

Early Years Curriculum 2024-2025

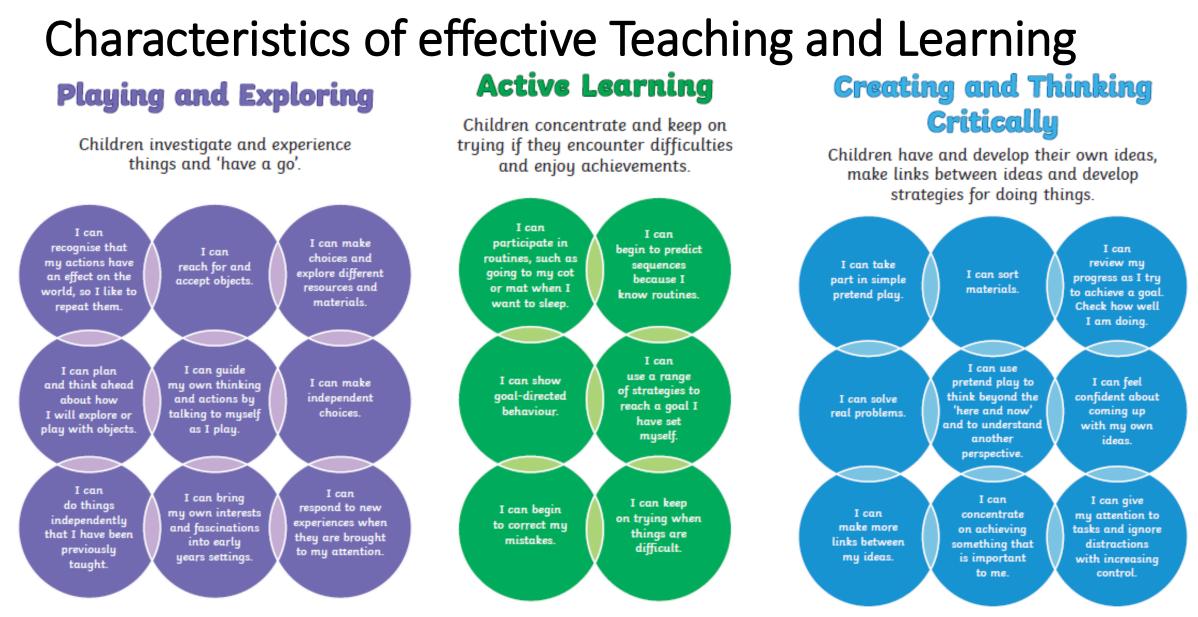

Proud to be part of The White Horse Federation Multi-Academy Trust | www.twhf.org.uk

Reception Long Term Planning 2024-2025

We use the Learning challenge curriculum from focus education to design and run carefully planned themes (Big Questions) throughout the year to ensure every child is given a variety of different stimuli.

Children will benefit from lots of opportunities to learn through play. At The Manor Primary School will ensure that learning will be fun, engaging and we will challenge and support all children what ever their starting point. As an EYFS team and effective role models, we will provide high quality interactions in order to develop and deepen the children's learning opportunities and language skills. We will deliver our curriculum through a balance of adult led and child-initiated activities based on the EYFS Framework 21 & children's interests. We value the importance of the outdoor environment for our children and use our outdoor space as a continuation of our indoor provision, it will be used at every opportunity. We provide our children with opportunities to develop their gross motor skills, to deepen their imaginations and also their sense of curiosity. We want the children to feel safe and secure at all times and ensure that our safeguarding procedures are rigorous and kept up to date. Parental communication and the relationship we develop with parents is of great value to us and we strive to foster this throughout this vital year.

We know that children do their best learning when they are absorbed, interested and active. We understand that active learning involves other children, adults, objects, ideas, stimuli and events that aim to engage and involve children for sustained periods. We believe that Early Years education should be as practical as possible and therefore, we are proud that our EYFS setting has an underlying ethos of 'Learning through play'. PLAY is essential for children's development, play builds on children's confidence as they learn to explore, to relate to others around them and develop relationships, Play Allows children to set their own goals and solve problems. Children learn by leading their own play and by taking part in play which is guided by adults.

Expressive Arts and Design		dren's artistic and sulture	awaranass sunnarts thair im	upon a Time	important that children		ities to engage with the art			
	The development of children's artistic and cultural awareness supports their imagination and creativity. It is important that children have regular opportunities to engage with the arts, enabling them to explore and play with a wide range of media and materials. The quality and variety of what children see, hear and participate in is crucial for developing their understanding, self-expression, vocabulary and ability to communicate through the arts. The frequency, repetition and depth of their experiences are fundamental to their progress in interpreting and appreciating what they hear, respond to and observe.
