

Year 1 – Moving Minibeasts

Key Vocabulary

| | |
|------------------|---|
| Mechanism | A part that makes things move in different directions. |
| Slide | Something that can move smoothly along a straight/flat surface. |
| Lever | This moves around a pivot. |
| Pivot | This is a fixed point and allows the lever to move around it. It joins two things together. |

Design and Make a Moving Minibeast

Sticky Knowledge:

A **Lever and Pivot Mechanism** allow the picture to move in an arc across the page.

A **Sliding Mechanism** allows the picture to move in a straight line across the page.

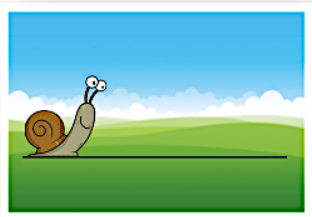

A **Wheel Mechanism** allows the picture to move in a circle on the page.

Types of Mechanisms:

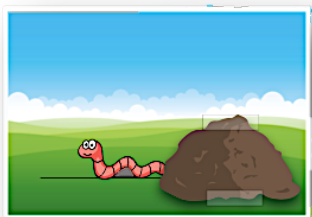

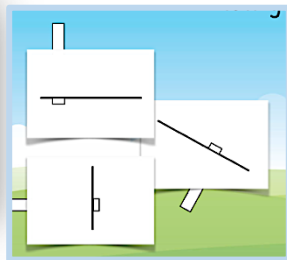

Golden Threads
