The Palmer Academy – Science

Year: 1 | Term: Autumn 1 | Topic: Animals including Humans

Important Facts:

We have **5 senses** that help us make sense of the world. They are:

body part	sense
eyes	see ears	hear
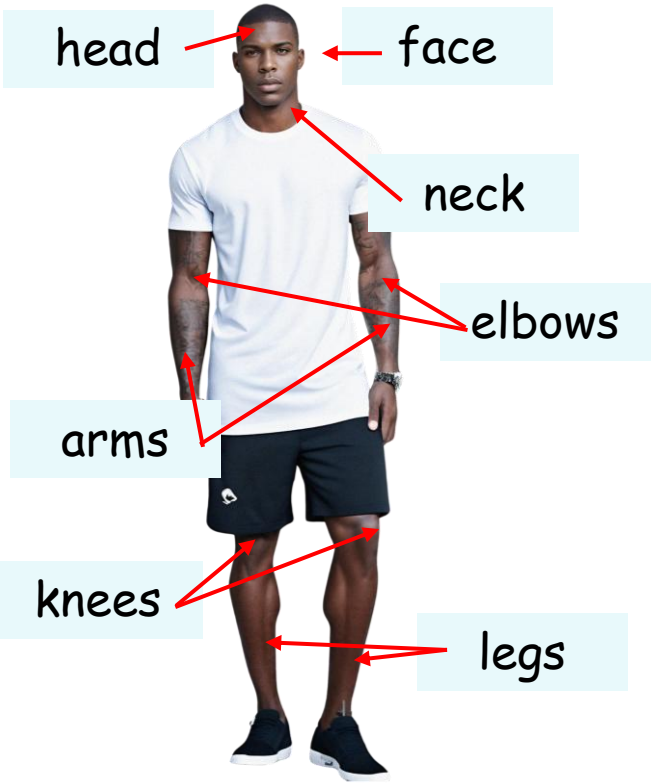
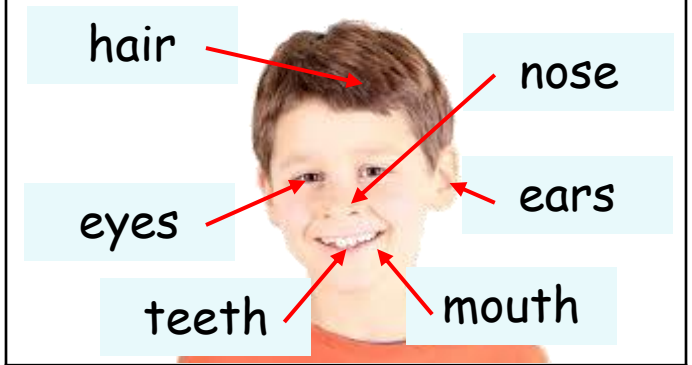
nose 	smell
tongue 	taste
hands	touch

Working Scientifically:

- Label pictures
- Sort things into groups
- Find out answers
- Use what I can see and find out

Key concepts / diagrams:

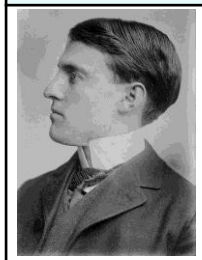




Vocabulary:

human body	made up of parts like the head, arms and legs
senses	the ways our body helps us find out about the world around us
touch	lets us feel things with our fingers
see	lets us notice things using our eyes
smell	lets us notice smells using our nose
taste	lets us tell if something is sweet, salty, sour or bitter
hear	lets us notice sounds using our ears
tongue	lets us taste food
fingers	the small parts at the end of our hands
skin	covers our body
sight	lets us see

Key Scientists:



Miller Hutchinson was an inventor who wanted to help people hear better. He created one of the first electric hearing aids.
