Object: material thing that can be seen and touched. **Materials:** mater from which a thing is or can be made from. **Properties:** Features that can be measured like colour, volume, length or hardness. **Measure:** Find out the size or amount of something. **Group:** put objects together with similar properties. **Results:** Information found out by doing an investigation.

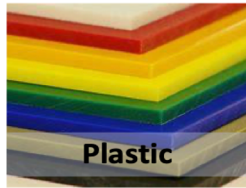

Types of Materials

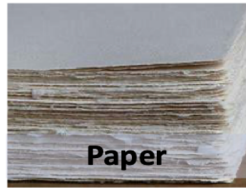

Water

Wood

Plastic

Paper

Brick

Glass

Stone

Metal

Materials

Objects are made from materials. They can be grouped based on the materials they are made from.

Every material has different properties. For example, paper is soft and smooth.

Materials can be natural or man-made.
