

Class 5:1 suggested activities – week 4:

Hi,

Please remember to send over all the work you have been doing. This week please focus on the following.

1. Online learning module

Please go to the following website – www.sensoryspectacle.co.uk/online-training and enrol on the free course – Becoming a Sensory Detective. Complete the course and make and share any notes that would make a positive difference for our students or any learning activity ideas that may be beneficial.

2. Pre-formal curriculum

A lot of work is going on behind the scenes in relation to the pre-formal curriculum. In particular how that fits in with our PMLD learners. Lots of ideas are going around currently. For this next task we would like you to come up topic suggestions. We would like 3 topics per year, covering a 7 year plan. So 21 topics in total. With each topic, give a brief explanation as to why you feel this topic would be beneficial, any specific links it might have, and any learning ideas that could fit into that topic.

For example, you might choose the topic – COLD. This links with wintery seasonal weather and Christmas. Cold is a sense we all feel, therefore it is important to make some links to this sense. The sensory story Ice Age could a really good learning activity to take place for course of this topic.

3. Home learning

Please design 3 home learning tasks that would be suitable for our students. Please consider the limitations some of parents may have in facilitating home learning. The home learning activities should be fun and engaging, easy to understand for our parents to deliver and create beneficial sensory learning experiences for our students.

Thank you.
