

Design and Technology

We will be using our design skills to make our own toys that have a working pull mechanism.

Science

We will be exploring the materials that are around us. We will look at the materials our homes and contents are made from.

My Home

Computing

We will be looking at the basics of a computer and how to use technology effectively and safely in our homes.

Toys

What toys do we have in our homes? Do you think that your grandparents used to play with the same toys? What toys did you like when you were little? What toys do you like now?

History

We will be thinking about our homes and our lives, and what has changed in both our living memory and what is different from the past.

Art

We will be looking at the work of Ruth Burton and creating our own art inspired by Burton.

Memorable moments

Our class bear to come home with the children to see what their homes are like.

Geography

We will be looking at where our homes are and we will be creating a map of our homes.
