

Why is our world wonderful?

Class 2 Home Learning - Due 19th October

To help support our geography topic 'Why is our world wonderful?' I would like you to choose to complete one of the 4 activities below.

Great Wall of China

Amazon Rainforest

Statue of Liberty

Great Barrier Reef

Mount Etna

The Great Pyramid of Giza

Mount Erebus

Some of the world wonders class 2 have looked at are some wonderful features of our world which could be human or physical!

Habitat Hunt

Go for a walk around a local area, it could be your garden, down by the river, at the park or a woodland. Look around you, look up and down. What habitats can you see? Which animals live there or might you find. Lift up some rocks or logs, what do you see? (Remember to put them back carefully) Take photos, write a list and draw your findings. You could even make your own spotter guide.

Wish you were here!

Design and write a postcard in role as a tourist to your chosen world wonder. Tell the reader everything you know about your landmark or natural environment. Try to be as descriptive as you can to paint a picture in their mind.

Model Making

Choose a world wonder and create a model of it using materials you may have at home such as lego, recycled materials, paper or even food. How creative can you be?

World Wonders

Research and choose a world wonder or pick a favourite from our learning in class to create a fact file, mini book or poster recording interesting facts and your geographical knowledge. Use pictures, drawings and writing to share your information as creatively as you can.
