

SCIENCE

B13 Reproduction

What are the different types of reproduction?

How does our DNA give us characteristics?

B11 Hormonal Coordination

What are hormones?

How do they control our bodies?

B12 Homeostasis is Action

How does your body control its temperature?

How does your body control the water levels in your blood?

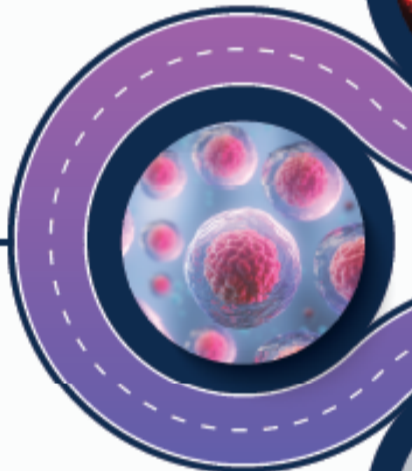

B9 Respiration

What is respiration?

How is respiration different in different organisms?

How do humans respond to exercise?

B10 The Nervous System

What is homeostasis?

How does the nervous system work?

B7 Non-communicable diseases

What are non-communicable diseases?

What are the risk factors in developing non-communicable diseases?

B8 Photosynthesis

What is photosynthesis?

How are plants adapted for photosynthesis?

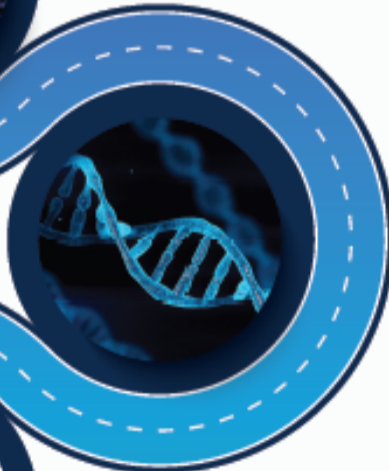

What are the ideal conditions for photosynthesis?

B6 Preventing and Treating Diseases

How do vaccines work?

How are medicines developed?

B5 Communicable Diseases

What is a pathogen?

How do we stop the spread of pathogens?
