"Set less work for after the lesson"

See who has their hand up when asking questions.
To not just set us off on work that will last for the whole lesson because it's just 50 minutes of non stop work.
Lots of talking makes it hard to engage as at a screen it's different to lessons
Longer deadlines
Slow down
To not give us loads of work and to remember we have more than just their lesson to do.
Keep doing what they are doing because they are doing an amazing job just gonna bit slower and it will be fine
Nothing

get better with computers

Look in the chat more as some people don't have a mic and it's hard for them to answer questions

Non

To stop talking so much before the work as it means we don't get a lot of work done

Try to make it fun, so we don't dread going into lessons because it's just copying.

It hard when they randomly pick on you, when you don't know and there's people with their hands up but they are trying their best in the situation given and I know they have to make sure everyone is still there

I don't have any advice. They are doing a good job

Don't be so harsh if someone doesn't answer. That person may not be able to answer because there screen has frozen or mic has

Some teachers move on a bit too quickly, so I think it would be a good idea to slow down with the lesson a little bit and ask the class if it is okay for them to move forward.

talk louder and don't make weird noises down the mic
