Year 6 Learning Journey Summer 2 - Geography

Jurassic Coast

Key Vocabulary

Erosion

The process of eroding, gradual destruction, by wind, water, or by some other natural agents.

Geographical Evidence

A series of stages of work that take you from a geographical question towards a geographical answer.

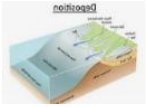

Climate Change

Change in global weather patterns due to human activities.

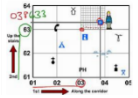

Deposition

The laying down of sediment carried by wind, flowing water or the sea. Sediment can be transported as pebbles, sand and mud.

Six-Figure Grid Reference

A way of identifying an exact location within a grid square on a map.

Greenhouse Gases

Gases that trap heat within the atmosphere, warming Earth's surface and driving Climate Change.

Retrieval

Four figure grid reference. Process of erosion. Understand tourism.

Lesson 1 I know that I can use a six-figure grid reference to help me make a detailed map of a known area.	**Lesson 2** I know the key features of a coast, including erosion and deposition.	**Lesson 3** I know that humans are having an impact on climate overtime, and this will impact The Jurassic Coast.
Lesson 4 I know that tourists have an environmental impact on the Jurassic Coast, and I khow to observe, measure, record, and present findings of the local area.	**Lesson 5** I know how to present the findings of the local area using a range of methods. (Line Graphs and Digital Technology)	**Lesson 6** I can present my findings to a group of people.
