

Date: _____

I understand how to recall and use multiplication facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers. Calculate mathematical statements for multiplication within the multiplication tables and write them using the multiplication (\times) and equals (=) signs. S [] VF []

Fluency

$2 \times 4 =$

$5 \times 4 =$

$2 \times 6 =$

$10 \times 2 =$

$5 \times 2 =$

$10 \times 4 =$

Problem solving

Natalia buys 5 apples. How much does she spend?	Jack buys 4 pears. How much does he spend?	Theo buys 3 oranges. How much does he spend?

Reasoning

Tick the statements if they are true, cross them if they are false.

Even numbers don't share fairly between 2.

Even numbers always end in 1, 3, 5, 7, 9.

Even numbers share fairly between 2.

☆ Date: _____

$5 \times 6 =$

$2 \times 6 =$

$10 \times 2 =$

$10 \times 3 =$

$5 \times 2 =$

$10 \times 4 =$

$3 \times 4 =$

Problem solving

Natalia buys 6 apples. How much does she spend?	Jack buys 7 pears. How much does he spend?	Theo buys 5 oranges. How much does he spend?

Reasoning

Tick the statements if they are true, cross them if they are false.

Even numbers don't share fairly between 2.

Even numbers always end in 1, 3, 5, 7, 9.

Even numbers share fairly between 2.

☆ Date: _____

☆ I understand how to recall and use multiplication facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers. Calculate mathematical statements for multiplication within the multiplication tables and write them using the multiplication (×) and equals (=) signs. S [] VF []

☆

Fluency

$2 \times 4 =$

$5 \times 4 =$

$3 \times 7 =$

$2 \times 6 =$

$10 \times 2 =$

$3 \times 6 =$

$5 \times 2 =$

$10 \times 4 =$

$3 \times 4 =$

Problem solving

Natalia buys 9 apples. How much does she spend?	Jack buys 11 pears. How much does he spend?	Theo buys 8 oranges. How much does he spend?

Reasoning

Tick the statements if they are true, cross them if they are false.

Even numbers don't share fairly between 2.

Even numbers always end in 1, 3, 5, 7, 9.

Even numbers share fairly between 2.

I say my even numbers when I count in 2s.
