Year 1 Cycle A

Religious Education (RE)
In RE, children consider “What should we be grateful for?” through festivals in Christianity (Harvest), Judaism (Sukkot), and Sikhism (Vand Chadna).

Computing
In Computing, we begin by identifying technology around us, then learn about algorithms and debugging, using Beebots and other simple technology to enhance our learning.

Science
In Science, we explore materials, learn to distinguish between natural and human-made, and conduct experiments to test their properties, deciding which work best for specific uses.

Art
In Art, we begin by developing drawing skills, exploring different line types through movement, drawing, and mark-making.

DT
In DT, we tackle the question, "Can we decorate the classroom?" Children will learn to sew a running stitch and create their own bunting flag for a collaborative class project.

History
In History, we explore stages of life, focus on our own childhood and school experiences, then learn about Victorian children and compare their school life to ours.

Music
We will earn that every piece of music has a steady pulse, or “musical heartbeat,” and practice finding and keeping it through listening, singing, clapping, marching, and swaying.

PSHE
Children will discuss the questions 'What is the same and different about us?' And 'How can we look after each other and our world?'.

Physical Education (PE)
In PE, we focus on the fundamentals of physical education and developing teamwork skills through cooperative games.
