RE: COVID-19 Booster Access – Health/Social Care Context

To Whom It May Concern,

Swiss Cottage School is a community-maintained higher tier special needs school in the London Borough of Camden. Pupils at the school have layered and complex special educational needs and associated health needs. Our school works closely with the Camden & Islington NHS Services through on-site integrated provision.

The school staff, families and directly employed carers accessed the early vaccination programme to support the safety and wellbeing of this vulnerable pupil population. The role of carers for the family is in line with that of health and social care professionals.

We are providing this letter to support access to the early booster programme following 3 months and 1 day from the second COVID-19 vaccination.

Please contact the family or school directly if you require any specific additional confirmations on the pupil profile or placement.

Thank you for the role you have played to support the protection of this vulnerable community. We have valued this and your efforts throughout the pandemic.

Yours Sincerely,

Vijita Patel
Principal
