

Play a game of 10 pin bowling

You will need 10 bottles & a ball (or rolled up pair of socks)

Instructions:

1. Set up your 10 objects in a triangle shape
2. Count to check how many bottles there are
3. Throw your ball at the bottles and remove the bottles that fell
4. Count how many fell over

Talk about what happened. I.e. I had 10 bottles and 4 fell over now there are 6 left. You can repeat this activity talking about what happens when we take objects away. (Our number gets smaller)

You could write down your number sentence. $10-4=6$

Remember to make play fair
and have fun!
