Pupil premium strategy statement 2024-2025 Part of our 3 year strategy (2024-2027)

This statement details our school's use of pupil premium (for the 2024 to 2025 academic year) funding to help improve the attainment of our disadvantaged pupils.

It outlines our pupil premium strategy, how we intend to spend the funding in this academic year and the effect that last year's spending of pupil premium had within our school.

School overview

Detail	Data
School name	Thrunscoe Primary and Nursery Academy
Number of pupils in school	276
Proportion (%) of pupil premium eligible pupils	41.7%
Academic year/years that our current pupil premium strategy plan covers (3 year plans are recommended)	2024-2027
Date this statement was published	October 2024
Date on which it will be reviewed	July 2025
Statement authorised by	Mr S Bate
Pupil premium lead	Mr S Bate
Governor / Trustee lead	Mr R Beel

Funding overview

Detail	Amount
Pupil premium funding allocation this academic year	£180099
Recovery premium funding allocation this academic year	£0
Pupil premium funding carried forward from previous years (enter £0 if not applicable)	£0
Total budget for this academic year	£180099
If your school is an academy in a trust that pools this funding, state the amount available to your school this academic year	

Part A: Pupil premium strategy plan

Statement of intent

CONTEXT

Local area

- The school location deprivation indicator was in quintile 3 (average) of all schools.
- The pupil base is in quintile 5 (most deprived) of all schools in terms of deprivation.

School Contextual Data:

What are our ultimate objectives for your disadvantaged pupils?

To address inequalities between disadvantaged and non-disadvantaged pupils by accelerating progress of disadvantaged pupils in R/W/M/GPS/Phonics/GLD so that the attainment gap between TPNA disadvantaged pupils and their in-house and national non-disadvantaged counterparts is closed and that they exceed their national like for like disadvantaged counterparts.

How does our current pupil premium strategy plan work towards achieving those objectives?

In order to achieve our objectives and overcome identified barriers we will implement our PPG strategy - in conjunction with the 'Academy Development Plan' – by:

- Providing all teachers and teaching assistants with high quality CPD to ensure that pupils access effective quality first teaching;
- Ensuring ALL pupils are able to read fluently and with good understanding to enable them to access the breadth of the curriculum;
- Providing targeted academic intervention (Maths, Reading, Phonics and C&L) and support to quickly address identified gaps in learning including the use of small group work and 1:6 / 1:8 school led tutoring;
- Providing targeted social, emotional and mental health intervention to reduce its negative impact on their learning;
- Providing funding so that all pupils have access to trips, residential and other first-hand experiences that will impact positively on their learning and self-esteem;
- Providing opportunities to participate in enrichment activities including sport, music and the world of work to support self-esteem and support building aspiration

What are the key principles of our strategy plan?

- Removing barriers to learning for disadvantaged pupils so that they are able attain as well as their non-disadvantaged counterparts.
- Removing economic and social barriers that may unduly influence what they aspire to be
- Identify and track our PPG pupils to ensure support is tailored to bring about good academic progress and attainment.

Challenges

This details the key challenges to achievement that we have identified among our disadvantaged pupils.

Challenge number	Detail of challenge
1) <u>SOCIAL,</u> <u>EMOTIONAL AND</u> <u>MENTAL HEALTH</u> <u>& WELL-BEING</u>	 High levels of anxiety in pupils, attachment issues / social emotional issues caused by social distancing and long periods of self- isolation during closures or lockdown which mean pupils struggling with expectation, self-regulation etc Pupil self-esteem – having access to the correct uniform / trips etc Readiness to learn, motivation and resilience may have a detrimental impact on disadvantaged pupils' progress due to lower attendance during Covid 19 closures
<u>2)</u> <u>ATTENDANCE</u>	• TPNA ALL pupils' overall attendance is broadly in line with National ALL pupils (94.2% and 94.5% respectively) for the academic year 2023-2024. This is a 0.9% increase on overall attendance on 2022-2023.
	 TPNA SEND pupils' overall attendance places us in the TOP 30-40% of schools whereas NON-SEND pupils' attendance places us in the BOTTOM 30-40% of schools nationally.
	 TPNA FSM pupils' overall attendance places us in the TOP 30-40% of schools. Difference between FSM and Non- FSM pupils has reduced to 2.8% compared to 2022-2023 (3.4%)
	• TPNA SEND with FSM pupils' overall attendance places us in the TOP 40-50% of schools nationally whereas NON-SEND with NON-FSM are in the BOTTOM 30-40% of schools nationally.
	 Our biggest concern is NON-DISADVANTAGED pupils for PERSISTENT ABSENCE – NO SEND (Bottom 20-30% of pupils of schools nationally) NO SEND & NO FSM (BOTTOM 20-30% of schools nationally)
3) GAPS IN READING, WRITING, MATHS, GPS AND PHONICS	 Low entry levels into Nursery and Reception particularly C&L, Social, Reading and Maths Also impact of lost learning during COVID closures – current Y5 and Y6 still playing catch up.
<u>4)</u> <u>WIDER</u> <u>OPPORTUNITIES</u>	 Access to wider learning opportunities of disadvantaged pupils that supports pupil knowledge, skills and holistic development which ultimately impacts on disadvantaged child's ability to call upon life experiences thus impacting on reading and writing progress and attainment. Pupil aspiration impacts on motivation, resilience and thus progress and attainment
<u>5)</u> <u>PARENTAL</u> <u>ENGAGEMENT</u>	 Parental aspirations in relation to the importance of education and attendance; Parents' ability to support their child's learning effectively

Intended outcomes

This explains the outcomes we are aiming for **by the end of our current strategy plan (2024-2027)**, and how we will measure whether they have been achieved.

Intended outcome	Success criteria
1) SOCIAL, EMOTIONAL AND MENTAL HEALTH & WELL-BEING: Further improve the physical and mental well-being of disadvantaged pupils to further support positive learning behaviours, enjoyment, resilience and engagement thus enabling pupils to progress at an accelerated rate and thus close the gap in attainment between DISADVANTAGED AND NON- DISADVANTAGED PUPILS.	 Attendance of ALL pupil groups improves on previous year's and all groups are at least in line with their national counterparts Persistent absence of ALL pupil groups improves on previous year's and all groups are at least in line with their national counterparts Disadvantaged pupils feel safe and happy within the academy – comparable to non-disadvantaged (Pupil Surveys) Disadvantaged pupils feel they are supported SEMH within the Academy – comparable to non-disadvantaged (Pupil Surveys) Gap for Academy disadvantaged pupils attaining @ ARE or more is closed to academy non- disadvantaged pupils (KAPD – Key Assessment Point Data) Gap for Academy disadvantaged pupils attaining @ ARE or more is closed to national non- disadvantaged pupils (KAPD) Gap for Academy disadvantaged pupils attaining greater depth is closed to national non-disadvantaged pupils (KAPD) Academy disadvantaged pupils attaining @ ARE or more is closed to national non-disadvantaged pupils (KAPD) Academy disadvantaged pupils attaining @ ARE or more is closed to national non-disadvantaged pupils (KAPD) Academy disadvantaged pupils attaining @ ARE or more kexceeds National disadvantaged pupils @ ARE or more (KAPD) Academy disadvantaged pupils attaining @ ARE or more kexceeds National disadvantaged pupils @ ARE or more kexceeds National di
2) ATTENDANCE: Improve attendance of disadvantaged pupils in line with national Non-disadvantaged to ensure accelerated progress of PPG pupils can occur	 Academy disadvantaged pupils attaining @ greater depth exceeds National disadvantaged pupils @ greater depth (KAPD) Attendance of ALL pupil groups improves on previous year's and all groups are at least in line with their national counterparts Persistent absence of ALL pupil groups improves on previous year's and all groups are at least in line with their national counterparts Disadvantaged pupils enjoy attending the Academy - comparable to non-disadvantaged (Pupil Survey) Gap for Academy disadvantaged pupils attaining @ ARE or more is closed to academy non- disadvantaged pupils (KAPD – Key Assessment Point Data) Gap for Academy disadvantaged pupils attaining @ ARE or more is closed to national non- disadvantaged pupils (KAPD) Gap for Academy disadvantaged pupils attaining greater depth is closed to national non-disadvantaged pupils (KAPD) Academy disadvantaged pupils attaining @ ARE or more exceeds National disadvantaged pupils @ ARE or more (KAPD) Academy disadvantaged pupils attaining @ ARE or more exceeds National disadvantaged pupils @ ARE or more (KAPD) Academy disadvantaged pupils @ ARE or more exceeds National disadvantaged pupils @ greater depth exceeds National disadvantaged pupils @ Date or more (KAPD)

Accelerate progress of PPG pupils in R/W/M/GPS/Phonics so that the attainment gap between TPNA PPG pupils and their in-house and national non-PPG counterparts is closed and that they exceed their national like for like PPG counterparts; 4) WIDER OPPORTUNITIES:	 (KAPD) Gap for Academy disadvantaged pupils attaining greater depth is closed to national non-disadvantaged pupils (KAPD) Academy disadvantaged pupils attaining @ ARE or more exceeds National disadvantaged pupils @ ARE or more (KAPD) Academy disadvantaged pupils attaining @ greater depth exceeds National disadvantaged pupils @ greater depth exceeds National disadvantaged pupils @ greater depth (KAPD) Actendance of ALL pupil groups improves on previous year's and all groups are at least in line with their national counterparts Persistent absence of ALL pupil groups improves on previous year's and all groups are at least in line with their national counterparts
To further extend enrichment and wider learning opportunities for PPG pupils to support desire for greater attendance, widen experiences and support accelerated progress and improving attainment in R/W/M/GPS/PHONICS	 their national counterparts Disadvantaged pupils enjoy attending the Academy - comparable to non-disadvantaged (Pupil Surveys) Disadvantaged pupils are happy that the Academy provide adequate clubs / visits / visitors / residential opportunities (Pupil Surveys) Parents of disadvantaged pupils are happy that the Academy provide a variety of clubs / visits / residential opportunities that their children can attend (Parent Surveys) See success criteria for point 3 also.
5) PARENTAL ENGAGEMENT: To further extend parental engagement opportunities for disadvantaged pupils to support accelerated progress and improving attainment in R/W/M/GPS/PHONICS	 Numbers of parents supporting disadvantaged Y6 pupils with the revision programme is equitable with parents of non-disadvantaged pupils. Parents of disadvantaged pupils are happy that the Academy provide them with support to help their child with their learning (Parent Surveys) See success criteria for point 3 also.

Activity in this academic year 2024-2025

This details how we intend to spend our pupil premium (and recovery premium funding) **this academic year** to address the challenges listed above.

Teaching (for example, CPD, recruitment and retention)

Budgeted cost: £61743

Activity	Evidence that supports this approach	Challenge number(s)
	(EEF findings)	addressed
CPD – National College	How effective is the approach?	1,3
Retrieval / cognitive overload	The average impact of metacognition and self- regulation strategies is an additional seven months'	
/ blooms questioning styles/	progress over the course of a year.	
metacognition	Metacognition and self-regulation strategies can be	
	effective when taught in collaborative groups so	
	that learners can support each other and	
	make their thinking explicit through discussion.	
	How effective is the approach?	
Reading Comprehension	The average impact of reading comprehension	3
strategies – whole academy	strategies is an additional six months' progress over	
approach development	the course of a year. Successful reading	
(based on EEF research) and	comprehension approaches allow activities to be	
CPD	carefully tailored to pupils' reading capabilities, and	
	involve activities and texts that provide an	
	effective, but not overwhelming, challenge.	
	Many of the approaches can be usefully combined	
	with Collaborative learning techniques and Phonics	
	activities to develop reading skills. The use of	
	techniques such as graphic organisers and drawing	
	pupils' attention to text features are likely to be	
	particularly useful when reading	
	expository or information texts.	
Purchase and use of	Standardised tests can provide reliable insights into	1,3

Employ additional staff and deploy staff in order to reduce class sizes, increasing adult support for pupils in phonics, reading, writing and maths – EYFS– to support catch up and to provide additional support to our Well-being mentor with the ever increasing need to support pupil mental health and well-	How effective is the approach? The average impact for reducing class size is around 1 month additional progress over the course of an academic year. This comes with the increased flexibility of organising learners, quantity and quality of feedback focused lower down the Academy where research shows it is at its highest impact Change in teaching approach does accompany a class size reduction then benefits on attainment can be identified, in addition to improvements on behaviour and attitudes.	1,3
being Continue Monster Phonics daily implementation	How effective is the approach? The average impact of the adoption of phonics approaches is about an additional five months' progress over the course of a year. Phonics approaches have been consistently found to be effective in supporting younger pupils to master the basics of reading, with an average impact of an additional five months' progress. Research suggests that phonics is particularly beneficial for younger learners (4–7 year olds) as they begin to read. Teaching phonics is more effective on average than other approaches to early reading (such as whole language or alphabetic approaches), though it should be emphasised that effective phonics techniques are usually embedded in a rich literacy environment for early readers and are only one part of a successful literacy strategy.	3,5

Targeted academic support (for example, tutoring, one-to-one support structured interventions)

Budgeted cost: £36888

(EEF findings)addressed1.6 school led tutoring in reading and maths NTP- SCHOOL LED TUTONING APPROACH - 10 weeks of 3 x groups of 6 in Reading and Maths (Y6 pupils) per week tutoringThe average impact of the small group tuition is four additional months' progress, on average, over the course of a year.3Evidence shows that small group tuition is effective and, as a rule of thumb, the smaller the group the better. Some studies suggest that greater feedback from the teacher, more sustained the engagement in smaller groups, or work which is more closely matched to learners' needs explains this impact. Once group size increases above six or seven there is a noticeable reduction in effectiveness. Although the rule the smaller the better" there is some variability in impact within the existing evidence. For example, in reading, small group teaching can sometimes be more effective than either one to one or paired tuition. It may be that in these cases reading practice can be efficiently organised so that all the pupils stay fully engaged as each take their turn, such as in Guided Reading. The variability in findings suggests two things. First, the quality of the teaching in small groups may be as, or more important than, the precise group size (there is evidence of the benefits of staff professional development on pupil outcomes). Second, it is important to evaluate the effectiveness. Given the uncertainty and the lower cost, small group tuition may be a sensible approach to trialaddressed	Activity	Evidence that supports this approach	Challenge number(s)

Small group interventions –	How effective is the approach?	3
RWMP – CATCH UP MATHS	The average impact of the deployment of teaching	
AND CATCH UP READING	assistants is about an additional four months'	
	progress over the course of a year. However,	
	effects tend to vary widely between those studies	
	where teaching assistants are deployed in	
	everyday classroom environments, which typically	
	do not show a positive benefit, and those where	
	teaching assistants deliver targeted interventions	
	to individual pupils or small groups, which on	
	average show moderate positive benefits. The	
	headline figure of four additional months' progress	
	lies between these figures.	
	Decearch which focuses on teaching assistants who	
	Research which focuses on teaching assistants who provide one to one or small group targeted	
	interventions shows a stronger positive benefit of	
	between four and six additional months on	
	average. Often interventions are based on	
	a clearly specified approach which teaching	
	assistants have been trained to deliver.	
	There is also evidence that working with teaching	
	assistants can lead to improvements in pupils'	
	attitudes, and also to positive effects in terms of	
	teacher morale, workload and reduced stress.	
WELCOMM small group	The average impact of Oral language interventions	2, 3
interventions – EYFS (C&L)	is approximately an additional six months' progress	
	over the course of a year. Some studies also often	
	report improved classroom climate and fewer behavioural issues following work on oral	
	language. Approaches that focus on speaking, listening and a	
	combination of the two all show positive impacts	
	on attainment.	
	Most of the studies focus on reading outcomes.	
	The small amount of studies that do study maths	
	and science show small positive effects.	
	Language approaches in these subjects may be used	
	to explicitly practice subject specific vocabulary.	
	The studies in the Toolkit indicate that language	
	interventions with frequent sessions over	
	a sustained period may have a larger impact,	
	overall. Approaches that are delivered one-to- one	
	also have larger impacts.	
	The average impact of successful SEL interventions	
	The average impact of successful SEL interventions

	professional development and training for staff. In addition, the implementation of the programme and the degree to which teachers are committed to the approach appear to be important	
Boosters and SATs revision aids – extending school day for Y6 (Reading and Maths)	How effective is the approach? The average impact of approaches involving extending school time is about an additional three months' progress over the course of a year. The average impact is influenced by the targeted use of before and after school programmes, which have higher impacts on average.	1

Budgeted cost: £82866

Activity	Evidence that supports this approach	Challenge number(s)
	(EEF findings)	addressed
Fortis Therapy and Compass Go counselling	How effective is the approach? The average impact of successful SEL interventions is an additional four months' progress over the course of a year. The security of this evidence is, however, very low, so schools should carefully monitor the efficacy of approaches in their own settings. Alongside academic outcomes, SEL interventions have an identifiable and valuable impact on attitudes to learning and social relationships in school. Although SEL interventions are almost always perceived to improve emotional or attitudinal outcomes, not all interventions are equally effective at raising attainment. Improvements appear more likely when SEL approaches are embedded into routine educational practices and supported by professional development and training for staff. In addition, the implementation of the programme and the degree to which teachers are committed to the approach appear to be important. The average impact of successful SEL interventions is an additional four months' progress over the course of a year (EEF Toolkit)	1,2,3,5
Train ELSAs to work as part of well-being team to provide 1:1 small group and class support to vulnerable pupils	The average impact of successful SEL interventions is an additional four months' progress over the course of a year (EEF Toolkit)	1,2,3,5
Well-being mentor support	How effective is the approach? The average impact of successful SEL interventions is an additional four months' progress over the course of a year. The security of this evidence is, however, very low, so schools should carefully monitor the efficacy of approaches in their own settings. Alongside academic outcomes, SEL interventions have an identifiable and valuable impact on attitudes to learning and social relationships in school. Although SEL interventions are almost always perceived to improve emotional or attitudinal outcomes, not all interventions are equally effective at raising attainment. Improvements appear more likely when SEL approaches are embedded into routine educational practices and supported by professional development and training for staff. In addition, the implementation of the programme and the degree to which teachers	1,2,3,5

Behaviour strategy – house teams / rewards / restorative approach / emotion coaching / house points / in house competition	are committed to the approach appear to be important. How effective is the approach? The average impact of behaviour interventions is four additional months' progress over the course of a year. Evidence suggests that, on average, behaviour interventions can produce moderate improvements in academic performance along with a decrease in problematic behaviours. However, estimated benefits vary widely across programmes. Approaches such as improving teachers' behaviour management and pupils' cognitive and social skills are both effective, on average.	1,2,3,4,5
Attendance strategy – employ AWO to be split between 3 x ALLIANCE SCHOOLS / attendance officer / incentivisation for parents along with pupils SAP / LAP / attendance reviews / newsletters / phone calls at day 1 etc	 How effective is the approach? Higher overall absence leads to lower attainment at KS2 and KS4 The Department for Education (DfE) published research in 2016 which found that: The higher the overall absence rate across Key Stage (KS) 2 and KS4, the lower the likely level of attainment at the end of KS2 and KS4 Pupils with no absence are 1.3 times more likely to achieve level 4 or above, and 3.1 times more likely to achieve level 5 or above, than pupils that missed 10-15% of all sessions Pupils with no absence are 2.2 times more likely to achieve 5+ GCSEs A*- C or equivalent including English and mathematics than pupils that missed 15- 20% of KS4 lessons See pages 12 and 15 to 16. There's a clear link between poor attendance and lower academic achievement DfE research (2012) on improving attendance at school found that: Of pupils with absence over 50%, only 3% manage to achieve 5 or more GCSEs at grades A*-C including maths and English 73% of pupils who have over 95% attendance achieve 5 or more GCSEs at grades A*-C 	1,2,3,4,5

	to stay in education	
	Advice from the <u>National Strategies</u> (hosted on the National Archives) says that:	
	 The links between attendance and achievement are strong Pupils with persistent absence are less likely to attain at school and stay in education after the age of 16 years 	
Pastoral tracker (CPOMS)	Plays a vital role in allowing us to monitor and address barriers which arise on a daily basis	1,2
Sweatshirts	To build self-esteem, improve attendance and ensure no child is disadvantaged due to financial constraints – see research regarding attendance	1
Wider opportunities – residential subsidies / music tuition / club subsidies / enterprise / working with business	To build self-esteem, improve attendance and ensure no child is disadvantaged due to financial constraints – see research regarding attendance	1,2,4
Parental engagement opportunities – revision support programme in Y6 / workshops reading / phonics / maths throughout the academy	How effective is the approach? The average impact of the Parental engagement approaches is about an additional four months' progress over the course of a year. There are also higher impacts for pupils with low prior attainment. The evidence about how to improve attainment by increasing parental engagement is mixed and much less conclusive. There are examples where combining parental engagement strategies with other interventions, such as extended early years provision, has not been associated with any additional educational benefit. This suggests that developing effective parental engagement to improve their children's attainment is challenging and needs careful monitoring and evaluation. There is some evidence that supporting parents with their first child will have benefits for siblings. Parents' aspirations also appear to be important for pupil outcomes, although there is limited evidence to show that intervening to change parents' aspirations will raise their children's aspirations and achievement over the longer term. The EEF has tested a number of interventions designed to improve pupils' outcomes by engaging parents in different types of skills development. The consistent message from these has been that it is difficult to engage parents in programmes. By contrast, a trial which aimed to prompt greater parental engagement through text message alerts delivered a small positive impact, and at very low cost	1,2,3,5

Total budgeted cost 2024-2025: £ 181497 (£1398 additional from budget)

Part B: Review of outcomes in the previous academic year 2023-2024

Pupil premium strategy outcomes

Year 3 of 3 year strategy (2021-2024) IMPACT ATTAINMENT AND PROGRESS

Impact (Attainment and Progress) - EYFS 2024

- National GLD ALL PUPILS for 2024 was 68%
- Thrunscoe GLD ALL PUPILS for 2024 was 67%. This is significant progress considering the depressed entry levels of a significant number of our pupils and Spring term imports within the year
- National GLD DISADVANTAGED PUPILS for 2024 was 52%
- Thrunscoe GLD DISADVANTAGED PUPILS for 2024 was 56%. This is above national disadvantaged counterparts
- When comparing GLD DISADVANTAGED over the 3 year period of this strategy TPNA disadvantaged pupils achieving GLD stands at 58% compared to National counterparts at 51%.
- When comparing GLD DISADVANTAGED over the 3 year period of this strategy the gap between National DISADVANTAGED compared to National NON-DISADVANTAGED is on average 19% whereas TPNA GLD DISADVANTAGED compared to National NON-DISADNAVTAGED is 11%. The gap is closing.

Impact (Attainment and Progress) - KS1 Phonics 2024

- By the end of Year 2 2024: 100% of Thrunscoe ALL PUPILS achieved the expected standard
- By the end of Year 2 2024: 100% of Thrunscoe DISADVANTAGED achieved the expected standard
- By end of Year 1 2024: 88% of Thrunscoe ALL PUPILS achieved the expected standard; the National average was 80%. The consistent implementation of MONSTER PHONICS across the academy accelerated progress from depressed EYFS entry points.
- By the end of Year 1 2024: 82% of Thrunscoe DISADVANTAGED pupils achieved the expected standard; National average DISADVANTAGED was 68% (+14%)
- By the end of Year 1 2024: Thrunscoe DISADVANTAGED pupils performed in line with National NON-DISADVANTAGED pupils (82% and 83% respectively). Evidence suggests the gap has closed.
- Over a 3 year average Y1 TPNA DISADVANTAGED pupils outperform their National DISADVANTAGED counterparts by 11% (77% and 66% respectively)
- Over a 3 year average Y1 TPNA DISADVANTAGED pupils have closed the gap to their National NON-DISADVANTAGED counterparts to 5%. The gap between National DISADVANTAGED and NON-DISADVANTAGED is 16%

Impact (Attainment and Progress) - KS1 R/W/M 2024 (2023 National comparator used due to end of statutory KS1 submissions to DFE at end of 2023.

Impact (Attainment and Progress) - Y4 MTC 2024

- Thrunscoe ALL pupils achieved an average score of **22.3 out of 25** in 2024; this is a rise of 2.8 marks average per pupil compared to what pupils scored in 2023. The national average in 2024 was **20.7 out of 25**
- Thrunscoe DISADVANTAGED PUPILS performed broadly in line with their Academy NON-DISADVANTAGED PUPILS (**22.1 / 22.4** respectively).
- Thrunscoe DISADVANTAGED PUPILS outperformed their NATIONAL DISADVANTAGED PUPIL counterparts (**22.1 / 18.8** respectively).
- Thrunscoe DISADVANTAGED PUPILS outperformed their NATIONAL NON-DISADVANTAGED PUPIL counterparts (**22.1 / 21.3** respectively).
- **45%** of Thrunscoe ALL pupils scored a perfect score of **25 out of 25** in 2024; the national average in 2023 was 29%. **53%** of Thrunscoe DISADVANTAGED PUPILS scored a perfect score of **25 out of 25**; they outperformed Academy NON-DISADVANTAGED pupils where 38% achieved a perfect score.

• Impact of TTR and inter class competition.

Impact (Attainment and Progress) - KS2 R/W/M/GPS 2024

• In 2024, TPNA ALL Pupils achieving at (or more) age related outcomes outperformed their national counterparts in all assessment areas.

WIDER IMPACT:

Parent survey Jan 2024:

• Parents of Disadvantaged pupils respond broadly in line with Non-disadvantaged Pupils' parents. On average 97% of disadvantaged parents agreed / strongly agreed that their child was happy, they felt safe, that the academy has high expectations of their child, that there are a range of clubs for their child, that the academy looks after their child's mental health and well-being and that they would recommend the Academy to other parents. The average for non-disadvantaged pupils' parents was 98%

Pupil survey Summer 2024:

 Disadvantaged pupils replied broadly in line with Non-disadvantaged pupils: If worried you have an adult you can speak to (100% / 99% respectively) Enjoy being at the Academy (98% / 96% respectively) Access extra-curricular opportunities (88% / 87% respectively)

Pupil attendance 2023-2024:

- TPNA ALL pupils' overall attendance is broadly in line with National ALL pupils (94.2% and 94.5% respectively) for the academic year 2023-2024. This is a 0.9% increase on overall attendance on 2022-2023.
- TPNA SEND pupils' overall attendance places us in the TOP 30-40% of schools whereas NON-SEND pupils' attendance places us in the BOTTOM 30-40% of schools nationally.
- TPNA FSM pupils' overall attendance places us in the TOP 30-40% of schools. Difference between FSM and Non- FSM pupils has reduced to 2.8% compared to 2022-2023 (3.4%)
- TPNA SEND with FSM pupils' overall attendance places us in the TOP 40-50% of schools nationally whereas NON-SEND with NON-FSM are in the BOTTOM 30-40% of schools nationally.
- Our biggest concern is NON-DISADVANTAGED pupils for PERSISTENT ABSENCE NO SEND (Bottom 20-30% of pupils of schools nationally) NO SEND & NO FSM (BOTTOM 20-30% of schools nationally)
- Persistent absence across the Academy has reduced by 3%, to 17%, compared to 2022.

Externally provided programmes

Please include the names of any non-DfE programmes that you purchased in the previous academic year. This will help the Department for Education identify which ones are popular in England
