16 \div _ = 2$</p>
<p>Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods and multiplication and division facts, including problems in context.</p>		<p>What would the addition calculation look like? Can you write this as a multiplication problem? How many different ways can you represent this?</p> 	<p>$4+4+4+4 =$ $4 \times 4 =$ $4 \text{ squared} =$</p> <p>A bar of chocolate is in the shape of a square? If there are 4 columns how many pieces of chocolate are there altogether? What would the next square bar look like? E.g. $5 \times 5 =$</p>

Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot.

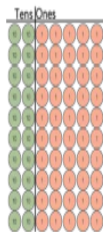

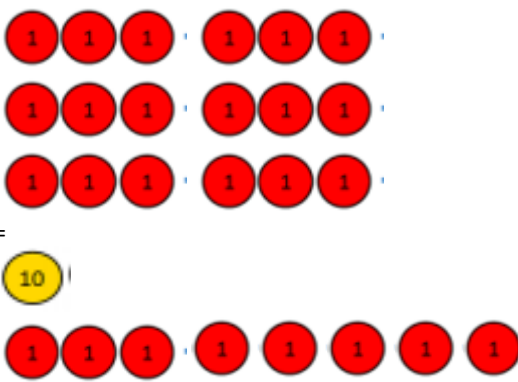

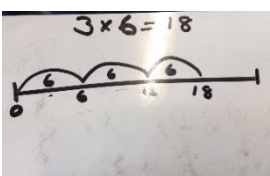

$$\begin{aligned} _ \times _ &= \\ _ \times _ &= \\ _ &= _ \times _ \\ _ &= _ \times _ \\ _ \div _ &= \\ _ \div _ &= \end{aligned}$$

True or false?

Anything multiplied by 6 will equal an even number?

Year 4 Multiplication and Division.

Objective and Strategy.	Concrete	Pictorial	Abstract																																																		
<p>Multiplying by 10, 100 and 1000</p> <p>Dividing by 10, 100 and 1000</p>	<p>Place value counters</p>  <p>Write the calculation shown by the place value counters.</p>  <p>Each row has ___ tens and ___ ones so each row has a value of ___ There are ___ rows. The calculation is ___ x ___ = ___</p>	<p>Place Value Sliders / Place value grid; digits move one column to the left; $37 \times 10 = 370$ (use Place Value Headings to support)</p> <table border="1" data-bbox="913 335 1261 399"> <tr><td></td><td>3</td><td>7</td><td></td></tr> <tr><td>3</td><td>7</td><td>0</td><td></td></tr> </table> <p>$37 \times 100 = 3700$</p> <table border="1" data-bbox="913 454 1261 518"> <tr><td></td><td></td><td>3</td><td>7</td></tr> <tr><td>3</td><td>7</td><td>0</td><td>0</td></tr> </table> <p>Division: Use P/V Grid; digits move one column to the right $370 \div 10 = 37$</p> <table border="1" data-bbox="913 574 1261 638"> <tr><td>3</td><td>7</td><td>0</td></tr> <tr><td></td><td>3</td><td>7</td></tr> </table> <p>Place value grid; digits move two columns to the left;</p> <table border="1" data-bbox="913 694 1261 758"> <tr><td>3</td><td>7</td><td>0</td><td>0</td></tr> <tr><td></td><td></td><td>3</td><td>7</td></tr> </table> <p>$3700 \div 100 = 37$</p> <p>What calculation is shown by the bar model?</p> <table border="1" data-bbox="913 845 1388 909"> <tr><td colspan="10">30</td></tr> <tr><td>3</td><td>3</td><td>3</td><td>3</td><td>3</td><td>3</td><td>3</td><td>3</td><td>3</td><td>3</td></tr> </table>		3	7		3	7	0				3	7	3	7	0	0	3	7	0		3	7	3	7	0	0			3	7	30										3	3	3	3	3	3	3	3	3	3	<p>Begin to link facts:</p> <p>$x \times 100 = 3700$</p> <p>$37 \times 10 = 370$</p> <p>$3.7 \times 10 = x$</p>

Multiply a two-digit number by a one-digit number

Using Diennes or Base 10 apparatus: 21×3

Tens	Ones	Product

Use place value counters

$34 \times 5 = 170$

Bar model 21×3

21		21		21	
20	20	20	1	1	1
$60 + 3 = 63$					

Written method, Compact method

Expanded method

	H	T	O	
		3	4	
x			5	
		2	0	(5 x 4)
+	1	5	0	(5 x 30)
	1	7	0	

Multiply a three-digit number by a one-digit number

When moving to 3-digit by 1 digit or beyond, encourage children to move to short multiplication method. Base 10 and PV can continue to be used to support understanding of written method. Limit the number of exchanges needed in questions to allow children to move away from concrete resources with larger numbers.

Using place value counters;
 203×3

H	T	O

$600 + 9 = 609$

Bar Model: 342×3

342		342		342		342	
300	300	40	40	40	2	2	2
$900 + 120 + 6 = 1026$							

Part whole method

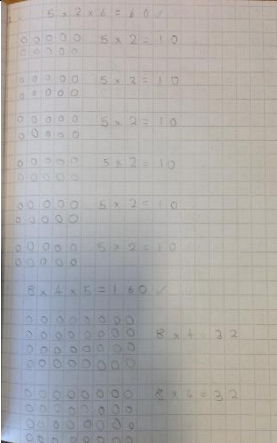

342×3
 $(300 + 40 + 2) \times 3$
 $900 + 120 + 6 = 1026$

	H	T	O
	2	4	5
x			4
	9	8	0
	1	2	

Multiply three single digit numbers

Arrays

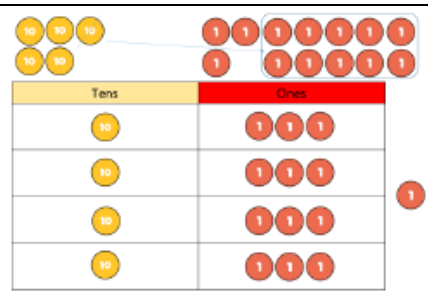

Bar Model

2 x 3 x 4			
2 x 3	2 x 3	2 x 3	2 x 3
6	6	6	6
24			

2 x 3 x 4
 (2 x 3) x 4
 6 x 4 = 24
 Or
 2 x (3 x 4)
 2 x 12 = 24

Dividing with a remainder

ten divided by three

10			
3	3	3	1

53

13	13	13	13	1
----	----	----	----	---

53 ÷ 4 = 13 r1

Dividing 2 digits by 1 digit
 Dividing 3 digits by 1 digit

Place Value Counters

91						
13	13	13	13	13	13	13

Formal short division with two digits

$$844 \div 4 = 122$$

H	T	O
100 100	10	1
100 100	10	1
100 100	10	1
100 100	10	1

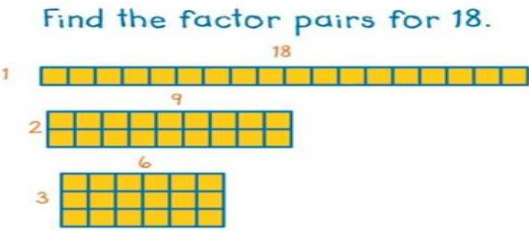

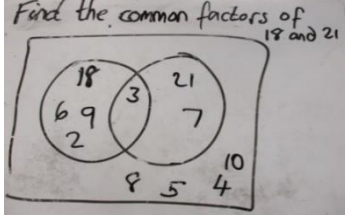

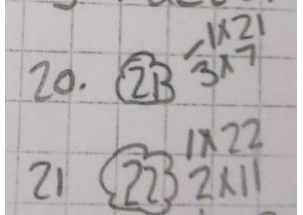

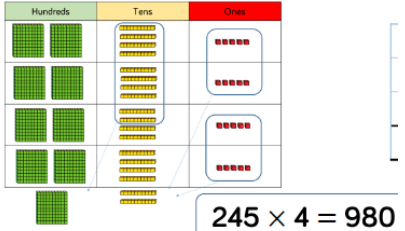

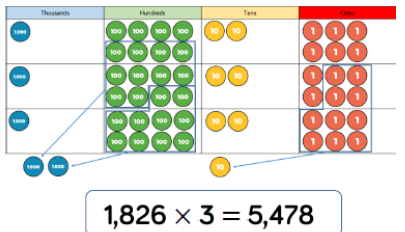

Formal short division with three digits

As above with 3 digits

$$844 \div 4 = 122$$

Y5 Multiplication and Division

Objective & Strategy	Concrete	Pictorial	Abstract																												
<p>Identify multiples and factors, including all factor pairs of a number.</p>	<p>Find the factor pairs for 18.</p> 	<p>Find the common factors of 18 and 21</p>  <p>Venn Diagrams / Carroll Diagrams</p> <p>Use to identify common factors of two or more numbers.</p>	<p>e.g.</p>  <p>Identification of common factors / factor pairs of a number</p>																												
<p>Multiply numbers up to 4 digits by a one or two digit number using a formal written method, including long multiplication for two digit numbers</p>	 <p>$245 \times 4 = 980$</p>  <p>$1,826 \times 3 = 5,478$</p>	<p>When moving to 3-digit by 1 digit or beyond, encourage children to move to short multiplication method. Base 10 and PV can continue to be used to support understanding of written method. Limit the number of exchanges needed in questions to allow children to move away from concrete resources with larger numbers).</p> <p>Using Grids for partitioning and multiplication facts if required</p> <table border="1" data-bbox="1041 750 1534 877"> <tr> <td>x</td> <td>300</td> <td>20</td> <td>7</td> </tr> <tr> <td>4</td> <td>1200</td> <td>80</td> <td>28</td> </tr> </table> <p>Continue to use bar modelling to support problem solving</p>	x	300	20	7	4	1200	80	28	<p>To use formal written method</p> <table border="1" data-bbox="1691 486 1915 750"> <tr> <td></td> <td>H</td> <td>T</td> <td>O</td> </tr> <tr> <td></td> <td>2</td> <td>4</td> <td>5</td> </tr> <tr> <td>x</td> <td></td> <td></td> <td>4</td> </tr> <tr> <td></td> <td>9</td> <td>8</td> <td>0</td> </tr> <tr> <td></td> <td>1</td> <td>2</td> <td></td> </tr> </table> <p>HTO x O</p> <p>TO x TO</p>		H	T	O		2	4	5	x			4		9	8	0		1	2

4	1200	80	28																												
	H	T	O																												
	2	4	5																												
x			4																												
	9	8	0																												
	1	2																													

Multiply a 2-digit by a 2-digit

Use the area model to help children understand the size of the number:
eg. $22 \times 31 = 682$

Place Value counters may also be used

×	20	2
30	600	60
1	20	2

Using Grids for partitioning and multiplication facts if required

	H	T	O
		2	2
×		3	1
		2	2
	6	6	0
	6	8	2

HTO x TO

Multiply numbers (including decimals) by 10, 100 and 1000.

See Y4 Guidance

To use grids with column headings (e.g. Th, H, T U . t h) and model moving columns to the LEFT as appropriate.

Divide numbers up to 4 digits by a one digit number using the formal written method

For concrete, use of Place Value or similar manipulatives as appropriate

$96 \div 3$

	Tens	Units
	3	2

Students can continue to use drawn diagrams with dots or circles to help them divide numbers into equal groups.

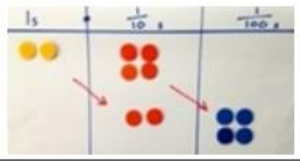

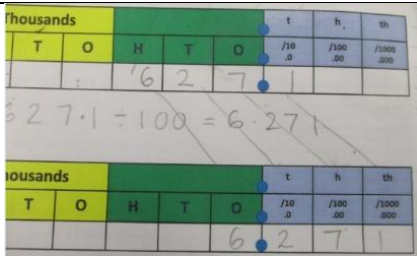

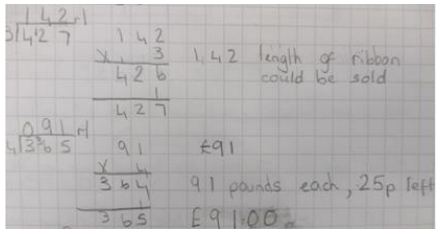

Encourage them to move towards counting in multiples to divide more efficiently.

Divide numbers up to 4 digits by a one digit number using 'bus stop' method

Interpret remainders appropriately for the context.

Use of place value counters as above using the formal method for short division and showing extra counters as remainders.

As above, if required, highlighting incomplete leaps as remainders.

<p>Divide numbers (including decimals) by 10, 100 and 1000</p>	<p>To continue to use Base 10, Dienes and Numicon where appropriate</p> <p>If I know 4×6 then 0.4×6 is ten times smaller.</p> 	<p>To use grids with column headings (e.g. Th, H, T o . t h)</p> <p>Model moving columns to the RIGHT as appropriate.</p>		 <p>What could I do with the remaining 3? How could I share this between 6 as well?</p> <p>To use remainders in context – rounding up and down as appropriate e.g. The farmer has 39 eggs. How many boxes carrying 6 eggs will he need to sell them?</p>
--	--	---	--	---

Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers.
 Recall prime numbers up to 100
 To continue to draw division and multiplication facts rapidly (continuation from Year 4)
 To solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates (e.g. converting measures).

Year 6 Multiplication/Division (Continue to consolidate Y5 and develop strategies further)

Objective & Strategy	Concrete	Pictorial	Abstract																																				
<p>Multiply multi-digit number up to 4 digits by a 2-digit number using the formal method of long multiplication.</p> <p>*Use of inverse operations as a tool for checking answers.</p>	<p>As in previous years, children will use concrete and pictorial methods in order to close the gap but should be encouraged towards the formal method – making links to the grid method in previous years.</p> <p>Refer back to AREA model (Y5) to help develop understanding of number.</p>	<table border="1" data-bbox="896 885 1339 1056"> <tr> <td>×</td> <td>200</td> <td>30</td> <td>4</td> </tr> <tr> <td>30</td> <td>6,000</td> <td>900</td> <td>120</td> </tr> <tr> <td>2</td> <td>400</td> <td>60</td> <td>8</td> </tr> </table>	×	200	30	4	30	6,000	900	120	2	400	60	8	<table border="1" data-bbox="1400 885 1590 1161"> <tr> <td>Th</td> <td>H</td> <td>T</td> <td>O</td> </tr> <tr> <td></td> <td>2</td> <td>3</td> <td>4</td> </tr> <tr> <td>×</td> <td></td> <td>3</td> <td>2</td> </tr> <tr> <td></td> <td>4</td> <td>6</td> <td>8</td> </tr> <tr> <td>17</td> <td>10</td> <td>2</td> <td>0</td> </tr> <tr> <td>7</td> <td>4</td> <td>8</td> <td>8</td> </tr> </table> <p>Use method in the context of problem solving, including word problems.</p>	Th	H	T	O		2	3	4	×		3	2		4	6	8	17	10	2	0	7	4	8	8

Divide multi digits by a 2 digit number using the formal written method.

Divide numbers up to 4 digits by a 2-digit whole number using the formal written method of long division and interpret remainders as whole number remainders, fractions or by rounding as appropriate for the context.

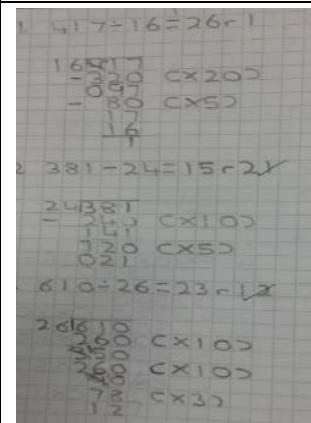

Children can write out multiples to support their calculations – especially with larger remainders.

- $12 \times 1 = 12$
- $12 \times 2 = 24$
- $12 \times 3 = 36$
- $12 \times 4 = 48$
- $12 \times 5 = 60$
- $12 \times 6 = 72$
- $12 \times 7 = 84$
- $12 \times 8 = 96$
- $12 \times 9 = 108$
- $12 \times 10 = 120$

		0	3	6	
1	2	4	3	2	(x30)
	-	3	6	0	
			7	2	(x6)
	-		7	2	
				0	

$$372 \div 15 = 24 \frac{4}{5}$$

$$372 \div 15 = 24 \text{ r}12$$

Children should be able to record their remainder and be taught to display it as a fraction (depending on the context of the question).

Children can also answer questions where the quotient needs to be rounded up or down – depending on

			2	4	$\frac{4}{5}$
1	5	3	7	2	
	-	3	0	0	
			7	2	
	-		6	0	
			1	2	

the context.
