

SEND Provision - Outreach Offer – St Anne's RC Primary School

We offer a comprehensive outreach service to support SEND professionals and school leaders in the planning, development and delivery of high-quality Resourced Provision (RP) or SEND-based provisions across a mainstream primary setting. Drawing on our specialist expertise and practical experience, we work collaboratively with schools to build sustainable, inclusive provision that meets the needs of pupils with complex and additional needs.

Our outreach offer includes tailored advice and hands-on support across all stages of provision development, including initial planning and readiness, setting up learning environments, staffing models and establishing effective systems and routines. We support from day one of your planning process, through considering numbers of children, staffing, transport for pupils to how a timetable should look on a day to day. Bespoke to your school.

We also provide guidance on leadership and management of SEND provision, including supporting SENCOs and leaders with policy development, provision mapping, quality assurance and working effectively with families and external agencies. Professional development and coaching for staff form a key part of our offer, ensuring teams feel confident, skilled and well-supported in delivering inclusive practice.

Our outreach is flexible and responsive, designed to meet the individual needs of each school. Support can be delivered through on-site visits, coaching sessions, training, modelling of practice and ongoing consultation. Our aim is to empower schools to develop confident, well-led SEND provision that enables pupils to thrive within their local mainstream community.

As a starting point we invite professionals to complete our referral form.

We also recommend you come and have a look at our provision and school setting.

We can then work with schools and professionals to tailor an outreach plan.
