SHARK ATTACK

You have to guess the letters in the word your partner has chosen before the *sharks attack*.
 Every time you get a letter wrong you lose a lifebuoy. Choose one word from the table above and
 then another word of your choice.

SNAKES AND LADDERS

If you spell the word correctly move one space for the amount of letters in the word.

If you spell the word incorrectly miss a go.

Land on a snake go down, land on a ladder go up!

You must land on the exact number to win!

S CODE IT OUT!

THINK...

Which parts of the word are you confident are spelt correctly? Underline these parts.

Do you know the origins of any part of this word or other words that it may be connected to?

Could this word be a code breaker? If so a dictionary check is your best bet!

ACT...

Say the word out loud, exaggerate each sound. Smash the word down into smaller parts/syllables. Every syllable will contain a vowel, Y counts as a vowel.

Weigh up your options. What is the most likely code for that sound in that part of a word? Try a few codes out. What is the worst that could happen?

Use your visual memory, classroom resources such as dictionaries and Scode workbooks. Only ask for help when you have had a go.
