

Date: _____

I understand how to recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables. Calculate mathematical statements for multiplication within the multiplication tables and write them using the multiplication (\times) and equals (=) signs.
S [] VF []

Fluency

What is $5 \times 3 =$

What is $10 \times 6 =$

What is $12 \times 2 =$

What is $10 \times 5 =$

Problem solving

Chocolate biscuits come in packs (groups) of 5. Sally wants to buy 20 biscuits in total. How many packs will she need to buy? Draw what it would look like.

Fill in the bar model to show the packs of biscuits.

Reasoning:

Write these addition sentences as multiplication sentences. The first one has been completed.

$$5 + 5 + 5 + 5 + 5 = 5 \times 5$$

$$2 + 2 + 2 + 2 + 2 = \underline{\quad} \times \underline{\quad}$$

$$2 + 2 + 2 = \underline{\quad} \times \underline{\quad}$$

$$10 + 10 + 10 + 10 = \underline{\quad} \times \underline{\quad}$$

How do you know you are right?

Fluency:

What is 5×3 ?

What is 10×6 ?

What is 12×2 ?

What is 15×5 ?

Problem solving:

Chocolate biscuits come in packs (groups) of 5. Sally wants to buy 30 biscuits in total.

How many packs will she need to buy? Write this as a multiplication number sentence.

Draw a bar model to show it.

Reasoning:

Write these addition sentences as multiplication sentences. The first one has been completed.

$$5 + 5 + 5 + 5 + 5 = 5 \times 5$$

$$5 + 5 + 5 = \underline{\quad} \times \underline{\quad}$$

$$2 + 2 + 2 + 2 + 2 = \underline{\quad} \times \underline{\quad}$$

$$2 + 2 + 2 = \underline{\quad} \times \underline{\quad}$$

$$10 + 10 + 10 + 10 = \underline{\quad} \times \underline{\quad}$$

$$10 + 10 + 10 = \underline{\quad} \times \underline{\quad}$$

☆ Date: _____

☆ I understand how to recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables. Calculate mathematical statements for multiplication within the multiplication tables and write them using the multiplication (\times) and equals (=) signs.
S [] VF []

Fluency -

Write your own multiplication number sentence to show the answer.

What is 5×9 ?

What is 10×6 ?

What is 12×3 ?

What is 15×5 ?

Problem solving:

Chocolate biscuits come in packs (groups) of 3. Sally wants to buy 27 biscuits in total. How many packs will she need to buy? Write this as a multiplication number sentence and draw a bar model.

Make up your own multiplication story like the one above.

Reasoning:

Write these addition sentences as multiplication sentences. The first one has been completed.

$$5 + 5 + 5 + 5 + 5 = 5 \times 5$$

$$5 + 5 + 5 = \underline{\quad} \times \underline{\quad}$$

$$2 + 2 + 2 + 2 + 2 = \underline{\quad} \times \underline{\quad}$$

$$3 + 3 + 3 + 3 = \underline{\quad} \times \underline{\quad}$$

$$10 + 10 + 10 + 10 = \underline{\quad} \times \underline{\quad}$$

$$10 + 10 + 10 = \underline{\quad} \times \underline{\quad}$$
