1. Aims of the Teaching and Learning Policy

The Teaching and Learning Policy at the Meadows school serves as a cornerstone for ensuring all pupils access a high-quality, meaningful, and inclusive education. It is underpinned by our commitment to recognising and celebrating each learner's unique strengths, needs, and aspirations.

Our aims are to:

Personalise Learning

- Ensure every pupil receives an education tailored to their individual needs, strengths, and EHCP outcomes.
- Provide flexible learning pathways (Pre-formal, Informal, Semi-formal, Formal, and Sixth Form) that match each pupil's cognitive, social, emotional, and developmental profile.

Promote Holistic Development

- Support pupils' academic progress alongside their communication, independence, emotional wellbeing, and social relationships.
- Deliver a broad and balanced curriculum aligned with EHCP areas of need:
 - ✓ Cognition and Learning
 - ✓ Communication and Interaction
 - ✓ Social, Emotional and Mental Health
 - ✓ Sensory and Physical Development
 - ✓ Self-Care and Independence

Create Engaging, Accessible Learning Experiences

- Use adaptive teaching methods and accessible resources to ensure all pupils can engage in rich, meaningful learning.
- Embrace sensory, thematic, experiential, and real-world learning opportunities appropriate to each pathway.

Celebrate Progress and Achievement

- Use a robust and responsive assessment system to celebrate all forms of progress, including small steps, skill generalisation, and increased engagement.
- Capture evidence using platforms like Evidence for Learning and assess through frameworks such as the Engagement Model, MAPP, and Routes for Learning.

Empower Independence and Preparation for Adulthood

- Embed life skills, problem-solving, and decision-making across all curriculum areas and learning pathways.
- Ensure that pupils are supported to build independence and confidence to prepare for meaningful adulthood experiences.

Support Reflective and Collaborative Practice

- Ensure all staff are equipped to reflect on their practice and adapt teaching based on pupil responses and team collaboration.
- Promote consistency, high expectations, and shared responsibility for pupil learning and wellbeing across the school.

Work in Partnership with Families and Professionals

- Foster open, honest communication with families and carers to co-produce educational goals and celebrate pupil successes.
- Collaborate with therapists, external agencies, and educational professionals to enrich the teaching and learning process.

2. Our guiding principles

Guiding Principles and School Values

Our teaching and learning practices are grounded in the core values that define our school community: **Communication**, **Respect**, **Collaboration**, **Independence**, **Growth**, **and Wellbeing**.

These values guide every aspect of curriculum design, classroom interaction, and long-term outcomes for our pupils.

- **Communication** is at the heart of all learning. We value every form of expression—verbal, visual, physical, or symbolic—and provide learners with the tools and opportunities to develop their communicative abilities, promoting meaningful connection with others.
- Respect shapes the inclusive, safe, and nurturing environment we foster. We
 uphold each pupil's individuality, learning style, and cultural identity, ensuring
 that their voice is heard and valued within the classroom and wider school
 community.
- Collaboration drives our teamwork ethos. Effective teaching and learning happen when staff, pupils, families, and professionals work together. Coplanning, co-delivery, and co-reflection ensure learning is relevant, ambitious, and consistent.
- Independence is both a process and a goal. Through structured support and scaffolded challenge, we empower learners to take increasing ownership of their choices, learning routines, and real-world skills that prepare them for adulthood.
- Growth reflects our commitment to progression over time. We celebrate every step of progress—academic, emotional, or social—and use formative assessment tools to continuously tailor learning experiences that stretch and support each learner.
- **Wellbeing** is central to sustainable learning. Our curriculum embeds emotional regulation, sensory integration, and safe relationships, ensuring that pupils are ready to learn and feel secure in their environments.

Together, these principles shape a teaching and learning culture that is aspirational, compassionate, and wholly pupil-centred—ensuring every child is seen, supported, and successful.

3. Equal opportunities

The school will ensure that all pupils have access to all aspects of educational life at the school, regardless of SEND. The school will provide reasonable adjustments wherever necessary to ensure that pupils with particular support needs can access the same opportunities as pupils without those needs.

The school will ensure that all teaching is made accessible for all pupils, and appropriate additional learning resources will be provided to ensure this wherever this is necessary, e.g. support from TAs or sensory materials.

Teaching staff will ensure that pupils' needs are assessed and reviewed where necessary in response to their behaviour, progress and attainment, and that these needs are catered for wherever reasonably practicable.

The school uses a 'total communication' approach to teaching to ensure that all pupils can access the lessons – this includes the use of signing, symbols and objects of reference where needed.

Staff will maintain high expectations of all pupils and will be expected to provide an environment where all pupils feel included, supported and challenged, and can achieve their best outcomes.

The school will implement a whole-school approach to the promotion of the fundamental British values and will ensure that these values are taught throughout all relevant areas of the curriculum.

4. Roles and Responsibilities

To ensure teaching and learning is inclusive, effective, and personalised, all members of the school community play a vital role in delivering and supporting the curriculum. The responsibilities below outline expectations for key stakeholders in the teaching and learning process.

Teachers

- Plan and deliver differentiated lessons aligned with the appropriate pathway and individual EHCP targets.
- Use a range of teaching methods, communication supports, and assessment strategies to meet diverse learner needs.
- Capture meaningful evidence using Evidence for Learning, tagging to relevant schemas and outcomes.
- Monitor progress and adapt planning responsively based on assessment and pupil engagement.
- Liaise with families and multi-agency professionals to ensure joined-up provision and communication.

Learning Support Practitioners (LSPs)

- Implement planned learning activities under the guidance of the class teacher.
- Provide individualised support to promote communication, independence, engagement, and emotional regulation.
- Contribute to observational assessment by recording and tagging evidence within EfL.
- Support transitions, sensory needs, and the implementation of therapyinformed strategies.
- Actively participate in planning meetings, reviews, and reflective practice discussions.

Subject (Bubble) Leads

- Ensure curriculum coverage, progression, and consistency across subjects, adapted for pathway needs.
- Provide planning resources and schemes of work tailored for SEND learners.
- Support colleagues through coaching, modelling, and sharing of subjectspecific adaptations.
- Monitor and evaluate teaching and learning in their subject through pupil work, observations, and feedback.
- Lead staff development related to their subject area, with a focus on inclusivity and creativity.

Key Stage Leads

- Champion the vision, pedagogy, and progression expectations within their pathway (e.g., Pre-formal, Semi-formal).
- Support teachers in aligning planning, assessment, and pedagogy with the needs of learners on their pathway.
- Ensure EHCP outcomes are embedded and reflected in all aspects of curriculum delivery.
- Monitor teaching quality and pupil progress across the pathway and lead moderation processes.
 - Coordinate induction, training, and reflective practice specific to the pathway.

Senior Leadership Team (SLT)

- Oversee strategic development and quality assurance of teaching and learning across the school.
- Ensure all curriculum pathways are appropriately resourced, structured, and reviewed.
- Lead on school-wide data analysis, including PLG progress, EHCP outcomes, and schema tracking.
- Facilitate ongoing CPD for staff, aligned with school improvement priorities and learner needs.

 Maintain robust systems for monitoring, evaluation, and stakeholder communication.

Parents and Carers

- Engage in regular communication with class teams to support learning at home and in school.
- Share valuable insights about their child's strengths, needs, and interests.
- Participate in reviews, goal-setting meetings, and co-production of PLGs and EHCP outcomes.
- Support generalisation of learning goals through family routines and real-world experiences.

Students

All pupils, regardless of their needs or pathway, are valued as active participants in their own learning. We recognise that every learner has the right to be heard, to contribute, and to experience ownership over their educational journey. Pupils are encouraged to:

- Engage with learning opportunities to the best of their ability, using their preferred methods of communication and interaction.
- Express their preferences, choices, and interests in ways that are meaningful to them.
- Participate in setting and reviewing their personal learning goals, wherever appropriate, using pupil voice tools, visual prompts, or supported communication.
- Respect others, take turns, and contribute to a positive classroom environment.
- Develop self-awareness and independence, with scaffolded support from adults and peers.

By supporting pupils to understand their own learning needs, advocate for themselves, and celebrate their achievements, we foster confidence, autonomy, and a sense of belonging in the school community.

Governors

The Governing Body plays a vital strategic role in supporting and challenging the quality of teaching and learning across the school. Governors are responsible for monitoring the effectiveness of the curriculum pathways and ensuring that all pupils, regardless of need or ability, receive an education that is inclusive, aspirational, and aligned with statutory requirements. They do this by reviewing teaching and learning policies, scrutinising progress data (including outcomes linked to EHCPs), and evaluating the impact of leadership decisions. Governors also act as critical friends—supporting senior leaders in developing a robust, responsive curriculum and ensuring the school remains focused on pupil outcomes, wellbeing, and preparation for adulthood. Through visits, reports, and committee meetings, governors help ensure accountability, transparency, and continuous improvement in teaching and learning provision.

5. Curriculum

At the heart of our approach to teaching and learning is a broad, balanced, and ambitious curriculum that is personalised, purposeful, and fully aligned with each learner's needs, interests, and aspirations. Our curriculum is designed to provide meaningful access to knowledge and experiences that enable pupils to develop academically, socially, emotionally, and functionally preparing them for life beyond school.

Our curriculum places the child at the centre, beginning with the aims articulated in their Education, Health and Care Plan (EHCP). We ensure a deep understanding of what each learner can already do and understand, enabling us to identify the targets that will have the most meaningful impact on their lives.

We are committed to delivering a broad, rich, and stimulating curriculum that develops communication, confidence, resilience, self-esteem, and independence. These outcomes are underpinned by our school's Core Values: Communication, Respect, Independence, Collaboration, Growth, and Wellbeing.

Through our curriculum, we aim to equip pupils with the knowledge and cultural capital they need to succeed in life. We strive to foster a lifelong love of learning, inspiring curiosity, creativity, and a strong sense of self that endures beyond their time at The Meadows School. Our learners are supported to become confident citizens, fully prepared for life in modern Britain.

We define cultural capital as the essential knowledge and experiences pupils need to navigate the world around them and achieve future success. To that end, we provide regular opportunities to engage in enrichment activities and real-life experiences, including educational visits, guest speakers, and immersive learning experiences, both in and beyond the classroom.

Our curriculum is carefully sequenced, with clearly defined end points at the conclusion of each unit, or key stage. Where relevant milestones are mapped out along the way, identifying the specific knowledge and skills pupils will develop as they progress through their learning journey.

Where appropriate, subjects are taught through broad thematic topics, while still supporting pupils to recognise the distinct skills, knowledge and concepts unique to **each** subject discipline. This balanced approach helps pupils develop knowledge and understanding while making meaningful cross-curricular connections.

Our teaching and learning is shaped by clear intent—what we want pupils to learn, strong implementation—how we teach it, and meaningful impact—how well pupils learn and apply it.

5.1 Curriculum Intent

"Our intent is to provide high-quality, personalised, and meaningful learning experiences that nurture essential life skills and promote independence, wellbeing, and success—both within and beyond the school environment.

Our curriculum aims to promote

- Holistic and Individualised Learning: We acknowledge that each child is unique, and our curriculum reflects this by being holistic, individualised and child centred. Whether it's through sensory activities, life skills training, or creative exploration, we adapt our approach to each student's cognitive and developmental abilities. We believe that learning should be fun and engaging to help motivate students and allow them to feel happy and reach their potential in a safe, creative and supportive environment.
- Preparation for Adulthood and Independence: Preparing students for adulthood
 is fundamental. We focus on fostering independence, providing practical life skills
 that will support students in managing their day-to day lives as they transition into
 adulthood. This includes developing social skills, self-care practices, emotional resilience, confidence and the ability to communicate effectively and safely in their
 communities.
- Community Engagement and Application of skills: We aim to provide our students
 with the knowledge and cultural capital they need to succeed in life inspiring
 a love of learning that will remain with them throughout their lives beyond the
 Meadows School. Our curriculum aims to foster community engagement by
 providing students with opportunities to apply the skills they learn in real-world settings, encouraging active participation and building connections within their
 community.
- Achievement and Success: Our curriculum is centred on promoting achievement, where each student's unique abilities and progress are celebrated. We aim for students to feel confident in their ability to achieve meaningful success, whether it be academic, personal or social. Through focused and individualised learning, we empower student to understand and pursue their aspirations.

Our overarching aims are shaped by the following core intentions:

- To provide high-quality, personalised, and meaningful learning experiences that promote engagement and achievement.
- To ensure learning is accessible, inclusive, and adaptive, reflecting each pupil's starting point, communication style, and EHCP outcomes.
- To develop essential life skills across all pathways that prepare learners for greater independence, wellbeing, and long-term success.
- To support the development of Preparation for Adulthood (PfA) skills: Employment, Independent Living, Community Inclusion, and Health.
- To provide regular and meaningful opportunities for community engagement, enabling pupils to practise communication, independence, and social skills in real-world settings.
- To support pupils in applying learned skills functionally across contexts, ensuring generalisation beyond the classroom into everyday life, work-related learning, and community experiences.
- To celebrate individual achievement in all its forms—academic, personal, social, emotional, and functional—recognising and valuing progress from each pupil's unique starting point.
- To create a culture of aspiration and success, where pupils are motivated to reach their potential through personalised goals, high-quality teaching, and consistent recognition of effort and improvement.

5.2 Curriculum Implementation

To meet our curriculum intent, we implement the following:

- Differentiated and adaptive teaching approaches that respond to pupils' communication styles, sensory needs, and individual EHCP outcomes.
- Pathway-based curriculum models that align with developmental stages and prioritise engagement, cognition, and real-life skill-building.
- Personalised Learning Goals (PLGs) that are drawn from EHCPs and tracked through appropriate frameworks such as MAPP, SCERTS, and the Engagement Model.
- Embedding of life skills across all subject areas, with dedicated time for developing independence, emotional regulation, and functional application.
- Regular exposure to real-world experiences including community visits, enterprise projects, and work-related learning, supporting Preparation for Adulthood (PfA).
- Opportunities for pupils to apply knowledge and skills across varied contexts, enabling generalisation into everyday life, supported by cross-curricular planning.
- Celebration of progress and achievement in all forms—academic, personal, emotional, and social—through assemblies, reward systems, and family communication.
- Use of student voice and strengths-based approaches to build motivation, selfesteem, and a sense of ownership in the learning journey.
- Ongoing professional development for staff, ensuring high-quality teaching and reflective practice that fosters a culture of aspiration and improvement.

We acknowledge that curriculum implementation is a dynamic process that is constantly evaluated to ensure it remains relevant and meets the evolving needs of students and staff

5.3 Curriculum Impact

We will know our curriculum is having the intended impact when:

- Pupils make measurable progress towards their EHCP outcomes and personalised learning goals through high-quality, tailored provision.
- Learners demonstrate increasing independence, applying practical skills in everyday situations and working towards aspirational futures.
- Students develop confidence in communication and self-expression, using a range of accessible, individualised methods.
- Skills are successfully generalised across settings, with pupils able to transfer learning between lessons, home, community environments, and work-related contexts.
- Learners are engaged, motivated, and emotionally regulated, showing improvements in confidence, self-expression, and active participation in their learning across all pathways.
- Social interaction and meaningful community engagement are evident across all pathways and learning experiences.

- Assessment frameworks (e.g. MAPP, SCERTS, Engagement Model, Routes for Learning) and qualitative evidence (e.g. portfolios, observations, learner voice) consistently demonstrate progress and inform meaningful next steps.
- Diversity, identity, and inclusion are promoted and respected, with pupils showing awareness of others' values, cultures, and perspectives.
- Individual successes are celebrated, and pupils are recognised for achievements in all forms—academic, personal, and social—fostering a culture of aspiration, pride, and lifelong learning.
- Pupils achieve positive post-16 destinations, with progress towards Preparation for Adulthood outcomes including employment, independent living, and health.
- Regular curriculum review ensures it remains responsive, engaging, and aligned with both statutory requirements and the diverse needs of our pupils.

6. Pathway-Based Structure

We deliver our curriculum through a flexible, progressive pathway model, ensuring all pupils receive a learning experience that is developmentally appropriate and aspirational. These pathways allow learners to follow a curriculum and pedagogical route that aligns with their interests, strengths, and future goals, whether they are academic, creative, or vocational.

Pathways are designed as flexible organizational tools that allow us to place students into the most appropriate pathway based on what we believe will benefit them both now and in the future. Recognizing the individuality and evolving nature of each student, these decisions are not permanent; students can move between pathways if such a transition will better support their personal growth and development. The selection of a pathway is based on both academic and social abilities, enabling us to tailor an individualized curriculum to meet the needs of each pupil at every Key Stage. Our students are regularly assessed, and their pathway can be adjusted throughout their time at the Meadows School to ensure they receive the best possible support and opportunities.

Our pathways focus collectively on supporting the diverse needs of our students, promoting their development and engagement at every stage of their educational journey. There is an emphasis on a student-centred approach that values individual interests and strengths, encouraging meaningful learning experiences that extend beyond traditional academic boundaries. We aim to prepare students for success in an increasingly complex world while considering individual student needs and promoting personal growth.

We embrace an approach that acknowledges all behaviours serve a purpose, whether it be for communication, emotional regulation, or engagement in adaptive skills. Learning experiences should be meaningful, functional, and developmentally appropriate, while also providing opportunities to encourage participation in everyday social experiences and routines.

Our learners typically follow one of the following curriculum pathways based on their primary needs.

• Engagement for Life (Pre-formal; PMLD)

This pathway supports pupils with profound and multiple learning difficulties (PMLD) through a highly personalised, sensory-based curriculum. Learning is centred around engagement, communication, emotional regulation and physical development, using routines and immersive experiences to promote interaction, exploration and early responsiveness.

Foundations for Life (Informal; Complex ASC/Complex SLD)

Designed for pupils with complex autism and/or complex learning disabilities and difficulties, this pathway provides a structured, low-arousal environment with a focus on functional communication, independence, emotional wellbeing, and positive routines. The curriculum is tailored to support interaction, flexibility of thought and sensory regulation.

Students with needs similar to those typically associated with complex ASC may also need to be supported through the school's informal and complex autism curriculum pathway, ensuring provision is tailored to their individual communication, sensory, and learning profiles."

• Learning for Life (Semi-formal; SLD)

This pathway supports pupils with severe learning difficulties through a broad, skills-based **subject specific** curriculum that includes elements of literacy, numeracy, topic-based learning, and personal development. Teaching is highly practical and meaningful, enabling pupils to build independence and access a range of subject areas at an appropriate level.

Options for Life (Formal; MLD)

Our formal curriculum pathway offers an adapted version of the National Curriculum, tailored to pupils with moderate learning difficulties. It includes subject-specific learning, and life skills development, enabling pupils to prepare for further education, vocational training or supported employment.

Transition to Adult Life (Sixth Form)

In our Transition to adult life (Sixth Form) provision, the focus is on preparing students for adulthood. Pupils follow a personalised programme of study that includes functional skills, life skills, community access, careers education and work-related learning. Each student's pathway is shaped by their aspirations and destinations, supporting a smooth and successful transition beyond school.

7. Curriculum Areas

Each pathway is underpinned by key curriculum areas (Bubbles) such as:

- Communication and Interaction
- Cognition and Learning
- Social, and Emotional Development
- Physical and Sensory Development
- o Independence and Life Skills
- Culture and Arts

Communication and Interaction - Curriculum Overview

The Communication and Interaction curriculum area is central to our provision, reflecting the belief that communication is the foundation of all learning, relationships, and personal development. Our approach recognises that pupils may experience significant barriers in expressive and receptive language, social interaction, and understanding non-verbal cues—and that these barriers must be addressed systematically and sensitively through a personalised curriculum.

This area of the curriculum is designed to support pupils at every level of communication, from pre-intentional and sensory communication to early symbolic language, through to functional spoken language, augmentative communication, or alternative systems (e.g., AAC, PECS, Makaton). The focus is on developing the means, motivation, and opportunities to communicate, ensuring all pupils can express needs, make choices, share experiences, and build social connections.

Key elements of this curriculum area include:

- Developing intentional communication (e.g., eye gaze, gesture, vocalisation)
- Supporting receptive and expressive language
- Enhancing social interaction and shared attention
- Using and understanding symbols, signs, and AAC
- Developing functional communication in real-life contexts
- Supporting self-advocacy and emotional expression
- Supporting the systematic teaching of phonics and reading

Teaching is delivered through highly structured, multi-sensory, and interactive approaches, embedded across the curriculum and personalised through EHCP outcomes and Personal Learning Goals (PLGs). Communication opportunities are maximised throughout the day, in both planned activities and natural interactions, with staff modelling and reinforcing language through routines, play, and enrichment.

Progress is measured using developmental and functional tools such as MAPP, and inschool communication profiling frameworks, ensuring we capture both communicative intent and skill development.

The Communication and Interaction curriculum ensures that all pupils are supported to become active participants in their world, equipped with the tools they need to connect, relate, and express themselves, no matter their mode of communication.

Cognition and Learning - Curriculum Overview

The Cognition and Learning curriculum area forms a core component of our provision, ensuring that all learners have access to a curriculum that is individualised, developmentally appropriate, and meaningful. This area supports the development of essential thinking skills, problem-solving strategies, memory, and early academic foundations, tailored to the diverse needs and learning profiles of our pupils.

Our approach is underpinned by the recognition that pupils, particularly those with complex learning difficulties or working at pre-subject-specific levels, require a highly differentiated and scaffolded pathway that enables them to build confidence and independence in their thinking and learning processes. We focus on how pupils learn, not just what they learn, embedding principles of metacognition, repetition, multi-sensory learning, and practical application.

Curriculum planning within Cognition and Learning is informed by developmental frameworks, Personal Learning Goals (PLGs), and EHCP outcomes. It encompasses areas such as:

- Early problem-solving and reasoning
- Memory and recall strategies
- Visual and auditory discrimination
- Sequencing and pattern recognition
- Organisational skills and task awareness

Teaching is designed to be highly structured, visually supported, and delivered through engaging, functional, and context-rich activities that promote generalisation and transference of skills. Pupils access learning through a combination of individual, small group, and co-active experiences, with communication, emotional regulation, and sensory needs carefully considered throughout.

Progress within this area is assessed using formative and summative frameworks, such as the Engagement Model, MAPP, or bespoke profiling frameworks and PLG tracking systems, ensuring a holistic view of development that captures both small steps and wider functional achievements.

The Cognition and Learning curriculum ensures that all pupils, regardless of starting point, are supported to develop their capacity to think, learn, and solve problems, laying a foundation for lifelong learning, independence, and participation in wider society.

• Social and Emotional Development– Curriculum Overview

The Personal, Social and Emotional Development (PSED) curriculum area is a foundational aspect of our SEND teaching and learning approach. It supports pupils in understanding themselves and others, building meaningful relationships,

developing emotional literacy, and acquiring the skills necessary for wellbeing, independence, and social inclusion.

Many of our learners have complex profiles that impact how they relate to the world, manage emotions, and respond to social situations. Our PSED curriculum is therefore highly individualised, carefully scaffolded, and embedded across all aspects of the school day. It is rooted in emotionally attuned practice, and delivered through consistent, predictable routines that foster trust, self-regulation, and a sense of belonging.

The key aims of this curriculum area include:

- Developing self-awareness and a positive sense of identity
- Supporting emotional recognition, regulation, and expression
- Building resilience and coping strategies
- Establishing and maintaining relationships
- Understanding social expectations and boundaries
- Encouraging independence, responsibility, and decision-making
- Promoting positive mental health and wellbeing

PSED is not taught in isolation but is integrated into the wider curriculum through daily routines, structured group work, play-based interactions, and real-life scenarios such as turn-taking, making choices, and dealing with change. Where appropriate, pupils also access focused sessions such as Zones of Regulation, social stories, emotional check-ins, or therapeutic input to support their development.

Curriculum planning is aligned with EHCP outcomes, Personal Learning Goals (PLGs), and recognised frameworks such as SCERTS, Engagement Model, or PSHE Association guidance, ensuring a developmental and functional progression.

Assessment in this area values small steps and subtle shifts in behaviour, including increased tolerance, emerging independence, positive social interactions, and the ability to manage transitions or express preferences appropriately.

Through a carefully structured and nurturing PSED curriculum, we aim to empower all pupils to develop confidence, emotional resilience, and the social understanding needed to engage safely and meaningfully with others, both within school and in the wider community.

• Independence and Life Skills – Curriculum Overview

The Independence and Life Skills curriculum area plays a vital role in preparing learners with SEND for everyday life by promoting autonomy, dignity, and functional skills that support lifelong wellbeing. For many of our pupils, the journey to independence involves highly individualised pathways that take account of cognitive, physical, sensory, and communication needs. This area of the curriculum ensures that all learners have access to practical, achievable learning opportunities that are embedded in real-life contexts.

The focus is on developing the skills, routines, and confidence needed to manage personal care, make informed choices, and contribute meaningfully to daily life.

These skills are foundational not only to future independence but also to the pupil's self-esteem, safety, and ability to participate within the school and wider community.

Key components of this curriculum area include:

- Toileting, hygiene, and personal grooming
- Dressing and managing belongings
- Eating and drinking skills
- Safety awareness and risk management
- Managing transitions and routines
- Understanding health and wellbeing needs
- Making personal choices and expressing preferences
- Functional life skills (e.g., shopping, cooking, travel training)

Learning in this area is embedded throughout the school day—from morning routines and mealtimes to structured life skills sessions—and is always delivered with dignity, respect, and sensitivity. Staff work co-actively and collaboratively, offering graduated levels of support based on pupil need, including physical prompting, visual supports, and verbal modelling.

Planning is directly informed by EHCP outcomes, Personal Learning Goals (PLGs), and where appropriate, the Preparation for Adulthood framework. For some learners, developing consistency and confidence in a single routine may take extended time and repetition. For others, progression may involve generalising skills across contexts and increasing independence with less support.

Assessment in this area celebrates functional progress, such as initiating a self-care task, using a symbol to request help, or managing part of a routine independently. It also recognises the importance of emotional readiness, self-advocacy, and the pupil's ability to make informed, supported choices.

Through a responsive and inclusive Self-Care and Independence curriculum, we aim to equip all learners with the skills and confidence to lead more independent, empowered, and self-determined lives, both now and in the future.

Physical and Sensory Development – Curriculum Overview

The Physical and Sensory Development curriculum area is a key component of our provision, supporting pupils to develop the physical, sensory, and motor skills necessary for functional independence, learning engagement, and wellbeing. For many pupils -particularly those with complex, sensory, or physical needs—this area of development is central to accessing the wider curriculum and to ensuring a meaningful and personalised educational experience.

Our approach is rooted in the understanding that pupils may experience a range of barriers, including gross and fine motor challenges, sensory processing differences, and physical disabilities that impact how they move, explore, and interact with their environment. As such, this curriculum area is carefully planned in collaboration with therapeutic and clinical teams (e.g., physiotherapists, occupational therapists, sensory specialists), and embedded throughout the school day.

Key aims of this curriculum area include:

- Developing gross motor skills (e.g., posture, balance, coordination, mobility)
- Enhancing fine motor skills (e.g., grasp, manipulation, pre-writing skills)
- Supporting sensory integration and self-regulation
- Building body awareness, spatial awareness, and physical confidence
- Promoting functional movement for independence (e.g., navigating the environment, dressing, using equipment)
- Encouraging engagement in active play, physical education, and relaxation
- Developing personalised sensory diets and strategies to reduce barriers to learning

Learning is highly differentiated and may take place through a variety of contexts, such as sensory circuits, hydrotherapy, movement breaks, forest school, yoga, adapted PE and co-active exploration. It is delivered through repetitive, responsive, and pupil-led approaches, with close attention to regulation, safety, and pupil preferences.

This curriculum area is directly informed by EHCP outcomes, therapy programmes, and Personal Learning Goals (PLGs). It also aligns with Engagement Model principles by emphasising exploration, realisation, persistence, and initiation within physical and sensory tasks.

Progress is measured not only in terms of skill acquisition, but also in increased tolerance, participation, body control, emotional regulation, and the ability to engage meaningfully in a range of activities.

Through the Physical and Sensory Development curriculum, we aim to support each learner in developing the confidence, control, and comfort they need to navigate the world with increasing independence, safety, and enjoyment.

• Culture and Arts – Curriculum Overview

The Culture and Arts curriculum area is designed to help pupils make sense of their environment, develop curiosity about the world around them, and build foundational knowledge across arts, humanities, and culture. This area is delivered through highly personalised, sensory-rich, and experiential learning, enabling pupils to explore, notice, and engage with people, places, objects, and events that are relevant to their lives.

The KUW curriculum fosters pupils' awareness of both their immediate surroundings and the wider world, including how things work, how people live, and how environments and cultures vary. It also includes expressive and creative development, encompassing experiences in art, music, drama, history, geography, and RE, ensuring that all learners are offered opportunities to explore diverse ideas and perspectives in accessible and meaningful ways.

Key aims of this curriculum area include:

• Building curiosity, engagement, and investigative behaviours

- Developing early scientific thinking (e.g., cause and effect, observation, prediction)
- Exploring creativity through sensory art, music, and performance
- Gaining awareness of time, place, and cultural identity
- Recognising and respecting diversity in people and traditions
- Understanding simple technology and the environment
- Exploring historical and geographical concepts in practical, real-world contexts

For pre-subject-specific learners, this may involve tactile and sensory experiences, such as handling natural materials, exploring changes (e.g., light/dark, wet/dry), participating in sensory stories, or engaging with seasonal routines and cultural celebrations. For those working at a more formal level, there are opportunities to engage in structured enquiry, expressive arts, and topic-based exploration with adapted materials and communication supports.

Planning in this area is closely aligned with Personal Learning Goals (PLGs) and EHCP outcomes, with cross-curricular links to communication, physical development, and emotional regulation. Opportunities are also embedded within enrichment experiences such as community visits, themed days, performances, and outdoor learning.

Progress is observed through pupils' increasing awareness, interaction, and expression of ideas, as well as their ability to engage in real-life contexts and understand their place in the world. Emphasis is placed on developing knowledge that is functional, personally relevant, and supportive of each learner's future engagement with society and culture.

Through the KUW curriculum, we aim to empower learners to develop a sense of identity, curiosity, and connection to the wider world—laying the foundations for lifelong learning, creativity, and inclusion.

8. Planning

Effective planning is at the heart of delivering a curriculum that is purposeful, inclusive, and responsive to the needs of every pupil. Our planning model is designed to ensure progression, sequencing, and meaningful learning across all pathways and curriculum areas, while also maintaining flexibility to personalise learning in accordance with individual EHCP outcomes.

• Long-Term Planning

Long-term curriculum maps are developed collaboratively by **curriculum leads**, ensuring alignment with the school's **curriculum intent**, which was co-produced with input from staff, governors, families, and external professionals. These maps outline the overarching themes, concepts, and subject coverage across the academic year, ensuring **breadth**, **relevance**, and **consistency** across all learner pathways.

Schemes of Work

Curriculum leads design and maintain adaptable schemes of work for their subjects, clearly mapped to different pathway requirements (Pre-formal to Sixth Form). These

schemes reflect the individualised and holistic nature of our curriculum and embed opportunities for community engagement, skills application, preparation for adulthood, and learner achievement. They are aligned with recognised SEND frameworks (e.g. SCERTS, MAPP, Engagement Model) and provide flexible resources, scaffolded objectives, and progression steps.

• Medium-Term Planning

Teachers create medium-term plans that break down units of work into sequenced learning experiences tailored to the needs, interests, and abilities of their pupils. These plans include clearly defined learning intentions, links to EHCP targets and curriculum bubbles, and strategies for differentiation and engagement. They are shared across teams to promote consistency, collaboration, and meaningful cross-curricular links.

Short-Term and Core Subject Planning

Short-term planning, particularly for **core areas** such as communication, literacy, and mathematical thinking, is informed by real-time assessment data, engagement observations, and pupil responses. These plans detail the day-to-day delivery of lessons, including staff deployment, individual adaptations, and opportunities for sensory or therapeutic input.

Progressive and Purposeful Planning

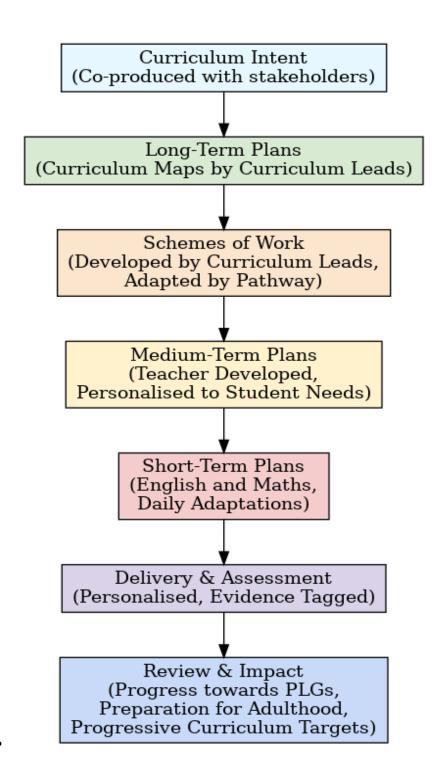

Across all levels, planning is:

- Progressive building on prior knowledge, skills, and experiences in a cumulative and reinforcing way.
- Sequenced ensuring logical order and scaffolding that support conceptual understanding and skill mastery.
- Meaningful connecting learning to real-life contexts, personal interests, and future aspirations.

Planning is evaluated regularly to ensure it reflects our curriculum intent to:

- Provide holistic and individualised learning opportunities.
- Promote **preparation for adulthood** and development of **independence**.
- Encourage community engagement and application of functional skills.
- Celebrate achievement and success in all its forms.

See Overview of Planning Process:

9. Learning Environment

We are committed to creating safe, structured, and stimulating learning environments that reflect the individual needs, sensory profiles, and interests of our pupils. Our classrooms are inclusive spaces where communication is accessible, independence is promoted, and emotional regulation is supported. Each learning environment is carefully planned to offer predictability, visual clarity, and adaptability, incorporating elements such as personalised workstations, calming zones, sensory resources, and interactive displays. Across all pathways, the learning environment supports pupils in engaging meaningfully with the curriculum, developing autonomy, and feeling

secure and valued. Staff work collaboratively to ensure that both the physical and emotional environments reflect the core values of the school—respect, communication, wellbeing, collaboration, growth, and independence—to enable every pupil to thrive.

Each pathway—Pre-formal, Informal, Semi-formal, Formal, and Sixth Form—has an accompanying Pathway Overview Document that outlines not only curriculum and pedagogy but also the environmental structures necessary to support effective engagement and learning. These documents guide teams in adapting spaces for sensory regulation, promoting communication, supporting physical access, and encouraging independence. Environmental strategies such as visual timetables, structured routines, access to quiet areas, and use of AAC tools are clearly referenced to ensure a consistent and thoughtful approach across all classes. This alignment ensures that the learning environment evolves in parallel with curriculum design, reinforcing our intent to provide holistic, accessible, and individually responsive education.

Please see below in summary distinct environmental priorities that enable pupils to engage meaningfully, regulate effectively, and access their learning.

- **Engagement for Life** (*PMLD, Pre-formal*): Environments prioritise low-stimulation sensory accessibility, cause-and-effect opportunities, and interactive zones for tactile, auditory, and visual engagement. Settings may include blackout tents, light boxes, resonance boards, and sensory pathways to support awareness and responsiveness.
- Foundations for Life (Complex ASC/Complex SLD, Informal): Classrooms are designed with a focus on predictable structure, visual clarity, and autism-friendly practices. Environments feature individual workstations, calm areas, clear transitions, and personalised communication supports (e.g., PECS, AAC, TEACCH principles).
- **Learning for Life** (SLD, Semi-formal): Spaces balance structure and flexibility, offering opportunities for thematic learning, group collaboration, and scaffolded independence. Classrooms may include creative zones, and task systems that promote cognitive development and social interaction.
- Options for Life (MLD, Formal): Learning environments reflect a more subjectspecific structure while continuing to embed inclusive adaptations. Classrooms support focused independent work, peer collaboration, and use of digital tools, with clearly defined subject zones and learning displays.
- Transition to Adult Life (Sixth Form): Spaces are modelled on real-world and vocational contexts, with access to kitchens, and community-based settings. The environment fosters functional communication, self-advocacy, and preparation for adulthood, supporting learners to generalise their skills with confidence.

These pathway-specific environmental approaches are co-developed with staff teams and reviewed regularly to ensure alignment with the school's curriculum intent and the evolving needs of learners.

10. Differentiation and Adaptive Teaching

Differentiation—reframed within our setting as adaptive teaching—is central to providing equitable access to learning for all pupils. Our approach is rooted in knowing the learner and understanding that pupils may require different levels and types of support to engage meaningfully with the curriculum and make progress toward their personalised learning goals. Adaptive teaching strategies include varying levels of scaffolding, pacing, and sensory regulation; using alternative forms of communication; modifying physical environments; and tailoring task design to match individual cognitive and emotional profiles.

Teachers and support staff work collaboratively to anticipate barriers and adapt teaching in response to ongoing formative assessment and pupil engagement. In practice, this may look like adjusting questioning styles, offering visual or concrete representations, building in movement or sensory breaks, or chunking learning into manageable steps. Differentiation is not limited to ability, but also considers EHCP outcomes, communication needs, mental health considerations, and preparation for adulthood. Through adaptive teaching, we ensure that every pupil is enabled to participate, experience success, and achieve their potential—whatever their starting point.

11. Home Learning

Home learning in a SEND context plays a unique and flexible role in reinforcing skills, supporting generalisation, and strengthening partnerships between school and home. It is not about quantity, but about quality, relevance, and accessibility, with the central aim of reinforcing learning in meaningful ways that complement each pupil's needs, routine, and family context.

We recognise that many of our pupils face significant cognitive, sensory, or physical challenges, and that families may require personalised approaches to engagement. As such, home learning is:

- Optional, adaptable, and always rooted in communication and collaboration with families.
- Designed to extend learning beyond the classroom in functional, enjoyable, and low-pressure ways.
- Linked to personalised learning goals, including EHCP outcomes, preparation for adulthood, and communication targets.

Examples of appropriate home learning may include:

- Practising core skills through every day routines (e.g., cooking, shopping, travel training)
- Listening to or reading familiar sensory stories together
- Watching videos created by class staff to rehearse signs, symbols, or sequences
- Taking part in simple art, movement, or music activities

Class teams work with families to suggest activities or resources that match the pupil's developmental stage, sensory profile, and interests. In some cases, individualised home learning packs or video-based tasks may be provided to support communication or regulation strategies used in school.

We are committed to ensuring that home learning is supportive, not stressful, and that it builds strong bridges between home and school. Feedback from families is welcomed and helps shape what is offered and how success is celebrated.

12. Marking and Feedback

Marking and feedback serve as tools for reinforcing learning, celebrating achievement, and informing next steps, rather than simply assessing right or wrong answers. Our approach is guided by the principles of being meaningful, manageable, and motivating, with an emphasis on the individual learner journey.

Principles of Effective Feedback:

- Feedback is always personalised and reflective of each pupil's communication style, cognitive profile, and learning targets.
- It focuses on the process of learning, not just the outcome—recognising effort, engagement, independence, and skill development.
- It is primarily verbal, visual, or gestural (e.g., signing, symbols, modelling, praise) and delivered in the moment, where it has the most impact.
- For learners who can engage with it, simple written comments or symbols may be used to reinforce success or guide improvement.
- Feedback supports self-esteem and motivation while encouraging independence and the ability to reflect and respond at an appropriate level.

Use of Evidence for Learning:

Feedback is often recorded through tagged evidence on Evidence for Learning (EfL), allowing staff to:

- Link feedback to EHCP outcomes, PLGs, or curriculum areas
- Show progress over time through visual or video documentation

Staff-to-Staff Feedback and Professional Dialogue:

Marking and feedback may also take the form of professional dialogue within class teams or between teachers and support staff. This includes:

- Post-lesson reviews and next-step planning
- Joint moderation of evidence to ensure consistent expectations
- Sharing strategies that worked well or need adjusting

Parent/Carer Input

Parents and Carers can contribute to the assessment process through annual reviews, regular open conversations with teachers, and Parents Evening events.

13. Monitoring and Evaluation of Teaching and Learning

Monitoring and evaluating teaching and learning at our school is a continuous, collaborative multi-layered process designed to secure high-quality practice, promote consistency, and drive ongoing improvements. Monitoring activities are carefully planned to reflect the diversity of learners and to inform strategic decisions while celebrating effective practice.

Key Strategies for Monitoring and Evaluation

We use a broad range of interconnected methods to ensure a robust, fair, and developmental approach:

Learning Walks

Conducted by senior and middle leaders to observe real-time classroom culture, learner engagement, staff deployment, and the learning environment. These are thematic and pathway-sensitive, used to gather insights and share best practice.

Lesson Observations

Carried out as part of coaching cycles or quality assurance processes. Observations may focus on curriculum delivery, differentiation, use of personalised learning goals, or implementation of school-wide approaches (e.g., communication strategies, behaviour support). Feedback is developmental and used to inform professional learning.

Moderation (Reviewing Marking and Feedback)

Termly review of books, portfolios, and *Evidence for Learning* uploads. Focuses on consistency of marking, clarity of learning objectives, quality of feedback, use of support codes, and evidence of progression. Findings feed into moderation and staff training.

• Planning Scrutinies

Curriculum and pathway leaders regularly review short-, medium-, and long-term planning to ensure alignment with EHCP outcomes, pathway intent, and school values. Scrutinies support curriculum mapping and consistency across teams.

Data Drops

Collected termly across key indicators (e.g., attainment, engagement, EHCP progress, PLGs). Data is analysed by pathway, class, and individual to identify trends, inform strategic decisions, and report to governors and families.

• Termly Pupil Progress Meetings

Formal meetings between teaching staff and senior leaders to evaluate progress using assessment frameworks (e.g., MAPP, Engagement Model, SCERTS). These meetings triangulate observations, evidence, and quantitative progress data, and inform targeted planning and support.

• School Council Feedback

Pupil voice is gathered through structured council meetings using adapted methods such as symbols, talking mats, video responses or communication

aids. Learners give feedback on curriculum, enrichment, and wellbeing, which informs policy and planning.

Parent/Carer and Multi-Agency Input

Feedback is collected during reviews, home-school communication, and through informal contact and surveys. Staff also consult with therapists, social workers, and health professionals to evaluate learner experiences holistically.

14. Outcomes and Impact

The insights from these monitoring activities are:

- Summarised in leadership reports and shared with governors, staff, and stakeholders.
- Used to identify and respond to training needs and celebrate effective practice.
- Reviewed in SLT meetings and incorporated into the school's Self-Evaluation Framework and School Development Plan.
- Used to inform moderation, curriculum development, and personalised next steps for learners.

15. Review

This Teaching and Learning Policy is reviewed annually as part of the school's strategic cycle to ensure it remains relevant, evidence-informed, and responsive to the evolving needs of our pupils and staff. The review process is led by the Senior Leadership Team, in consultation with curriculum and pathway leads, teaching and support staff, and where appropriate, pupil and parent voice. Monitoring data, including learning walks, lesson observations, progress outcomes, and stakeholder feedback, directly inform revisions. Updates reflect any changes in statutory guidance, curriculum development, or pedagogical approaches, particularly those relevant to SEND, personalised learning, and Preparation for Adulthood. Once reviewed, the updated policy is shared with staff, governors, and families, and used to shape professional development, planning, and practice across the school.
