

**SUBJECT: GEOGRAPHY**

Year Group	YEAR 9					
Rationale	Pupils will build on skills and knowledge covered in Years 7 and 8, applying these in different contexts linked to 'big themes'. This will provide a 'bridge' for the students between KS3 content and KS4 application of knowledge and skills. The introduction of Interactive, case-study themed learning will enthuse pupils further and make the transition to KS4 a seamless process. The content and skills will help pupils to appreciate that the study of Geography helps them to make sense of wider concepts and that, even if GCSE Geography is not an option choice for them, an appreciation of place and space is an essential aspect of 'holistic' development and global citizenship.

Topic/Unit	Are there too many people?	Are there too many people?	Tectonic Hazards – Are we safe?	Tectonic Hazards – Are we safe?	Coastal Landscapes GCSE content	Glacial Landscapes GCSE content
Knowledge	<ul style="list-style-type: none"> <li>How and why has population changed over time?</li> <li>Natural Increase/DTM</li> <li>Population structures.</li> <li>Population Policies – China</li> <li>Migration (includeing Rural-Urban)</li> <li>Introduction to Kenya / east Africa – region of Africa</li> </ul>	<ul style="list-style-type: none"> <li>Kibera – A Kenyan Slum – 3-week research and Magazine article.</li> <li>Region of Africa study</li> <li>Immigration – is it good for the UK?</li> <li><b>Citizenship</b></li> <li>Kibera review</li> </ul>	<ul style="list-style-type: none"> <li>Plate tectonics – Causes</li> <li>Volcanoes – Montserrat DME</li> <li>Mount St Helens Story-board</li> <li>Earthquakes</li> <li>Recent earthquakes – case studies and comparisons (GCSE Links)</li> <li>Primary/Secondary Effects, Responses, Management.</li> </ul>	<ul style="list-style-type: none"> <li>Tsunami - Mystery – Indian Ocean 2004</li> <li>Japan Tsunami 2011 – News reports</li> <li>Comparison – LIC v HIC</li> <li>Review</li> </ul>	<ul style="list-style-type: none"> <li>Processes</li> <li>Erosional Landforms</li> <li>Transportation – Longshore Drift and Dunes</li> <li>Depositional Landforms</li> <li>Coastal case-study</li> <li>Coastal Management and Impacts</li> </ul>	<ul style="list-style-type: none"> <li>Processes</li> <li>Landforms</li> <li>Management and Impacts</li> </ul>
Skills	<p>Pupils can describe the characteristics of global population, structure, policies, movement and location.</p> <p>Pupils can explain why population and cities grow at different rates, using examples and giving evidence.</p> <p>Pupils can make judgements about population policies and their effectiveness/impacts.</p> <p>Use of data, DTM, Population pyramids, mapping and research evidence. Persuasive writing.</p>	<p>Pupils can describe conditions in Nairobi/Kibera – location, causes of urbanisation, problems, solutions and sustainable planning.</p> <p>Pupils explain how problems can be reduced by a variety of management strategies in Kibera.</p> <p>Pupils make Judgements about the effectiveness of solutions, comparing with other examples to provide some evidence to support Conclusions.</p>	<p>Pupils can describe where and how tectonic plates cause earthquakes, volcanoes and tsunamis, using specific located examples.</p> <p>Pupils can explain why effects, responses and management vary between different countries.</p> <p>Pupils can judge the most appropriate, and effective management strategies for different countries.</p> <p>Pupils use research, GIS, text / images, maps to present and evaluate. Collaboration</p>	<p>Pupils can describe where and how tectonic plates cause tsunamis, focusing on effects, responses and management.</p> <p>Pupils can explain why effects, responses and management vary between two different events.</p> <p>Pupils can judge the most appropriate, and effective management strategies for different countries.</p> <p>Pupils use research, GIS, text / images, maps to present and evaluate.</p>	<p>Pupils describe the processes that create a variety of landforms and identify different management strategies used.</p> <p>Pupils can explain how landforms are created and how different management strategies vary in levels of effectiveness.</p> <p>Pupils will judge the suitability of different strategies for different coastal areas, using specific examples.</p> <p>Key words, text analysis, annotated diagrams, decision making, case-studies. OS Maps, data</p>	<p>Pupils describe the processes that create a variety of landforms and identify different impacts/conflicts/management strategies.</p> <p>Pupils can explain how landforms are created, identify them on photo/OS map resources link to how different conflict management strategies vary in levels of effectiveness.</p> <p>Pupils will judge the effectiveness and sustainability of different management strategies</p>
