

I am XXX and I go to XXX school.

Usually my school is very busy and there are lots of children and adults everywhere.

School is different at the moment.

It is very quiet and quite empty.

Not many people are coming to school each day.

Lots of people around the world have been ill because of Coronavirus.

Lots of people have stayed at home with their families. Or they have gone to work to help other people stay well.

Children like me have been at school with very small classes.

The government has said that it is time for more children and teachers to come back to school.

There will be new rules to make sure we stay safe.

Adults will tell me what to do.

It might make me worry when more people come to school.

I can ask for help when I am worried.

I might see some adults and children that I haven't seen for a long time.

They will be pleased to see me!
