

Three Counties Academy Trust

# Allergen and Anaphylaxis Policy #C11

Last updated: 31 August 2022

Review Date: 31 August 2023

## **Contents:**

Statement of intent

1. Legal framework
2. Definitions
3. Roles and responsibilities
4. Food allergies
5. Food allergen labelling
6. Animal allergies
7. Seasonal allergies
8. Adrenaline auto-injectors (AAIs)
9. Access to spare AAIs
10. School trips
11. Medical attention and required support
12. Staff training
13. Mild to moderate allergic reactions
14. Managing anaphylaxis
15. Monitoring and review

Appendix

- a. Allergy declaration form
- b. Nut-Aware Parental Letter
- c. SSAF

## **Statement of intent**

Three Counties Academy Trust strives to ensure the safety and wellbeing of all members of the Trust community. For this reason, this policy is to be adhered to by all staff members, parents, and pupils, with the intention of minimising the risk of anaphylaxis occurring whilst on Trust premises.

In order to effectively implement this policy and ensure the necessary control measures are in place, parents are responsible for working alongside the Trust in identifying allergens and potential risks, in order to ensure the health and safety of their children.

The Trust does not guarantee a completely allergen-free environment; however, this policy will be utilised to minimise the risk of exposure to allergens, encourage self-responsibility, and plan for an effective response to possible emergencies.

## 1. Legal framework

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Children and Families Act 2014
- The Human Medicines (Amendment) Regulations 2017
- The Food Information (Amendment) (England) Regulations 2019 (Natasha's Law)
- Department of Health (2017) 'Guidance on the use of adrenaline auto-injectors in schools'
- DfE (2015) 'Supporting pupils at school with medical conditions'
- DfE (2022) 'Allergy guidance for schools'

This policy will be implemented in conjunction with the following school policies and documents:

- Health and Safety Policy
- Whole-School Food Policy
- Administering Medication Policy
- Supporting Pupils with Medical Conditions Policy
- Animals in School Policy
- Educational Visits and School Trips Policy
- Allergen and Anaphylaxis Risk Assessment

## 2. Definitions

For the purpose of this policy:

**Allergy** – is a condition in which the body has an exaggerated response to a substance. This is also known as hypersensitivity.

**Allergen** – is a normally harmless substance that triggers an allergic reaction for a susceptible person.

**Allergic reaction** – is the body's reaction to an allergen and can be identified by, but not limited to, the following symptoms:

- Hives
- Generalised flushing of the skin
- Itching and tingling of the skin
- Tingling in and around the mouth
- Burning sensation in the mouth
- Swelling of the throat, mouth, or face
- Feeling wheezy
- Abdominal pain
- Rising anxiety
- Nausea and vomiting
- Alterations in heart rate
- Feeling of weakness

**Anaphylaxis** – is also referred to as anaphylactic shock, which is a sudden, severe, and potentially life-threatening allergic reaction. This kind of reaction may include the following symptoms:

- Persistent cough
- Throat tightness
- Change in voice, e.g., hoarse, or croaky sounds
- Wheeze (whistling noise due to a narrowed airway)
- Difficulty swallowing/speaking
- Swollen tongue
- Difficult or noisy breathing
- Chest tightness
- Feeling dizzy or faint
- Suddenly becoming sleepy, unconscious, or collapsing
- For infants and younger pupils, becoming pale or floppy

### **3. Roles and responsibilities**

The Trust Board is responsible for:

- Ensuring that policies, plans, and procedures are in place to support pupils with allergies and who are at risk of anaphylaxis and that these arrangements are sufficient to meet statutory responsibilities and minimise risks
- Ensuring that the Trust approach to allergies and anaphylaxis focusses on, and accounts for, the needs of each individual pupil
- Ensuring that staff are properly trained to provide the support that pupils need, and that they receive allergy and anaphylaxis training at least annually
- Monitoring the effectiveness of this policy and reviewing it on an annual basis, and after any incident where a pupil experiences an allergic reaction

The Executive Headteacher is responsible for:

- The development, implementation and monitoring of this policy and related policies
- Ensuring that parents are informed of their responsibilities in relation to their child's allergies
- Ensuring that all relevant risk assessments, e.g., to do with food preparation, have been carried out and controls to mitigate risks are implemented
- Ensuring that all designated first aiders are trained in the use of adrenaline auto-injectors (AAIs) and the management of anaphylaxis
- Ensuring that all staff members are provided with information regarding allergic reactions and anaphylaxis, including the necessary precautions and how to respond
- Ensuring that catering staff are aware of pupils' allergies and act in accordance with the Trust's policies regarding food and hygiene, including this policy

The school nurse is responsible for:

- Ensuring that there are effective processes in place for medical information to be regularly updated and disseminated to relevant staff members, including supply and temporary staff

- Seeking up-to-date medical information about each pupil via a medical form sent to parents on an annual basis, including information regarding any allergies.
- Contacting parents for required medical documentation regarding a pupil's allergy

All staff members are responsible for:

- Attending relevant training regarding allergens and anaphylaxis
- Being familiar with and implementing pupils' individual healthcare plans (IHPs) as appropriate
- Responding immediately and appropriately in the event of a medical emergency
- Reinforcing effective hygiene practices, including those in relation to the management of food
- Monitoring all food supplied to pupils by both the Trust and parents
- Ensuring that pupils do not share food and drink in order to prevent accidental contact with an allergen

The Catering Manager (Black Pepper School Lunches) is responsible for:

- Monitoring the food allergen log and allergen tracking information for completeness
- Reporting any non-conforming food labelling to the supplier, where necessary
- Ensuring the practices of kitchen staff comply with food allergen labelling laws and that training is regularly reviewed and updated
- Recording incidents of non-conformity, either in allergen labelling, use of ingredients or safe staff practice, in an allergen incident log
- Acting on entries to the allergen incident log and ensuring the risks of recurrence are minimised

Catering staff are responsible for:

- Ensuring they are fully aware of the rules surrounding allergens, the processes for food preparation in line with this policy, and the processes for identifying pupils with specific dietary requirements
- Ensuring they are fully aware of whether each item of food served contains any of the main 14 allergens, as is a legal obligation, and making sure this information is readily available for those who may need it
- Ensuring that the required food labelling is complete, correct, clearly legible, and is either printed on the food packaging or attached via a secure label
- Reporting to the Catering Manager if food labelling fails to comply with the law

All parents are responsible for:

- Notifying the Trust of their child's allergens, the nature of the allergic reaction, what medication to administer, specified control measures and what can be done to prevent the occurrence of an allergic reaction
- Keeping the Trust up to date with their child's medical information
- Providing written consent for the use of a spare AAI
- Providing the Trust with written medical documentation, including instructions for administering medication as directed by the child's doctor

- Raising any concerns they may have about the management of their child's allergies with the classroom teacher or appropriate senior leader

All pupils are responsible for:

- Ensuring that they do not exchange food with other pupils
- Avoiding food which they know they are allergic to, as well as any food with unknown ingredients
- Notifying a member of staff immediately in the event they believe they are having an allergic reaction, even if the cause is unknown, or have come into contact with an allergen

#### **4. Food allergies**

Parents will provide the school with a written list of any foods that their child may have an adverse reaction to, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

Information regarding all pupils' food allergies will be collated, indicating whether they consume a school dinner or a packed lunch, and this will be passed on to Black Pepper School Lunches.

When making changes to menus or substituting food products, the Trust will ensure that pupils' special dietary needs continue to be met by:

- Checking any product changes with all food suppliers
- Asking caterers to read labels and product information before use
- Using the Food Standards Agency's allergen matrix to list the ingredients in all meals
- Ensuring allergen ingredients remain identifiable

Black Pepper School Lunches and Trust appointed Lunchtime Assistants will have a full list of allergens and will avoid using them within the menu where possible.

Where meals include allergens or traces of allergens, staff will use clear and fully visible labels, in line with this policy, to denote the allergens of which consumers should be aware.

The Trust in collaboration with Black Pepper School Lunches will ensure that there are always dairy and gluten-free options available for pupils with allergies and intolerances.

To ensure that Black Pepper staff can appropriately identify pupils with dietary needs, the Executive Leader for Safeguarding and Inclusion will communicate such needs to the head of catering for Black Pepper School Lunches that denote their food allergy; a key explaining the colours will be displayed on the wall in the serving area so that it is visible to all kitchen staff. This will be updated each time a change occurs and reviewed at least once per term in full.

All food tables will be disinfected before and after being used.

Anti-bacterial wipes and cleaning fluid will be used.

Boards and knives used for fruit and vegetables will be a different colour to the rest of the kitchen knives in order to remind kitchen staff to keep them separate.

Any sponges or cloths that are used for cleaning will be colour-coded according to the areas that they are used to clean, e.g., a red sponge for an area which has been used for raw meat, to prevent cross-contamination.

There will be a set of kitchen utensils that are only for use with the food and drink of the pupils at risk.

There will also be a set of kitchen utensils with a designated colour. These utensils will be used only for food items that contain bread and wheat related products.

Food items containing bread and wheat will be stored separately.

Black Pepper School Lunches are responsible for ensuring that the Trust's policies are adhered to at all times, including those in relation to the preparation of food, taking into account any allergens.

Learning activities which involve the use of food, such as food technology lessons, will be planned in accordance with pupils' IHPs, taking into account any known allergies of the pupils involved.

## **5. Food allergen labelling**

The Trust through Black Pepper School Lunches will adhere to allergen labelling rules for pre-packed food goods, in line with the Food Information (Amendment) (England) Regulations 2019, also known as Natasha's Law.

The Trust will ensure that all food is labelled accurately, that food is never labelled as being 'free from' an ingredient unless staff are certain that there are no traces of that ingredient in the product, and that all labelling is checked before being offered for consumption.

The relevant Black Pepper staff will be trained prior to storing, handling, preparing, cooking and/or serving food to ensure they are aware of their legal obligations. Training will be reviewed on an annual basis, or as soon as there are any revisions to related guidance or legislation.

### **Food labelling**

Food goods classed as 'pre-packed for direct sale' (PPDS) will clearly display the following information on the packaging:

- The name of the food
- The full ingredients list, with ingredients that are allergens emphasised, e.g., in bold, italics, or a different colour

The Trust via Black Pepper School Lunches will ensure that allergen traceability information is readily available. Allergens will be tracked using the following method:

- Allergen information will be obtained from the supplier and recorded, upon delivery, in a food allergen log stored in the kitchen
- Allergen tracking will continue throughout the Trust's handling of allergen-containing food goods, including during storage, preparation, handling, cooking, and serving

- The food allergen log will be monitored for completeness on a weekly basis by the Catering Manager for Black Pepper School Lunches and stress tested at least termly by Trust Executive Staff
- Incidents of incorrect practices and incorrect and/or incomplete packaging will be recorded in an incident log and managed by the Catering Manager

### **Declared allergens**

The following allergens will be declared and listed on all PPDS foods in a clearly legible format:

- Cereals containing gluten and wheat, e.g., spelt, rye and barley
- Crustaceans, e.g., crabs, prawns, lobsters
- Nuts, including almonds, hazelnuts, walnuts, cashews, pecan nuts, Brazil nuts and pistachio nuts
- Celery
- Eggs
- Fish
- Peanuts
- Soybeans
- Milk
- Mustard
- Sesame seeds
- Sulphur dioxide and sulphites at concentrations of more than 10mg/kg or 10mg/L in terms of total sulphur dioxide
- Lupin
- Molluscs, e.g., mussels, oysters, squid, snails

The above list will apply to foods prepared on site, e.g., sandwiches, salad pots and cakes, that have been pre-packed prior to them being offered for consumption.

Kitchen staff will be vigilant when ensuring that all PPDS foods have the correct labelling in a clearly legible format, and that this is either printed on the packaging itself or on an attached label. Food goods with incorrect or incomplete labelling will be removed from the product line, disposed of safely and no longer offered for consumption.

Any abnormalities in labelling will be reported to the Catering Manager immediately, who will then contact the relevant supplier where necessary.

The Catering Manager will be responsible for monitoring food ingredients, packaging and labelling on a weekly basis and will contact the supplier immediately in the event of any anomalies.

### **Changes to ingredients and food packaging**

The Trust will ensure that communication with suppliers is robust and any changes to ingredients and/or food packaging are clearly communicated to kitchen staff and other relevant members of staff.

Following any changes to ingredients and/or food packaging, all associated documentation will be reviewed and updated as soon as possible.

## **6. Animal allergies**

The Animals in School Policy will be adhered to at all times.

Pupils with known allergies to specific animals will have restricted access to those that may trigger a response.

In the event of an animal on the Trust estate, staff members will be made aware of any pupils to whom this may pose a risk and will be responsible for ensuring that the pupil does not come into contact with the specified allergen.

The Trust will ensure that any pupil or staff member who comes into contact with the animal washes their hands thoroughly to minimise the risk of the allergen spreading.

A supply of antihistamine tablets will be kept in the school office in case of an allergic reaction.

## **7. Seasonal allergies**

The term 'seasonal allergies' refers to common outdoor allergies, including hay fever and insect bites.

Precautions regarding the prevention of seasonal allergies include ensuring that grass within the school premises is not mown whilst pupils are outside.

Pupils with severe seasonal allergies will be provided with an indoor supervised space to spend their break and lunchtimes in, avoiding contact with outside allergens.

Staff members will monitor pollen counts, making a professional judgement as to whether the pupil should stay indoors.

Pupils will be encouraged to wash their hands after playing outside.

Pupils with known seasonal allergies are encouraged to bring an additional set of clothing to school to change in to after playing outside, with the aim of reducing contact with outdoor allergens, such as pollen.

Staff members will be diligent in the management of wasp, bee, and ant nests on school grounds and in the school's nearby proximity, reporting any concerns to the site manager.

The site manager is responsible for ensuring the appropriate removal of wasp, bee, and ant nests on and around the school premises.

Where a pupil with a known allergy is stung or bitten by an insect, medical attention will be given immediately.

## **8. Adrenaline auto-injectors (AAIs)**

Pupils who suffer from severe allergic reactions may be prescribed an AAI for use in the event of an emergency.

Under The Human Medicines (Amendment) Regulations 2017 the Trust is able to purchase AAI devices without a prescription, for emergency use on pupils who are at risk of anaphylaxis, but whose device is not available or is not working.

The Trust will purchase spare AAIs from a pharmaceutical supplier, such as the local pharmacy.

The Trust will submit a request, signed by the Chief Finance Office and/or Executive Headteacher, to the pharmaceutical supplier when purchasing AAIs, which outlines:

- The name of the school
- The purposes for which the product is required
- The total quantity required

The Chief Finance Office and/or Executive Headteacher, in conjunction with the school nurse, will decide which brands of AAI to purchase.

Where possible, the Trust will hold one brand of AAI to avoid confusion with administration and training; however, subject to the brands pupils are prescribed, the Trust may decide to purchase multiple brands.

The Trust will purchase AAIs in accordance with age-based criteria, relevant to the age of pupils at risk of anaphylaxis, to ensure the correct dosage requirements are adhered to. These are as follows:

- For pupils under age 6: 0.15 milligrams of adrenaline
- For pupils aged 6-12: 0.3 milligrams of adrenaline
- For pupil aged 12+: 0.3 or 0.5 milligrams of adrenaline

Spare AAIs are stored as part of an emergency anaphylaxis kit, which includes the following:

- One or more AAIs
- Instructions on how to use the device(s)
- Instructions on the storage of the device(s)
- Manufacturer's information
- A checklist of injectors, identified by the batch number and expiry date, alongside records of monthly checks
- A note of the arrangements for replacing the injectors
- A list of pupils to whom the AAI can be administered
- An administration record

In respect of our secondary schools, pupils who have prescribed AAI devices are able to keep their device in their possession.

In respect of our primary schools, pupils who have prescribed AAI devices, and are over the age of seven, are able to keep their device in their possession. For pupils under the age of seven who have prescribed AAI devices, these are stored in a suitably safe and easily accessible location.

Spare AAI devices are not located more than five minutes away from where they may be required. The emergency anaphylaxis kit(s) can be found at the location named in the SSFA appendix of this document.

All staff have access to AAI devices, but these are out of reach and inaccessible to pupils – AAI devices are not locked away where access is restricted.

All spare AAI devices will be clearly labelled to avoid confusion with any device prescribed to a named pupil.

In line with manufacturer's guidelines, all AAI devices are stored at room temperature in line with manufacturer's guidelines, protected from direct sunlight and extreme temperature.

The staff members responsible for maintaining the emergency anaphylaxis kit(s) are named in the SSFA appendix of this document.

Those staff members conduct a monthly check of the emergency anaphylaxis kit(s) to ensure that:

- Spare AAI devices are present and have not expired
- Replacement AAIs are obtained when expiry dates are approaching

The staff member is responsible for overseeing the protocol for the use of spare AAIs, its monitoring and implementation, and for maintaining the Register of AAIs is noted in the SSFA appendix of this document.

Any used or expired AAIs are disposed of after use in accordance with manufacturer's instructions.

Used AAIs may also be given to paramedics upon arrival, in the event of a severe allergic reaction, in accordance with this policy.

A sharps bin is utilised where used or expired AAIs are disposed of on the school premises.

Where any AAIs are used, the following information will be recorded on the AAI Record:

- Where and when the reaction took place
- How much medication was given and by whom

## **9. Access to spare AAIs**

A spare AAI can be administered as a substitute for a pupil's own prescribed AAI, if this cannot be administered correctly, without delay.

Spare AAIs are only accessible to pupils for whom medical authorisation and written parental consent has been provided – this includes pupils at risk of anaphylaxis who have been provided with a medical plan confirming their risk, but who have not been prescribed an AAI.

Consent will be obtained as part of the introduction or development of a pupil's IHP.

If consent has been given to administer a spare AAI to a pupil, this will be recorded in their IHP.

The Trust uses a register of pupils (Register of AAIs) to whom spare AAIs can be administered – this includes the following:

- Name of pupil
- Class
- Known allergens
- Risk factors for anaphylaxis
- Whether medical authorisation has been received
- Whether written parental consent has been received
- Dosage requirements

Parents are required to provide consent on an annual basis to ensure the register remains up to date.

Parents can withdraw their consent at any time. To do so, they must write to the Executive Headteacher and the Executive Leader for Safeguarding and Inclusion.

The Executive Leader for Safeguarding and Inclusion checks the register is up to date on an annual basis.

The Executive Leader for Safeguarding and Inclusion will also update the register relevant to any changes in consent or a pupil's requirements.

Copies of the register are held in Reception, which are accessible to all staff members.

## **10. School trips**

The Head of School will ensure a risk assessment is conducted for each school trip to address pupils with known allergies attending. All activities on the school trip will be risk assessed to see if they pose a threat to any pupils with allergies and alternative activities will be planned where necessary to ensure the pupils are included.

The school will speak to the parents of pupils with allergies where appropriate to ensure their co-operation with any special arrangements required for the trip.

A designated adult will be available to support the pupil at all times during a school trip.

If the pupil has been prescribed an AAI, at least one adult trained in administering the device will attend the trip. The pupil's medication will be taken on the trip and stored securely – if the pupil does not bring their medication, they will not be allowed to attend the trip unless provision for replacement medication can be put in place.

A member of staff is assigned responsibility for ensuring that the pupil's medication is carried at all times throughout the trip.

Two AAIs will be taken on the trip and will be easily accessible at all times.

Where the venue or site being visited cannot assure appropriate food can be provided to cater for pupils' allergies, the pupil will take their own food, or the school will provide a suitable packed lunch.

## **11. Medical attention and required support**

Once a pupil's allergies have been identified, a meeting will be set up between the pupil's parents, the Executive Leader for Safeguarding and Inclusion, the relevant Head of School, the school nurse, and any other relevant staff members, in which the pupil's allergies will be discussed and a plan of appropriate action/support will be developed.

All medical attention, including that in relation to administering medication, will be conducted in accordance with the Administering Medication Policy and the Supporting Pupils with Medical Conditions Policy.

Parents will provide the school with any necessary medication, ensuring that this is clearly labelled with the pupil's name, class, expiration date and instructions for administering it.

Pupils will not be able to attend school or educational visits without any life-saving medication that they may have, such as AAIs.

All members of staff involved with a pupil with a known allergy are aware of the location of emergency medication and the necessary action to take in the event of an allergic reaction.

Any specified support which the pupil may require is outlined in their IHP.

All staff members providing support to a pupil with a known medical condition, including those in relation to allergens, will be familiar with the pupil's IHP.

The Executive Leader for Safeguarding and Inclusion is responsible for working alongside relevant staff members and parents in order to develop IHPs for pupils with allergies, ensuring that any necessary support is provided, and the required documentation is completed, including risk assessments being undertaken.

The Executive Leader for Safeguarding and Inclusion has overall responsibility for ensuring that IHPs are implemented, monitored, and communicated to the relevant members of the school community.

## **12. Staff training**

Designated staff members will be trained in how to administer an AAI, and the sequence of events to follow when doing so.

In accordance with the Supporting Pupils with Medical Conditions Policy, staff members will receive appropriate training and support relevant to their level of responsibility, in order to assist pupils with managing their allergies.

The Trust will arrange specialist training on an annual basis where a pupil in the school has been diagnosed as being at risk of anaphylaxis.

The relevant staff, e.g., kitchen staff, are required to be trained on how to identify and monitor the correct food labelling and how to manage the removal and disposal of PPDS foods that do not meet the requirements set out in Natasha's Law by their employer Black Pepper School Lunches and to update the Executive Leader for Safeguarding and Inclusion as to the frequency and completion of their training.

The relevant members of staff will be trained on how to consistently and accurately trace allergen-containing food routes through the Trust, from supplier delivery to consumption.

Designated staff members will be taught to:

- Recognise the range of signs and symptoms of severe allergic reactions
- Respond appropriately to a request for help from another member of staff
- Recognise when emergency action is necessary
- Administer AAIs according to the manufacturer's instructions
- Make appropriate records of allergic reactions

All staff members will:

- Be trained to recognise the range of signs and symptoms of an allergic reaction
- Understand how quickly anaphylaxis can progress to a life-threatening reaction, and that anaphylaxis can occur with prior mild to moderate symptoms
- Understand that AAIs should be administered without delay as soon as anaphylaxis occurs
- Understand how to check if a pupil is on the Register of AAIs
- Understand how to access AAIs
- Understand who the designated members of staff are, and how to access their help
- Understand that it may be necessary for staff members other than designated staff members to administer AAIs, e.g., in the event of a delay in response from the designated staff members, or a life-threatening situation
- Be aware of how to administer an AAI should it be necessary
- Be aware of the provisions of this policy

### **13. Mild to moderate allergic reaction**

Mild to moderate symptoms of an allergic reaction include the following:

- Swollen lips, face, or eyes
- Itchy/tingling mouth
- Hives or itchy skin rash
- Abdominal pain or vomiting
- Sudden change in behaviour

If any of the above symptoms occur in a pupil, the nearest adult will stay with the pupil and call for help from the designated staff members able to administer AAIs.

The pupil's prescribed AAI will be administered by the designated staff member. Spare AAIs will only be administered where appropriate consent has been received.

Where there is any delay in contacting designated staff members, or where delay could cause a fatality, the nearest staff member will administer the AAI.

A copy of the Register of AAIs will be held in Reception for easy access in the event of an allergic reaction.

If necessary, other staff members may assist the designated staff members with administering AAI's.

The pupil's parents will be contacted immediately if a pupil suffers a mild to moderate allergic reaction, and if an AAI has been administered.

In the event that a pupil without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice as to whether an AAI should be administered. An AAI will not be administered in these situations without contacting the emergency services.

For mild to moderate allergy symptoms, the AAI will usually be sufficient for the reaction; however, the pupil will be monitored closely to ensure the reaction does not progress into anaphylaxis.

Should the reaction progress into anaphylaxis, the Trust will act in accordance with this policy.

The school nurse or appropriate staff member will refer any pupil who has been administered an AAI to the hospital for further monitoring.

The Head of School will ensure that any designated staff member required to administer an AAI has appropriate cover in place, e.g., if they were teaching a class at the time of the reaction.

## **14. Managing anaphylaxis**

In the event of anaphylaxis, the nearest adult will lay the pupil flat on the floor and try to ensure the pupil suffering an allergic reaction remains as still as possible; if the pupil is feeling weak, dizzy, appears pale and is sweating their legs will be raised. A designated staff member will be called for help and the emergency services contacted immediately. The designated staff member will administer an AAI to the pupil. Spare AAI's will only be administered if appropriate consent has been received.

Where there is any delay in contacting designated staff members, the nearest staff member will administer the AAI.

If necessary, other staff members may assist the designated staff members with administering AAI's.

A member of staff will stay with the pupil until the emergency services arrive – the pupil will remain lying flat and still. If the pupil's condition deteriorates after initially contacting the emergency services, a second call will be made to ensure an ambulance has been dispatched.

The Executive Headteacher and the Head of School will be contacted immediately, as well as a suitably trained individual, such as a first aider.

If the pupil stops breathing, a suitably trained member of staff will administer CPR.

If there is no improvement after five minutes, a further dose of adrenaline will be administered using another AAI, if available.

In the event that a pupil without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice as to whether an AAI should be administered. An AAI will not be administered in these situations without contacting the emergency services.

A designated staff member will contact the pupil's parents as soon as is possible.

Upon arrival of the emergency services, the following information will be provided:

- Any known allergens the pupil has
- The possible causes of the reaction, e.g., certain food
- The time the AAI was administered – including the time of the second dose, if this was administered

Any used AAIs will be given to paramedics.

Staff members will ensure that the pupil is given plenty of space, moving other pupils to a different room where necessary.

Staff members will remain calm, ensuring that the pupil feels comfortable and is appropriately supported.

A member of staff will accompany the pupil to hospital in the absence of their parents.

If a pupil is taken to hospital by car, two members of staff will accompany them.

Following the occurrence of an allergic reaction, the Executive Headteacher, in conjunction with the Trust Senior Leadership Team and school nurse, will review the adequacy of the school's response and will consider the need for any additional support, training or other corrective action.

## **15. Monitoring and review**

The Executive Headteacher and Trust Senior Leadership Team is responsible for reviewing this policy annually.

The effectiveness of this policy will be monitored and evaluated by all members of staff. Any concerns will be reported to the Executive Headteacher immediately.

Following each occurrence of an allergic reaction, this policy, and pupils' IHPs will be updated and amended as necessary.

### Spare AAIs

I understand that the school may purchase spare AAIs to be used in the event of an emergency allergic reaction. I also understand that, in the event of my child's prescribed AAI not working, it may be necessary for the school to administer a spare AAI, but this is only possible with medical authorisation and my written consent.

In light of the above, I provide consent for the school to administer a spare AAI to my child.

## RE: Banning nut-based products from school

Dear Parent,

As you may already be aware, we now have a pupil that will be attending our school, who has a severe **peanut** allergy. The pupil's anaphylaxis (allergic reaction) can occur as a result of **digestion, inhalation, or any other contact** with nut-based products. For their safety, all nut-based products have been banned from the school premises where the school is responsible for food on school site. As part of our commitment to being a nut-aware school, we are asking that as far as is reasonably possible, parents and carers observe the following requests and ensure their children are clear on what is and what is not permissible on school site.

From this point forward we kindly request, please do not send your child into school with any nut-based product for a snack or packed lunch – this includes products that may contain traces of nuts. Potential allergens could include the following:

- Spreads, e.g., chocolate spread
- Cereal bars
- Some types of biscuit containing nuts
- Condiments, e.g., satay sauce
- Cakes containing nuts
- Some snack pots containing nuts

It is important that you check the labelling of food products before sending your child in to school with them – it is not always apparent that products contain nuts or traces of nuts.

We also ask that, if your child consumes any nut-based product before school, they wash their hands thoroughly and rinse their mouth before entering the school grounds. We understand that these measures may seem extreme; however, we want to ensure the health and safety of all our pupils, and the pupil in question's allergy is so severe that even the slightest of contact with nuts would cause a severe and potentially life-threatening reaction.

Further to these provisions, the school will no longer be serving dinners that contain nut-based products – this includes products that are labelled as 'may contain traces of nuts'. We will also ensure all food tables are disinfected before and after being used with antibacterial wipes and

cleaning fluid. We have worked in close collaboration with Black pepper School Lunches to minimise the risk of accidental contamination.

To further assist in this matter, we have invested in spare adrenaline auto-injectors (AAI) so that we are prepared in the event of the pupil's AAI failing or if they are not in possession of it at the time of the anaphylactic shock.

Due to the severity of the pupil's allergy, if any pupil is found with a nut-based product after this letter has been distributed, the school will have to confiscate and dispose of the item immediately. At this point we will ensure the child has a suitable replacement so that they are able to ensure they eat a meal, and we will call home to discuss forward preventative measures.

We appreciate that this is a big change for all and apologise for any inconvenience this may cause. Due to the severity of the situation, please can you sign the return form below and send it to the school office no later than **date**.

Thank you in advance for your cooperation with this matter.

Kind regards,

**Name**

Head of School

✂.....

I understand the terms outlined in this letter and I agree as far as reasonably possible to not send my child into school with nut-based products in their lunch or snacks. I understand that, if my child brings nut-based products into school these will be replaced and disposed of and that the school will contact me to discuss ways to avoid any further instances.
