

Four in a Row

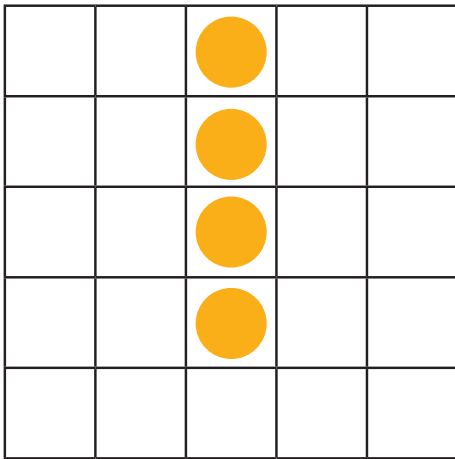

This is a game for two players.

You Will Need:

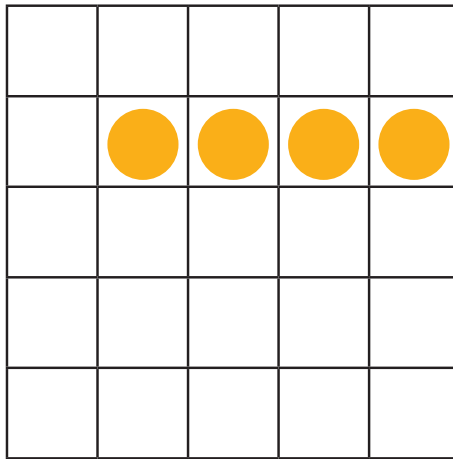

- Counters
- Four in a Row Game Board

How to Play:

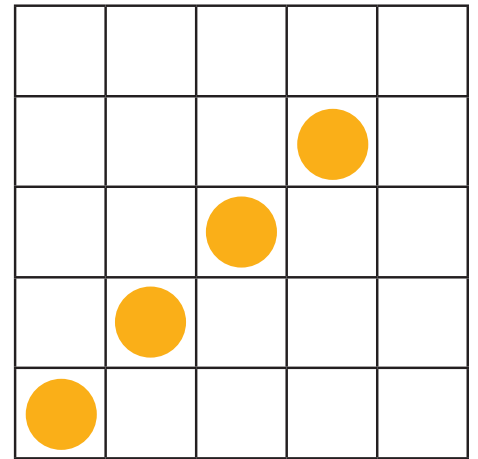

1. Player 1 goes first and chooses a square. The player sounds out and reads the word. They can then put their counter down on that square.
2. Player 2 chooses another square, sounds out and reads the word, then puts their counter down on the square.
3. The aim of the game is to get four of your counters in a row vertically, horizontally or diagonally. The players must try to stop each other from achieving four in a row by blocking them, while also trying to get four in a row themselves.

vertical

horizontal

diagonal
