

Wednesday, 5th May

Dear Parents,

Yesterday's Closure

Thank you for your support yesterday when we had to close our school at very short notice due to an emergency with the water service. As you may be aware, a local problem with a water leak resulted in a significant drop in water pressure.

While United Utilities worked to solve the issue, the impact on our large site became increasingly severe as the morning progressed, with toilets becoming unusable and running water drying up. This was a result of the low water pressure and the large and high nature of our buildings causing the water not to be able to reach key areas of the school.

The urgent decision to close was not taken lightly, especially as it had to be made within such a short time period, but the safety of our students was paramount and the school was unable to continue functioning without the basic water facilities.

We would like to apologise for the disruption and thank you for the calm and understanding way you supported us to deal with this unprecedented event.

Yours sincerely,

Mrs V Hill

Headteacher

Outstanding education at the heart of the community
