Year Four Learning Journey Autumn 1 – Geography

Mountains and Volcanoes in Italy: Mount Etna and Scafell Pike

Key Vocabulary

Mountain

A landform that rises prominently above its surroundings.

Volcano

An opening in the Earth's surface in which molten rock, gases and ash erupt.

Mountainous Region

Large areas with high elevation, steep slopes, rugged terrain and often rocky landscapes.

Equator

A line dividing Earth in Northern and Southern Hemispheres.

Climate Zone

Areas with distinct weather patterns.

Contour and Elevation

A collection of lines that show areas of elevation. Elevation is high and low areas of land above sea level.

Retrieval:

Rivers can begin in Mountainous Regions. Physical features of a place.

Lesson 1	Lesson 2	Lesson 3
I know that England and Italy, a European Country, have similarities and differences. I know that mountains and volcanoes are topographical features.	I know that contours show height and slope.	I know the features of a mountain.
Lesson 4	**Lesson 5**	**Lesson 6**
I know the features of a volcano.	I know the position and significance of the equator and Northern and Southern hemispheres. I know that weather changes across climate zones, and in mountainous regions.	I know how the land is used at Mount Etna and Scafell Pike.
