

Y2 Art – 3D – African Pots

African pots come in a variety of sizes and have many different uses.

They are made out of clay and often by hand with simple tools.

Pots are often decorated using tools to create patterns, marks or simple pictures.

Some pots have lids on for cooking or storage purposes.

Extra pieces of clay can be moulded onto the main part of the pot to add texture or decoration.

Some pots have handles for carrying or to help when pouring liquids.
