

Dear parents/guardians,

Well it has been a very busy week considering it has only been four days! We have been dodging the rain and hailstones but I have still managed to see some wonderful learning happening in our school. Today, I have had the pleasure of seeing the children, parents and staff all come together to celebrate Maths. I have to say a big thank you to all parents for the efforts that you have gone to with the number costumes, we have taken some photographs which we will put on our website next week.

Business Links or Parents Skill sets

I am very keen on developing the school grounds so that the children will have more creative spaces in which to learn and play. With this in mind I was wondering if any parents have links with businesses, who would possibly be keen to sponsor school or be involved in fundraising? Also I know that we have very talented and creative parents in this school. If you feel that you have skills that you would like to share with school, please get in touch. These skills could be carpentry, gardening, knitting, Art, cooking... the list is endless and I am sure you will not disappoint me!

School Dinners

We are finding that some parents are not pre-ordering their children's school dinners, please could you try to ensure that you pre-order the meals, as the kitchen cannot guarantee that your child will get their first choice if they are choosing on the day.

Nursery Places Reminder

We still have part-time and fulltime Nursery funded places available. Please contact the office for further details.

Year 6 Leavers' Hoodies

The online shop for Y6 hoodies is now open, the closing date is **14th May**, as we need to leave several weeks for the hoodies to be manufactured and delivered. Please try to get your orders in as early as possible, as usual if you have any problems please contact us for help.

I received some lovely emails over the weekend, illustrating how wonderful our children are.

Alessia in Year 3 sent me a PowerPoint about her concern over the polystyrene lunch boxes we were using. Great minds think alike. As we had just received our new WASHABLE plastic lunch boxes, which we have started to use this week, thus reducing waste and doing a small part to look after our planet. As Alessia said, "Remember, there is NO Planet B!"

Another email I received showed how one family were looking after their mum who has been poorly. What caring children we have in our school. Well done, Katie, Emily and Rosie!

Here are some fantastic photos of Olivia in Year 1.

She is a very active girl and these photos look so exciting.

Finally, this photo really made me smile - I hope it does the same to you! This is Daniel from Year 2 with his cousin's chicken on his head!

Thank you for your continued support,

Mrs Noctor
