

Reception Home Learning
Maths Activity 3

LO: To identify and repeat a simple pattern

Collect 2 different types of object. I.e. pencils, pebbles, pasta, lego bricks

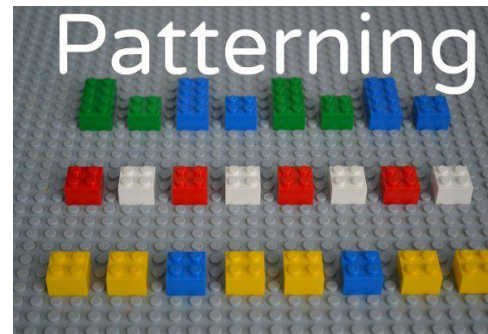

Start a pattern by putting 1 of each object in a line (this pattern is known as an AB pattern, see photo)

Can your child:

1. Continue the pattern by adding one of each object in the row
2. Change the pattern by adding 2 of each object (AABB pattern)
3. Try a more tricky pattern AABAAB (see yellow and blue Lego photo below)

**Challenge: Use 3
different types of
objects (ABC pattern)**

Pointers for Parents:
**Say and repeat the pattern out
loud as you point to the object and
allow your child the time to hear
what comes next.**
