Number - addition and subtraction

add two single digit numbers

aggregation

Counters on plates:

Part, part, whole model:

Numicon:

4 + 2

Tens frame:

4 + 2 = 6

subtract two single digit numbers

reduction

Counters on plates:

6 take away 1 leaves

Cross out drawn objects to represent what has been taken away:

3 take away 2 is 1

Tens frame:

6 - 2 = 4

Number - multiplication and division

solve problems including doubling

Practically double a group of objects to find double of a number by combining then counting the two groups:

Double 4 is 8.

Numicon:
Double 4 is 8

Tens frame:
Double 5 is 10

solve problems including halving and sharing

Sharing objects:

One for you. One for me...
Is it fair? How many do we each have?

15 shared between 5 is 3.

Grouping objects:

Put groups of objects on plates-

How many groups of 4 are there in 12 stars?

Put groups of numicon out-

Count on to find the answer

augmentation

Practically with objects, fingers etc:

5 + 2 "Put 5 in your head, 6, 7."

Dice:

4 + 3 = 7

On a prepared number track (start with the bigger number).

4 + 2 = 6

Count on or back to find the answer

Practically, for example:

Group objects on a table then cover some to visualize the calculation:

2 less than 4 is 2

Start with 2... 3, 4.

Ten frame:

<p>1 2 3 4 5 6 7 8 9 10</p> <p>Tens frame:</p>  <p>And show alongside part, part, whole model</p> 	 <p>Coins on tens frame:</p>  <p>I had 10 pennies. I spent 4 pence. How much do I have left? Start with 10... 9, 8, 7, 6.</p>		
<p><i>understand and use vocabulary for addition</i></p> <p>add, more, and, make, sum, total, altogether, score, double, one more, two more, ten more... how many more to make...? how many more is... than...?</p> <p>is the same as</p>	<p><i>understand and use vocabulary for subtraction</i></p> <p>take (away), leave, how many are left/left over? how many have gone? one less, two less... ten less... how many fewer is... than...? difference between</p> <p>is the same a</p>	<p><i>understand and use vocabulary for multiplication</i></p> <p>count on (from, to), count back (from, to), count in ones, twos... tens...</p> <p>is the same as</p>	<p><i>understand and use vocabulary for division</i></p> <p>half, halve, count out, share out, left, left over</p> <p>is the same as</p>

Year 1

Number – addition and subtraction

represent and use number bonds up to 20

Start with number bonds to 10 then build. Use a wide range of objects (including fingers!) and images to model the bonds, e.g. interlocking cubes.

Using object or fingers-

Count how many more fingers are needed to make ten.

Count how many more spots are needed to make ten.

Tens frame:

$$4 + _ = 10$$

Numicon:

represent and use number bond facts related subtraction up to 20

Start with number bonds to 10 then build. Use a wide range of objects (including fingers!) and images to model the bonds, e.g. interlocking cubes.

Number – multiplication and division

count in multiples of twos, fives and tens (from number and place value)

Counting using a variety of practical resources

Counting in 2s e.g. counting socks, shoes, animals in the ark...

Counting in 10s e.g. hundred square, towers of cubes

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

group and share small quantities

Practical activities involving sharing:
Distributing cards when playing a game, putting objects onto plates, into cups, hoops etc.

Grouping:
Sorting objects into 2s / 3s/ 4s etc
How many pairs of socks are there?

There are 12 crocus bulbs. Plant 3 in each pot. How many pots are there?
Jo has 12 Lego wheels. How many cars can she make?

Sharing pictures /objects:
12 children get into teams of 4 to play a game. How many teams are there?

$0 + 7 = 7$ $7 = 7 + 0$
 $1 + 6 = 7$ $7 = 6 + 1$
 $2 + 5 = 7$ $7 = 5 + 2$
 $3 + 4 = 7$ $7 = 4 + 3$

add one-digit and two-digit numbers to 20, including zero

Adding objects:

$4 + 2 = 6$

Tens frame:

$4 + 2 = 6$

Part, part, whole model:

Show alongside part, part, whole model showing numerals.

On a prepared number line:

$7 + 4 = 11$

subtract one-digit and two-digit numbers to 20, including zero

Practically with objects, fingers etc:
 $5 - 2$ "Put 5 in your head, 4, 3."

Taking away

Objects:

$7 - 2 = 5$

Number lines (numbered and unnumbered, prepared and child constructed):

Hundred Square:
 $17 - 3$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40

Count fingers in groups:

Eg 5, 10, 15, 20 etc

Use arrays for repeated addition and relate this to the \times calculation:
 (Use counters or objects as well as visual representations to support understanding)

$5 + 5 + 5 = 15$

$3 + 3 + 3 + 3 + 3 = 15$

$5 \times 3 = 15$

$3 \times 5 = 15$

Use rhymes, songs and stories involving counting on and counting back in ones, twos, fives and tens.

double numbers and quantities

Practically double a group of objects and/or quantities to find double of a number by combining then counting the two groups.

Progress onto using known facts and counting (in 1s, 2s, 5s and 10s) to double more efficiently.

Sweets are shared between 2 people. How many do they have each?

Arrays:

How many groups of 3 are in 15?

half numbers and quantities

Practically halve objects and/or quantities by sharing them out into two piles and then counting the number of objects in each pile, or cutting/folding pictures of objects in half.

Progress onto using known facts and counting (in 1s, 2s, 5s and 10s) to halve more efficiently.

On a hundred square:

$$3 + 4$$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40

Finding the difference

Number lines (numbered and unnumbered, prepared and child constructed):

Use practical equipment (such as numicon or cuisenaire) to identify the 'difference':

'The difference between 7 and 4 is 3'
or 'Seven is 3 more than four'.

Half of 8

is 4

read, write and interpret mathematical statements involving addition (+) and equals (=) signs

It is important to that children have a clear understanding of the concept of equality, before using the '=' sign. Calculations should be on either side of the '=' to that children don't misunderstand '=' as to mean 'the answer'.

$15 + 2 = 17$
 $15 = 3 + 12$

read, write and interpret mathematical statements involving and subtraction (-) equals (=) signs

It is important to that children have a clear understanding of the concept of equality, before using the '=' sign. Calculations should be on either side of the '=' to that children don't misunderstand '=' as to mean 'the answer'.

$15 - 2 = 13$
 $15 = 18 - 3$

make connections between arrays and number patterns

Arrays

Looking at columns
 Looking at rows
 $2 + 2 + 2$
 $3 + 3$

3 groups of 2 2
 groups of 3

Arrays and repeated addition

or $4 + 4$ 4×2

2×4
 or $2 + 2 + 2 + 2$

make connections between arrays and number patterns

There are 4 groups of 3 in 12.
 12 shared between 4 is 3.

solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square + 4$

To support this, when solving calculations, missing numbers should be placed in all possible places:

$3 + 4 = \quad \quad \quad = 4 + 3$
 $3 + \quad = 7$ $7 = \quad + 4$
 $4 + \quad = 7$ $7 = 3 + \quad$
 $\quad + \nabla = 7$ $7 = \quad + \nabla$

solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$

To support this, when solving calculations, missing numbers should be placed in all possible places:

$16 - 9 = \quad \quad \quad = 16 - 9$
 $16 - \quad = 7$ $7 = \quad - 9$
 $7 = 16 - \quad$ $\quad - 9 = 7$
 $\quad - \nabla = 7$ $7 = \quad - \nabla$

solve one-step problems involving multiplication, by calculating the answer using concrete objects, pictorial representations and arrays with the support

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

solve one-step problems involving division, by calculating the answer using concrete objects, pictorial representations and arrays with the support

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

understand and use vocabulary for addition, e.g. put together, add, altogether, total and more than

+, add, more, plus, make, total, altogether, score, double, near double, one more, two more... ten more,

= equals, sign, is the same as

How many more to make...? How many more is... than...? How much more is...? Repetition of facts with different vocabulary:

“What is 2 add 5?” “What is 2 more than 5?”
 “What is 2 plus 5?” What is the total of 2 and 5?” etc

understand and use vocabulary for addition and subtraction, e.g. take away, distance between, difference between and less than

- subtract, take (away), minus, leave, how many are left/left over? how many have gone? one less, two less, ten less... how many fewer is... than...? how much less is...? difference between, half, halve, counting up/back...

= equals, sign, is the same as

Repetition of facts with different vocabulary:
 “What is 7 take away 3?” “What is 3 less than 7?”
 “What is 7 subtract 3?”
 “What is difference between 3 and 7?”

use a variety of language to describe multiplication

count on (from, to), count back (from, to), count in ones, twos, threes, fours, fives... count in tens, lots of, groups of, x, times, multiply, multiplied by, multiple of, once, twice, three times... ten times... times as (big, long, wide... and so on), repeated addition, array, row, column, double, halve

= equals, sign, is the same as

use a variety of language to describe division

Array, row, column, halve, share, share equally, one each, two each, three each... group in pairs, threes... tens, equal groups of
 ÷, divide, divided by, divided into, left, left over

= equals, sign, is the same as

Year 2

Number – addition and subtraction

Number – multiplication and division

recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100

Play games, chant, test etc to increase speed of recalling facts to 20.
 Make models and images to display facts.
 Investigate related facts to 100 and repeat above.

recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100

Play games, chant, test etc to increase speed of recalling facts to 20.
 Make models and images to display facts.
 Investigate related facts to 100 and repeat above.

recall and use multiplication facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers

Play games, chant, test etc to increase speed of recalling facts to 20.
 Make models and images to display facts.
 Investigate related facts to 100 and repeat above.

recall and use division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers

Play games, chant, test etc to increase speed of recalling facts to 20.
 Make models and images to display facts.
 Investigate related facts to 100 and repeat above.

add numbers using concrete objects, pictorial representations, and mentally, including:

- a two-digit number and ones or tens

subtract numbers using concrete objects, pictorial representations, and mentally, including:

- a two-digit number and ones or tens

connect the 10 multiplication table to place value, and the 5 multiplication table to the divisions on the clock face

H	T	U
	1	0
	2	0
	3	0
	4	0

H	T	U
	1	0
	2	0
	3	0
	4	0

Counting on
 $15 + 2$ "Put 15 in your head, 16, 17."

Partition number and recombine
 $27 + 9 = 20 + 7 + 9$
 $= 20 + 16$
 $= 36$

Count on by splitting units to make next multiple of ten
 $36 + 8 = 36 + 4 + 4$
 $= 40 + 4$
 $= 44$

Adding near numbers and adjusting
 $33 + 9 = 33 + 10 - 1$

Hundred Square
 $17 + 30$

Counting back
 $63 - 20$ "Put 63 in your head, 53, 43."

Use unprepared numbered lines to subtract, by counting back in units:

Hundred Square
 $43 - 30$

$16 - 4 = 12$

relate multiplication to arrays and to repeated addition using a range of materials and contexts

relate division to grouping and sharing discrete and continuous quantities, to arrays and to repeated subtraction using a range of materials and contexts

Bridging ten

$$\begin{array}{r} 13 \\ + 9 \\ \hline 22 \end{array}$$

1

- two two-digit numbers

Use known number facts and place value to subtract (partition second number only)
 $37 - 12 = 37 - 10 - 2$
 $= 27 - 2$
 $= 25$

Find a small difference by counting up
 $42 - 39 = 3$
 $+ 1$

Subtract mentally a number near 10 to or from a two-digit number
 $35 - 19 = 35 - 20 + 1$

Practically combine groups of objects (2s, 5s and 10s) and verbalise (then record) what has been found out: There are 3 plates. Each plate has 2 star biscuits on. How many biscuits are there? 2 add 2 add 2 equals 6

Mum washed 5 pairs of socks, how many socks did she get out of the washing machine? $2 + 2 + 2 + 2 + 2 = 10$

- two two-digit numbers

Use empty number lines to add two 2 digits numbers, by counting on in multiples of ten then multiples of one.
 $63 + 16 = 79$

Partition into tens and ones and recombine
 $12 + 23 = 10 + 2 + 20 + 3$
 $= 10 + 20 + 2 + 3$
 $= 30 + 5$
 $= 35$

Hundred Square
 $32 + 23$

Refine to partitioning the second number only:
 $23 + 12 = 23 + 10 + 2$
 $= 33 + 2$
 $= 35$

- adding three one-digit numbers
- Use knowledge of adding, for example number bonds first or largest numbers first.

$$\begin{aligned} 3 + 9 + 7 &= (3 + 7) + 9 \\ &= 10 + 9 \\ &= 19 \end{aligned}$$

Use arrays for repeated addition and relate this to the x calculation: (Use counters or objects as well as visual representations to support understanding)

$$\begin{aligned} 5 + 5 + 5 &= 15 & \begin{array}{c} \circ \circ \circ \circ \circ \\ \circ \circ \circ \circ \circ \\ \circ \circ \circ \circ \circ \end{array} & 3 + 3 + 3 + 3 + 3 = 15 \\ 5 \times 3 &= 15 & & 3 \times 5 = 15 \end{aligned}$$

Use a number line for repeated addition:

Initially, pupils to practically 'share' and 'group' using practical equipment and pictorial representation. Move on to using arrays to identify groups, use physical counters before pictorial representations:

How many groups of 3 are in 15?

Grouping using a number line:

There are 30 children in the class, how many groups of 5 can we get into?

Use counters to support pupils understanding:

<p>record addition and subtraction in columns</p> <p>Use partitioned column method.</p> <p>Solve calculations that do not cross the tens boundary, until they are secure with the method. Then solve calculations that do cross the tens boundary. Use base 10 (diennes) to support the understanding of 'carrying' and the value of 'digits'.</p>  <p>28 + 13</p> 	<p>record subtraction in columns</p> <p>Introduce partitioned column method where no exchanging is required:</p> $46 - 22 = 24$ $\begin{array}{r} 40 + 6 \\ - 20 + 2 \\ \hline 20 + 4 \end{array}$ <p>use base 10 (diennes) to support understanding</p> 	<p>calculate mathematical statements for multiplication within the multiplication tables and write them using the multiplication (×) and equals (=) signs</p> $3 \times 4 = 12$ <p>Repetition of sentence with different vocabulary:</p> <p>“3 times 4 equals 12”</p> <p>“3 lots of 4 are 12”</p> <p>“3 multiplied by 4 equals 12”</p> <p>“The product of 3 and 4 is 12”</p>	<p>calculate mathematical statements for division within the multiplication tables and write them using the division (÷) and equals (=) signs</p> $12 \div 4 = 3$ <p>Repetition of sentence with different vocabulary:</p> <p>“12 divided by 4 equals 3”</p> <p>“12 shared by 4 is 3”</p> <p>“12 grouped into 4s is 3”</p>
<p>solve problems with addition:</p> <ul style="list-style-type: none"> • using concrete objects and pictorial representations, including those involving numbers, quantities and measures • applying increasing knowledge of mental and written methods <p>Use all the models and images mentioned above. Discuss which is most effective and why.</p> <p>Singapore Bar Method</p>	<p>solve problems with subtraction:</p> <ul style="list-style-type: none"> • using concrete objects and pictorial representations, including those involving numbers, quantities and measures • applying increasing knowledge of mental and written methods <p>Use all the models and images mentioned above. Discuss which is most effective and why.</p> <p>Singapore Bar Method</p>	<p>solve problems involving multiplication, using materials, arrays, repeated addition, mental methods, and multiplication facts, including problems in contexts</p> <p>Use all the models and images mentioned above. Discuss which is most effective and why.</p> <p>Singapore Bar Method</p>	<p>solve problems involving division, using materials, arrays, repeated addition, mental methods, and division facts, including problems in contexts</p> <p>Use all the models and images mentioned above. Discuss which is most effective and why.</p> <p>Singapore Bar Method</p>

recognise and use the inverse relationship between addition and subtraction and use this to solve missing number problems

Missing numbers placed in all possible places.

$$\begin{array}{l} 7 - 3 = \square \\ 7 - \square = 4 \\ \square - 3 = 4 \\ \square - \nabla = 4 \end{array} \quad \begin{array}{l} \square = 4 + 3 \\ 7 = \square + 3 \\ 7 = 4 + \square \\ 7 = \square + \nabla \end{array}$$

Numberlines

$$7 + 4 = 11 \quad 11 - 4 = 7$$

As Year 1 and extend to

$$\begin{array}{l} 14 + 5 = 10 + \square \\ 17 - 5 = 14 - \square \end{array}$$

and three numbers

$$\begin{array}{l} 32 + \square + \square = 100 \\ 35 = 46 - \square - 7 \end{array}$$

recognise and use the inverse relationship between multiplication and division and use this to solve missing number problems

$$3 \times 5 = 15$$

$$15 \div 3 = 5$$

$$5 \times 3 = 15$$

$$15 \div 5 = 3$$

show that addition of two numbers can be done in any order (commutative)

On a number line

$$26 + 12 = 38$$

On a hundred square

$$12 + 26 = 38$$

show that subtraction of two numbers cannot be done in any order

On a number line

$$12 - 38 \neq 26$$

$$38 - 12 = 26$$

On a hundred square

show that multiplication of two numbers can be done in any order (commutative)

$$5 \times 3 = 15$$

$$3 \times 5 = 15$$

show that division of one number by another cannot be done in any order

$$15 \div 5 = 3$$

$$5 \div 15 \neq 3$$

check their calculations, including adding numbers in a different order to check addition (for example, $5 + 2 + 1 = 1 + 5 + 2 = 1 + 2 + 5$) - establishing commutativity and associativity of addition

check their calculations, including by adding to check subtraction

See models and images above.

<p>See models and images above.</p>			
<p>recognise and use the inverse relationship between addition and subtraction and use this to check calculations</p> <p>See models and images above.</p>	<p>recognise and use the inverse relationship between addition and subtraction and use this to check calculations</p> <p>See models and images above.</p>	<p>use commutativity and inverse relations to develop multiplicative reasoning (for example, $4 \times 5 = 20$ and $20 \div 5 = 4$)</p> <p>Arrays – related facts</p> <p>$3 \times 5 = 15$ $5 \times 3 = 15$</p>  <p>$15 \div 3 = 5$ $15 \div 5 = 3$</p>	
<p>extend their understanding of the language of addition to include sum</p> <p>+, add, more, plus, make, sum, total, altogether, score, double, near double, one more, two more... ten more, How many more to make...? How many more is... than...? How much more is...? Repetition of facts with different vocabulary: “What is 2 add 5?” “What is 2 more than 5?” “What is 2 plus 5?” What is the total of 2 and 5?” etc</p> <p>= equals, sign, is the same as</p>	<p>extend their understanding of the language of subtraction to include difference</p> <p>- subtract, subtraction, take (away), minus, leave, how many are left/left over? one less, two less... ten less... one hundred less, how many fewer is... than...? how much less is...? difference between, half, halve, tens boundary $13 + 5 = 8$ Repetition of sentence with different vocabulary: “13 subtract 5 equals 8” “5 less than 13 is 8” “13 take away 5 equals 8” “The difference between 13 and 5 is 8” etc</p> <p>= equals, sign, is the same as</p>	<p>use a variety of language to describe multiplication</p> <p>count on (from, to), count back (from, to), count in ones, twos, threes, fours, fives... count in tens, lots of, groups of, x, times, multiply, multiplied by, multiple of, once, twice, three times... ten times... times as (big, long, wide... and so on), repeated addition, array, row, column, double, halve</p> <p>= equals, sign, is the same as</p>	<p>use a variety of language to describe division</p> <p>Array, row, column, halve, share, share equally, one each, two each, three each... group in pairs, threes... tens, equal groups of, ÷, divide, divided by, divided into, left, left over</p> <p>= equals, sign, is the same as</p>

Number – addition and subtraction

add numbers mentally, including:

- a three-digit number and ones
- a three-digit number and tens
- a three-digit number and hundreds

Counting on
115 + 2
"Put 115 in your head, 116, 117."
Partition number and recombine
127 + 90 = 100 + 20 + 7 + 90 = 100 + 110 + 7 = 100 + 117 = 217

- two two-digit numbers (including answer crossing 100)

Counting on with number lines	Partition both numbers and recombine
<p>48 + 36 = 84</p>	<p>27 + 82 = 20 + 7 + 80 + 2 = 100 + 9 = 109</p>
Add the nearest multiple of 10, then adjust	Count on by partitioning the second number only
63 + 99 is the same as 63 + 60 - 1	36 + 93 = 93 + 30 + 6 = 123 + 6 = 129

subtract numbers mentally, including:

- a three-digit number and ones
- a three-digit number and tens
- a three-digit number and hundreds

Counting back: 263 - 5	Use unprepared numbered lines to subtract, by counting back:
"Put 263 in your head, 262, 261, 260, 259, 258."	516 - 400 = 116
Subtract mentally a 'near multiple of 10' to or from a two-digit number:	<p>116 216 316 416 516</p> <p>-100 -100 -100 -100</p>
678 - 90 = 678 - 100 + 10	

- two two-digit numbers (including answer crossing 100)

Use known number facts and place value to subtract (partition second number only)	Find a small difference by counting up
37 - 12 = 37 - 10 - 2 = 27 - 2 = 25	42 - 39 = 3
Subtract mentally a number near 10 to or from a two-digit number	
35 - 19 = 35 - 20 + 1	

Number – multiplication and division

recall and use multiplication facts for the 3, 4 and 8 multiplication tables

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within tables.

recall and use division facts for the 3, 4 and 8 multiplication tables

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within tables.

understand and use mental methods using commutativity and associativity (for example, $4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240$)

Use a variety of resources (including a calculator) to investigate order of multiplication.
Make models and images to display facts.

understand and use mental methods using multiplication a facts (e.g. using $3 \times 2 = 6$, $6 \div 3 = 2$ and $2 = 6 \div 3$) to derive related facts (e.g. $30 \times 2 = 60$, $60 \div 3 = 20$ and $20 = 60 \div 3$)

$30 \times 5 = 150$	$50 \times 3 = 150$	$150 \div 5 = 30$	$150 \div 3 = 50$
	$3 \times 5 = 15$		$15 \div 3 = 5$
$3 \times 50 = 150$	$5 \times 3 = 15$		$150 \div 30 = 5$
$5 \times 30 = 150$	$50 \times 30 = 1500$	$30 \times 50 = 1500$	$150 \div 50 = 3$

add numbers with up to three digits, using formal written methods of columnar addition (See Appendix 1)

Extend mental method of partitioning and recombining. $158 + 72 = 100 + (50 + 70) + (8 + 2)$ $= 100 + 120 + 10$ $= 230$	Vertical expansion $\begin{array}{r} 367 \\ +185 \\ \hline 12 \\ 140 \\ 400 \\ \hline 552 \end{array}$
Column addition $\begin{array}{r} 367 \\ +185 \\ \hline 552 \\ 11 \end{array}$	Including money $\begin{array}{r} \text{£ } 2.50 \\ + \text{£ } 1.75 \\ \hline \text{£ } 4.25 \\ 1 \end{array}$
Use base 10 (diennes) or place value counters to support understanding of carrying and to ensure conceptual understanding of place value: 	
If children are experiencing persistent difficulties, they could use the partitioned column method with carrying (using Diennes for support): $\begin{array}{r} 200 + 40 + 6 \\ \quad 70 + 6 \\ \quad \quad 300 + 20 + 2 \\ \quad \quad \quad 100 \quad 10 \end{array}$	

subtract numbers with up to three digits, using formal written methods of columnar subtraction (See Appendix 1)

Use base 10 (diennes) as a practical method to introduce exchanging

$31 - 18 = 13$ 

When pupil(s) are confident in doing this practically and verbalizing the calculation, begin to record using partitioned column method:

$$\begin{array}{r} 20 \quad 1 \\ 30 + 1 \\ -10 + 8 \\ \hline 10 + 3 \end{array}$$

When secure with exchanging, use partitioned column method to solve calculations involving 3 digit numbers. Repeating the practical stage if necessary.

Introduce Column Subtraction without decomposition:

$$\begin{array}{r} 458 \\ - 232 \\ \hline 226 \end{array}$$

develop reliable written methods for multiplication, starting with calculations of two-digit numbers by one-digit numbers and progressing to the formal written methods of short multiplication

Start by reinforcing mental methods of partitioning:

$15 \times 2 = 30$  $13 \times 3 = (10 \times 3) + (3 \times 3)$
 $= 30 + 9$
 $= 39$

Grid Method

1. Introduce the grid method by linking it to arrays initially (using counters):

$12 \times 3 = 36$

x	3	
10		30
2		6
		36

2. Use base 10 (diennes) with grid method to support understanding of place value:

$12 \times 3 = 36$

x	3	
10		30
2		6
		36

x	3	
10	30	
3	9	
		39

develop reliable written methods for division, starting with calculations of two-digit numbers by one-digit numbers and progressing to the formal written methods of short division

Use counters and a number line to support pupils understanding. Number lines
How many 3's make 18?

Hoops and dots
 $16 \div 2 = 8$ 

Move on to calculations that leave remainders and/or require tables knowledge:
1) $16 \div 3 = 5 \text{ r } 1$ 
2) $69 \div 3 = 23$ 

When pupils have had experience with and demonstrated understanding of grouping for division, begin to look at short division with no remainders in the final answer.

Use counters/Diennes to support understanding.

$$\begin{array}{r} 3 \quad 2 \\ 3 \overline{) 96} \end{array}$$

solve problems, including missing number problems, using number facts, place value, and more complex addition

Missing numbers should be placed in all possible places:

$3 + 4 = \quad = 4 + 3$
 $3 + \quad = 7 \quad 7 = \quad + 4$
 $4 + \quad = 7 \quad 7 = 3 + \quad$
 $\quad + \nabla = 7 \quad 7 = \quad + \nabla$

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

solve problems, including missing number problems, using number facts, place value, and more complex subtraction

Missing numbers should be placed in all possible places:

$16 - 9 = \quad = 16 - 9$
 $16 - \quad = 7 \quad 7 = \quad - 9$
 $\quad - 9 = 7$
 $7 = 16 - \quad$
 $\quad - \nabla = 7 \quad 7 = \quad - \nabla$

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

solve problems, including missing number problems, involving multiplication, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects solve simple problems in contexts, deciding which of the four operations to use and why

Missing numbers placed in all possible places.

$7 \times 2 = \quad = 2 \times 7$
 $7 \times \quad = 14 \quad 14 = \quad \times 7$
 $\quad \times 2 = 14 \quad 14 = 2 \times \quad$
 $\quad \times \nabla = 14 \quad 14 = \quad \times \nabla$

Extend to
 $2 \times 6 = 3 \times$

solve problems, including missing number problems, involving division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects solve simple problems in contexts, deciding which of the four operations to use and why

Missing numbers placed in all possible places.

$6 \div 2 = \quad = 6 \div 2$
 $6 \div \quad = 3 \quad 3 = 6 \div \quad$
 $\quad \div 2 = 3 \quad 3 = \quad \div 2$
 $\quad \div \nabla = 3 \quad 3 = \quad \div \nabla$

Extend to
 $12 \div 6 = 8 \div$

		<p>and using three numbers $10 \times \quad \times = 60$ $12 = 2 \times$ $\quad \times 2$</p> <p>Use all the models and images mentioned above. ---	--	--	---

Number – addition and subtraction

Number – multiplication and division

add numbers mentally, including:

- a four-digit number and ones
- a four-digit number and tens
- a four-digit number and hundreds
- a four-digit number and thousands

Counting on 3115 + 2 "Put 3115 in your head, 3116, 3117."	Adding near numbers and adjusting 7433 + 90 = 7433 + 100 - 10 = 7533 - 10 = 7523
Partition number and recombine 5127 + 2000 = 5000 + 100 + 20 + 7 + 2000 = 7000 + 100 + 20 + 7 = 7127	Count on by splitting units to make next multiple of ten/hundred 2360 + 500 = 2360 + 400 + 40 + 60 = 2400 + 400 + 60 = 2860

• three and two-digit numbers

Partition both numbers into hundreds, tens and ones and recombine 358 + 73 = 300 + 50 + 8 + 70 + 3 = 300 + 120 + 11 = 420 + 11 = 431	Partition second number only into hundreds, tens and ones and recombine 358 + 73 = 358 + 70 + 3 = 428 + 3 = 431
Partitioning with number lines 	Add the nearest multiple of 10 or 100, then adjust 458 + 79 = 458 + 80 - 1

subtract numbers mentally, including:

- a four-digit number and ones
- a four-digit number and tens
- a four-digit number and hundreds
- a four-digit number and thousands

Counting back: 5263 - 5 "Put 5263 in your head, 5262, 5261, 5260, 5259, 5258."	Use unprepared numbered lines to subtract, by counting back: 1516 - 400 = 1116 
Subtract mentally a 'near multiple of 10' to or from a two-digit number: 3678 - 90 = 3678 - 100 + 10	

• three and two-digit numbers

Use known number facts and place value to subtract (partition second number only) 437 - 12 = 437 - 10 - 2 = 427 - 2 = 425	Find a small difference by counting up 6003 - 5998 = 5 +2 +3 
	Subtract mentally a number near 10 to or from a two-digit number 305 - 19 = 305 - 20 + 1 +1 

recall multiplication facts for multiplication tables up to 12 x 12

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within tables.

use place value, known and derived facts to multiply mentally, including: multiplying by 0 and 1; multiplying together three numbers
practise and extend mental methods to three-digit numbers to derive facts, (for example 600 ÷ 3 = 200 can be derived from 2 x 3 = 6)

Use knowledge of multiplication facts and place value to derive related facts.

30 x 5 = 150	50 x 3 = 150	150 ÷ 5 = 30	150 ÷ 3 = 50
3 x 50 = 150	5 x 3 = 15	15 ÷ 3 = 5	150 ÷ 30 = 5
5 x 30 = 150	50 x 30 = 1500	30 x 50 = 1500	150 ÷ 50 = 3

Partition

$$18 \times 9 = (10 \times 9) + (8 \times 9)$$

$$= 90 + 72$$

$$= 162$$

recognise and use commutativity in mental calculations
write statements about the equality of expressions (for example, use the distributive law $39 \times 7 = 30 \times 7 + 9 \times 7$ and associative law $(2 \times 3) \times 4 = 2 \times (3 \times 4)$)

Use a variety of resources (including a calculator) to investigate order of

recall division facts for multiplication tables up to 12 x 12

Play games, chant, test etc to increase speed of recalling facts.
Make models and images to display facts.
Investigate patterns within tables.

use place value, known and derived facts to divide mentally, including: dividing by 1
practise and extend mental methods to three-digit numbers to derive facts, (for example 600 ÷ 3 = 200 can be derived from 2 x 3 = 6)

Use knowledge of multiplication facts and place value to derive related facts.

30 x 5 = 150	50 x 3 = 150	150 ÷ 5 = 30	150 ÷ 3 = 50
3 x 50 = 150	5 x 3 = 15	15 ÷ 3 = 5	150 ÷ 30 = 5
5 x 30 = 150	50 x 30 = 1500	30 x 50 = 1500	150 ÷ 50 = 3

Partitioning/Chunking

$$77 \div 5 = (50 \div 5) + (25 \div 5) + (\text{remainder } 2)$$

$$= 10 + 5 + (\text{remainder } 2)$$

$$= 15 \text{ remainder } 2$$

recognise and use factor pairs in mental calculations

Use a variety of resources (including a calculator) to investigate factor pairs.
Make models and images to display facts.

add numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate (see Appendix 1)

Column addition

$$\begin{array}{r} 2358 \\ + 373 \\ \hline 2731 \\ \hline \end{array}$$

To ensure conceptual understanding, it is essential that place value is reinforced by frequently.

Discussing the actual value of each digit, e.g. the 5 digit represents 5 hundreds.

Use base 10 (Diennes) or place value counters to support understanding of carrying and to ensure conceptual understanding of place value (see year 2 and 3 for how to use these manipulatives).

Including decimals

$$\begin{array}{r} 72.8 \\ + 54.6 \\ \hline 127.4 \\ \hline \end{array}$$

To ensure conceptual understanding, it is essential that place value is reinforced by frequently discussing the

subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate (see Appendix 1)

Revision of partitioned column method from Year 3. Moving on to numbers with 4 digits: (use Diennes to support when required.)

$$\begin{array}{r} 2754 - 1562 = 1192 \\ \hline 2000 + 700 + 50 + 4 \\ - 1000 + 500 + 60 + 2 \\ \hline 1000 + 100 + 90 + 2 \end{array}$$

Column Subtraction without decomposition

$$\begin{array}{r} 458 \\ - 232 \\ \hline 226 \end{array}$$

Column Subtraction with decomposition

Once pupils are confident in exchanging and have a clear understanding of place value, move towards the formal compact column method: (use Diennes to support when required.)

$$\begin{array}{r} 2754 \\ - 1562 \\ \hline 1192 \end{array}$$

multiplication. Make models and images to display facts.

multiply two-digit and three-digit numbers by a one-digit number using formal written layout (see Appendix 1)

Grid method

231×7 is approximately $200 \times 10 = 2000$

$$231 \times 7 = 1617$$

x	7	
200	1400	
30	210	+
1	7	
	1617	

move onto formal method of short multiplication when proficient

$$\begin{array}{r} 452 \\ \times 3 \\ \hline 1356 \\ \hline \end{array}$$

divide numbers up to 3 digit by a one-digit number using the formal written method of short division and begin to interpret remainders.

Short division with no remainders in the final answer, use place value counters/Diennes where support is required.

$$\begin{array}{r} 037 \\ 5 \overline{)1835} \\ \underline{5} \\ 18 \\ \underline{15} \\ 33 \\ \underline{30} \\ 35 \\ \underline{35} \\ 0 \end{array}$$

Remainders

Begin to interpret remainders by looking at word problems to give context and small numbers to start with.

actual value of each digit, e.g. the 2 digit represents 2 tens.

Use money to support understanding.

solve addition two-step problems in contexts, deciding which operations and methods to use and why

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

solve subtraction two-step problems in contexts, deciding which operations and methods to use and why

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects
solve two-step problems in contexts, choosing the appropriate operation, working with increasingly harder numbers

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

solve two-step problems in contexts, choosing the appropriate operation, working with increasingly harder numbers

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

estimate and use inverse operations to check answers to a calculation

Estimate answers before solving any calculation.
Once inverse operation has been learnt use as a method for checking.

estimate and use inverse operations to check answers to a calculation

Estimate answers before solving any calculation.
Once inverse operation has been learnt use as a method for checking.

estimate and use inverse operations to check answers to a calculation

Estimate answers before solving any calculation.
Once inverse operation has been learnt use as a method for checking.

--	---	--	---

Number – addition and subtraction

add numbers mentally with increasingly large numbers (e.g. $12\ 462 - 2300 = 10\ 162$)

Partition both numbers and recombine

$$\begin{aligned} 2358 + 773 &= 2000 + 300 + 50 + 8 + 700 + 70 + 3 \\ &= 2000 + 1000 + 120 + 11 \\ &= 3000 + 100 + 30 + 1 \\ &= 3131 \end{aligned}$$

Partitioning with number lines

Partition second number only into hundreds, tens and ones and recombine

$$\begin{aligned} 2358 + 773 &= 2358 + 700 + 70 + 3 \\ &= 3058 + 70 + 3 \\ &= 3128 + 3 \\ &= 3131 \end{aligned}$$

Add the nearest multiple of 10 or 100, then adjust

$$458 + 79 = 458 + 80 - 1$$

subtract numbers mentally with increasingly large numbers (e.g. $12\ 462 - 2300 = 10\ 162$)

Subtract the nearest multiple of 10 or 100, then adjust

$$\begin{aligned} 458 - 79 &= 458 - 80 + 1 \\ &= 378 + 1 \\ &= 379 \end{aligned}$$

Find a difference by counting up

Use known number facts and place value to subtract (partition second number only)

$$\begin{aligned} 12\ 462 - 2300 &= 12\ 462 - 2000 - 300 \\ &= 10\ 462 - 300 \\ &= 10\ 162 \end{aligned}$$

Number – multiplication and division

multiply numbers mentally drawing upon known facts

Partition

$$\begin{aligned} 47 \times 6 &= (40 \times 6) + (7 \times 6) \\ &= (240) + (42) \\ &= 282 \end{aligned}$$

Double and halve

$$25 \times 16 = 50 \times 8 = 100 \times 4 = 200 \times 2 = 400$$

divide numbers mentally drawing upon known facts

Partitioning

$$\begin{aligned} 72 \div 3 &= (60 \div 3) = (12 \div 3) \\ &= 20 + 4 \\ &= 24 \end{aligned}$$

multiply whole numbers and those involving decimals by 10, 100 and 1000

Place Value

divide whole numbers and those involving decimals by 10, 100 and 1000

Place Value

identify multiples, (and use them to construct equivalence statements, e.g. $4 \times 35 = 2 \times 2 \times 35$; $3 \times 270 = 3 \times 3 \times 9 \times 10 = 9^2 \times 10$)

Use a variety of resources (including a calculator) to investigate multiples. Make models and images to display facts.

Factor trees:

identify factors, including finding all factor pairs of a number, and common factors of two numbers (and use them to construct equivalence statements, e.g. $4 \times 35 = 2 \times 2 \times 35$; $3 \times 270 = 3 \times 3 \times 9 \times 10 = 9^2 \times 10$)

Use a variety of resources (including a calculator) to investigate factors. Make models and images to display facts.

recall prime numbers up to 19
establish whether a number up to 100 is prime

recall prime numbers up to 19
establish whether a number up to 100 is prime

Play games, chant, test etc to increase speed of recalling facts.
 Make models and images to display facts.
 Investigate patterns within primes.

Play games, chant, test etc to increase speed of recalling facts.
 Make models and images to display facts.
 Investigate patterns within primes.

recognise and use square numbers and cube numbers, and the notation for squared (²) and cubed (³)

Use a variety of resources (including a calculator) to investigate square and cubed numbers. Make models and images to display facts.
 Investigate the patterns within squared and cubed numbers.

add numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction – see Appendix 1)

Column addition

$$\begin{array}{r} 124.90 \\ + 117.25 \\ \hline 242.15 \\ 11 \end{array}$$

(add in a zero to keep the place value)

To ensure conceptual understanding, it is essential that place value is reinforced by frequently. Discuss the value of each digit.

Use base 10 (Diennes) to support understanding of exchanging and to ensure conceptual understanding of place value.

Where there is an 'empty' space in a decimal column, pupils should insert a zero to show the value. Children should be made aware that it is essential to align the columns carefully.

Pupils should be able to add more than 2 numbers using the compact column method.

$$\begin{array}{r} 3.25 \\ + 4.13 \\ \hline 0.76 \\ 8.14 \\ 11 \end{array}$$

subtract numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction – see Appendix 1)

Revision of formal compact column method extending to calculations involving numbers with more than 4 digits (use Diennes to support understanding of decomposition and place value).

2	8	9	2	8
-	2	1	2	8

When confident in using formal compact column method with integers and decimals involving money (always 2 decimal places), extend to subtraction with mixtures of integers and decimals. A clear understanding of place value is essential. Align the decimal point and use 'place holders', if needed.

$$\begin{array}{r} 263.0 \\ - 26.5 \\ \hline 236.5 \end{array}$$

Use Diennes or place value counters (add counters with 0.1) to support understanding of decomposition and place value.

multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers

Review formal method of short multiplication (for multiplying by one digit numbers) when proficient

$$\begin{array}{r} 452 \\ \times 3 \\ \hline 1356 \end{array}$$

$$\begin{array}{r} 1243 \\ \times 8 \\ \hline 9624 \end{array}$$

Start with grid method when multiplying by 2 digit numbers

72 x 38 is approximately 70 x 40 = 2800

x	70	2
30	2100	60
8	560	16

$$\begin{array}{r} 2160 \\ + 576 \\ \hline 2736 \\ 1 \end{array}$$

Move onto formal long multiplication

$$\begin{array}{r} 34 \\ \times 13 \\ \hline 102 \\ 340 \\ \hline 442 \end{array}$$

Then formal multiplication with more complex numbers:

$$\begin{array}{r} 1234 \\ \times 16 \\ \hline 7404 \\ 12340 \\ \hline 19744 \end{array}$$

divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context (as fractions, as decimals or by rounding (for example, 98 ÷ 4 = 98/4 = 24 r 2 = 24 ½ = 24.5 ≈ 25))

Bus shelter method (short division)

$$\begin{array}{r} 86r2 \\ 5 \overline{) 432} \\ \underline{20} \\ 23 \\ \underline{20} \\ 32 \\ \underline{30} \\ 2 \end{array}$$

Pupils should consider whether remainders should be left as a remainder, rounded to the nearest whole or converted into a decimal or fraction.

Introduce long division (dividing by single digits)

$256 \div 7$ lies between $210 \div 7 = 30$ and $280 \div 7 = 40$

$$\begin{array}{r} 256 \\ - 70 \quad (10 \text{ groups}) \text{ or } (10 \times 7) \\ \hline 186 \\ - 140 \quad (20 \text{ groups}) \text{ or } (20 \times 7) \\ \hline 46 \\ - 42 \quad (6 \text{ groups}) \text{ or } (6 \times 7) \\ \hline 4 \quad (36 \text{ groups}) \text{ or } (36) \end{array}$$

Answer: 36 remainder 4

solve addition multi-step problems in contexts, deciding which operations and methods to use and why

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

solve subtraction multi-step problems in contexts, deciding which operations and methods to use and why

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

Solve problems that use multiplication and division as inverses, for example, by multiplying and dividing by powers of 10 in scale drawings or by multiplying and dividing by powers of a 1000 in converting between units such as kilometres and metres

Use all the models and images mentioned above. Discuss which is most effective and why.

<p>use a variety of language to describe addition</p> <p>+ add, addition, more, plus, increase, sum, total, altogether, score, double, near double, how many more to make...? tens boundary, hundreds boundary, units boundary, tenths boundary, inverse</p> <p>= equals, sign, is the same as</p>	<p>use a variety of language to describe subtraction</p> <p>- subtract, subtraction, take (away), minus, decrease, leave, how many are left/left over? difference between, half, halve, how many more/fewer is... than...? how much more/less is...? tens boundary, hundreds boundary, units boundary, tenths boundary, inverse</p> <p>= equals, sign, is the same as</p>	<p>use a variety of language to describe multiplication</p> <p>know and use the vocabulary of prime numbers, prime factors and composite (nonprime) numbers</p> <p>lots of, groups of, times, multiply, multiplication, multiplied by, multiple of, product, once, twice, three times... ten times... times as (big, long, wide... and so on), repeated addition, array, row, column, double,, inverse, prime,</p> <p>equals, sign, is the same as</p>	<p>use a variety of language to describe division</p> <p>Array, row, column, halve, share, share equally one each, two each, three each...</p> <p>group in pairs, threes... tens, equal groups of, divide, division, divided by, divided into, remainder, factor, quotient, divisible by, inverse. Prime, factors</p> <p>equals, sign, is the same as</p>

Year 6

Number – addition and subtraction

perform mental calculations, including with mixed operations and large numbers (*and decimals*)

Partition both numbers into hundreds, tens, ones and decimal fractions and recombine

$$\begin{aligned} 35.8 + 7.3 &= 30 + 5 + 0.8 + 7 + 0.3 \\ &= 30 + 12 + 1.1 \\ &= 42 + 1.1 \\ &= 43.1 \end{aligned}$$

Partition second number only into hundreds, tens, ones and decimal fractions and recombine

$$\begin{aligned} 35.8 + 7.3 &= 35.8 + 7 + 0.3 \\ &= 42.8 + 0.3 \\ &= 43.1 \end{aligned}$$

Add the nearest whole number then adjust

$$\begin{aligned} 52 + 11.9 &= 52 + 12 - 0.1 \\ &= 64 - 0.1 \\ &= 63.9 \end{aligned}$$

perform mental calculations, including with mixed operations and large numbers (*and decimals*)

Use known number facts and place value to subtract

$$6.1 - 2.4 = 3.7$$

Subtract the nearest whole number then adjust

$$\begin{aligned} 52 - 11.9 &= 52 - 12 + 0.1 \\ &= 40 + 0.1 \\ &= 40.1 \end{aligned}$$

Number – multiplication and division

perform mental calculations, including with mixed operations and large numbers (*and decimals*)

Partitioning

$$\begin{aligned} 4.7 \times 6 &= (4 \times 6) + (0.7 \times 6) \\ &= (24) + (4.2) \\ &= 28.2 \end{aligned}$$

Double and halve

$$\begin{aligned} 4.25 \times 32 &= 8.5 \times 16 \\ &= 17 \times 8 \\ &= 34 \times 4 \\ &= 68 \times 2 \\ &= 136 \end{aligned}$$

perform mental calculations, including with mixed operations and large numbers (*and decimals*)

Partitioning

$$\begin{aligned} 7.2 \div 3 &= (6 \div 3) + (1.2 \div 3) \\ &= 2 + 0.4 \\ &= 2.4 \end{aligned}$$

identify common factors, common multiples and prime numbers

Use a variety of resources (including a calculator) to investigate common factors, common multiples and prime numbers. Make models and images to display facts. Investigate the patterns within the numbers.

identify common factors, common multiples and prime numbers

Use a variety of resources (including a calculator) to investigate common factors, common multiples and prime numbers. Make models and images to display facts. Investigate the patterns within the numbers.

practise addition for larger numbers, using the formal written methods of columnar addition (see Appendix 1)

Extend the use of compact column method to adding several numbers with mixed decimals.

$$\begin{array}{r} 23.361 \\ 9.08 \\ 59.77 \\ + 1.3 \\ \hline 93.511 \\ \underline{212} \end{array}$$

Children should be reminded of the importance of aligning the columns accurately.

Where there is an 'empty' space in a decimal column, pupils could insert a zero to show the value.

practise subtraction for larger numbers, using the formal written methods of columnar subtraction (see Appendix 1)

Column Subtraction with decomposition

$$\begin{array}{r} 641 \\ - 286 \\ \hline 468 \end{array} \quad \begin{array}{r} 8.36 \\ - 1.17 \\ \hline 7.19 \end{array} \quad \text{Including decimals}$$

Revision of formal compact column method extending to more complex integers and applying to problem solving using money and measures, including decimals with different numbers of decimal places. Align the decimal point when setting out calculations.

Use 'place holders' to aid understanding of the value in that column.

$$\begin{array}{r} 15.419 \text{ kg} \\ - 36.080 \text{ kg} \\ \hline 69.339 \text{ kg} \end{array}$$

multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of short and long multiplication (Appendix 1)

Short multiplication and Long multiplication as in Year 5, but apply to numbers with decimals.

$$\begin{array}{r} 3.19 \\ \times 8 \\ \hline 25.52 \\ \underline{17} \end{array}$$

Pupils may need reminding that single digits belong in the ones (units) column.

A sound understanding of place value and the formal method itself are required before progressing to decimal multiplication.

divide numbers up to 4 digits by a two-digit whole number using the formal written method of short and long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context (Appendix 1)

Short division

Short division

$98 \div 7$ becomes	$432 \div 5$ becomes	$496 \div 11$ becomes
$\begin{array}{r} 14 \\ 7 \overline{) 98} \\ \underline{7} \\ 18 \\ \underline{14} \\ 4 \end{array}$	$\begin{array}{r} 86 \text{ r}2 \\ 5 \overline{) 432} \\ \underline{40} \\ 32 \\ \underline{30} \\ 2 \end{array}$	$\begin{array}{r} 45 \text{ r}11 \\ 11 \overline{) 496} \\ \underline{44} \\ 56 \\ \underline{55} \\ 1 \end{array}$
Answer: 14	Answer: 86 remainder 2	Answer: 45 $\frac{11}{11}$

Long division (for dividing by 2 digits)

Long division

$432 \div 15$ becomes	$432 \div 15$ becomes	$432 \div 15$ becomes
$\begin{array}{r} 28 \text{ r}12 \\ 15 \overline{) 432} \\ \underline{30} \\ 132 \\ \underline{120} \\ 12 \end{array}$	$\begin{array}{r} 28 \\ 15 \overline{) 432} \\ \underline{30} \\ 132 \\ \underline{120} \\ 12 \end{array} \quad 15 \times 20$	$\begin{array}{r} 28.8 \\ 15 \overline{) 432.0} \\ \underline{30} \\ 132 \\ \underline{120} \\ 120 \\ \underline{120} \\ 0 \end{array} \quad 15 \times 8$
Answer: 28 remainder 12	Answer: 28 $\frac{4}{5}$	Answer: 28.8

Remainders

Quotients expressed as fractions or decimal fractions

$$61 \div 4 = 15 \frac{1}{4} \text{ or } 15.25$$

solve addition multi-step problems in contexts, deciding which operations and methods to use and why

Use all the models and images mentioned above. Discuss which is most effective and why.

solve subtraction multi-step problems in contexts, deciding which operations and methods to use and why

Use all the models and images mentioned above. Discuss which is most effective and why.

solve problems involving multiplication

Use all the models and images mentioned above. Discuss which is most effective and why.

solve problems involving division

Use all the models and images mentioned above. Discuss which is most effective and why.

Singapore Bar Method

Singapore Bar Method

Singapore Bar Method

Singapore Bar Method

round answers to a specified degree of accuracy, e.g. to the nearest 10, 20, 50 etc., but not to a specified number of significant figures

Use knowledge of rounding (see fraction Policy) to create estimates.

use their knowledge of the order of operations to carry out calculations involving the four operations
explore the order of operations using brackets; for example, $2 + 1 \times 3 = 5$ and $(2 + 1) \times 3 = 9$

Review and investigate the effect of carrying out operations in different orders. Explore the effect. Introduce and use BIDMAS to solve calculations.

use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy

round answers to a specified degree of accuracy, e.g. to the nearest 10, 20, 50 etc., but not to a specified number of significant figures
