4th March 2020

Dear Parent/Guardian,

## **CORONAVIRUS**

The school is following Public Health England's guidelines to prevent the spreading of Coronavirus.

Their advice is that frequent hand washing is the best way to prevent the spread of this virus.

We have put the following guidance into place:-

- All children have watched the NHS video on the best way to wash hands. Parents can watch this video with their children by visiting: (or google NHS Handwashing video).
- All toilets have new handwash so that children can wash their hands frequently during the day.
- The teachers have been issued with hand sanitiser to increase protection for our children.

I will update parents if there is any change to Public Health England's guidance.

Thank you for your co-operation in this matter.

Mr J. O'Brien  
Headteacher
