

Talke Trailblazers

Maps

We will be learning all about what maps are. We will use them and even have a go at creating our own. I wonder if someone can use our map to navigate around our school.

Maths

What modes of transport do we use in Talke? How do we get to school? We will ask the children in our school to help us collect data and then we will present it.

Art

We will look at the work of Clarice Cliff, a ceramic artist born in Staffordshire. We will learn about different brush strokes and experiment with the primary colours. We will have the opportunity to sculpt a vase of our own inspired by Cliff's work.

Role play

Our role play area has turned into a school. This will allow the children to be able to take up the role of the teacher, whilst having lots of learning opportunities based on their interests.

History

We will be learning all about Reginald Mitchell, the engineer who designed the spitfire. He was born in Butt Lane, Staffordshire.

We will be learning about: What an engineer is, why Reginald Mitchell is an important person to us and what we would like to ask him. We will also think about the inspirational things that we might do when we're older.

English links

Our senses. We will be exploring the senses in relation to our school and Talke. What can we see, hear, taste, touch and smell? We will be writing descriptively about our senses.

Geography

We will become super geographers this term. We will learn all about the human and physical features of Talke. I wonder what makes our area unique.

Design and Technology

By using junk modelling we will make a model of our school.

Where is Talke
and St
Saviour's
Academy?
