Mouse Facts for Kids

- Despite their tiny bodies, mice eat between 15 and 20 times a day.
- A house mouse produces between 40 and 100 droppings per day.
- Mice are good jumpers, climbers and swimmers.
- Mice can live in a lab for up to two years, but usually only live for about 5 months in the wild, mostly because of predators, such as cats, snakes and foxes.

Mice typically enter our homes between October and February, looking for food, water and shelter from the cold. While these rodents may look cute, mice spread more germs than most people realize. Mice can actually carry as many as 200 human pathogens!

If you spot a mouse the house, it is safe to assume there are more or there will be soon. Female mice can give birth when they are two months old and are able to have babies 6 to 10 times per year.
