

## STATEMENT CARDS

In zoos scientists can easily study animals	A zoo is a good place to visit on holiday
Zoos can breed endangered animals and return them to the wild	TV programmes teach people about wild animals in their natural habitat
In zoos people can learn about animals from all over the world	Many countries have zoos
Seeing animals in zoos can make people more interested in saving them in the wild	It is better for the planet to spend money on saving habitats and protecting animals living in the wild
Animals in zoos have food and water when they need them	Animals in zoos do not have as much space as in the wild
Animals in zoos are looked after by vets	Animals in zoos can become bored and lonely
Wild animals can be killed by hunters and predators	It is difficult for zoos to provide a suitable habitat or climate
Feeding and caring for zoo animals is expensive	Animals born in zoos may not be able to survive in the wild
The baby animals in zoos are very cute	Most zoos do not release animals into the wild
