

Year 2 – Maths – Lesson 3

LO: To add a one-digit number to a two-digit Number

Task 1:

How many crayons altogether?

To answer this question you need to count all the crayons (including the ones in the box). $24 + 3 =$

How many altogether?

To answer this question you need to count the tens and ones.

$22 + 5 =$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Task 2 – complete the part-part whole diagram. You will need to count each part to find out the whole (top number). Then write it in a sum.

 $33 + 3 = \underline{\hspace{2cm}}$

A part-part whole diagram with a large empty circle at the top. Two lines connect it to two smaller circles below. The left smaller circle contains 33 crayons (two boxes of 10 and 13 individual crayons). The right smaller circle contains 3 individual crayons.

 $\underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{2cm}}$

A part-part whole diagram with a large empty circle at the top. Two lines connect it to two smaller circles below. The left smaller circle contains 13 crayons (one box of 10 and 3 individual crayons). The right smaller circle contains 20 crayons (two boxes of 10).

 $5 + 41 = \underline{\hspace{2cm}}$

A part-part whole diagram with a large empty circle at the top. Two lines connect it to two smaller circles below. The left smaller circle contains 5 individual crayons. The right smaller circle contains 41 crayons (four boxes of 10 and 1 individual crayon).

 $\underline{\hspace{1cm}} + 6 = \underline{\hspace{2cm}}$

A part-part whole diagram with a large empty circle at the top. Two lines connect it to two smaller circles below. The left smaller circle contains 20 crayons (two boxes of 10). The right smaller circle contains 6 individual crayons.
