The Engineering
& Design Institute

The Engineering and Design Institute
Engineering Taster (Online)
30th June – 20th July 2025

Open to Sixth Form Students

Thinking Ahead is our free online taster programme designed to introduce your students to the innovative world of engineering.

They will put their creativity to the test and learn how to create a solution centred around sustainability and user needs and then pitch their idea!

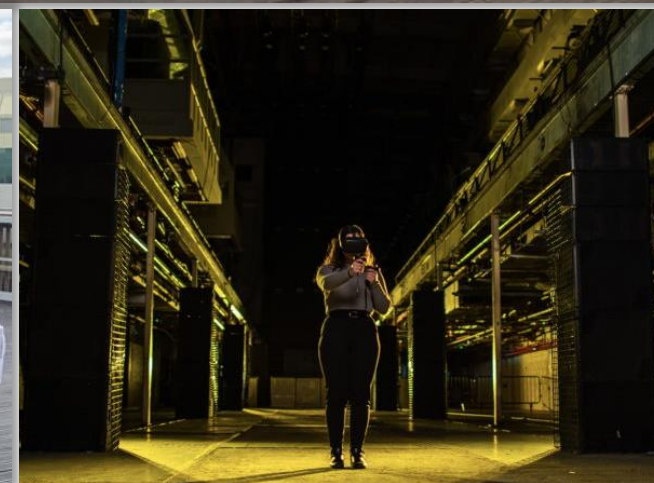

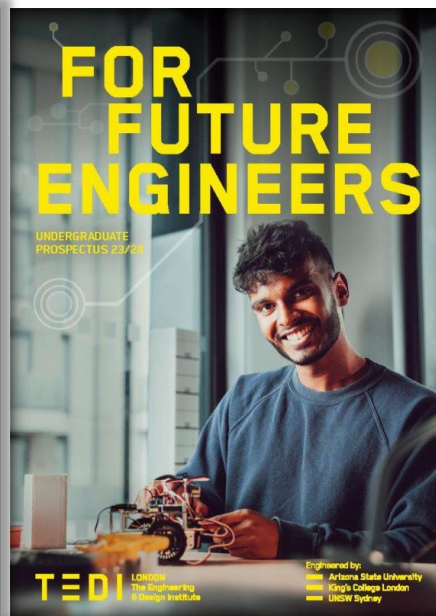

The programme is fully online, allowing students to participate outside of their regular studies, and is structured over three weeks.

CREATE LIKE AN ENGINEER 💡

During the 3 weeks, from 30 June to 20 July 2025, students will:

- Learn through our online learning platform, Canvas.
- Take part in professional workshop sessions.
- Take on a sustainability-themed design challenge and submit their project.
- Receive a participation certificate - a great addition to their CV or university application!

MEDICINE & DENTISTRY

Virtual Work Experience

OPEN TO
YR 10 to 13

Medic Mentor Virtual Work Experience

Open to Years 10 – 13 students

I am pleased to announce that a new rotation of virtual work experience is now available on Emergency Medicine or Paediatric & Dental Surgery.

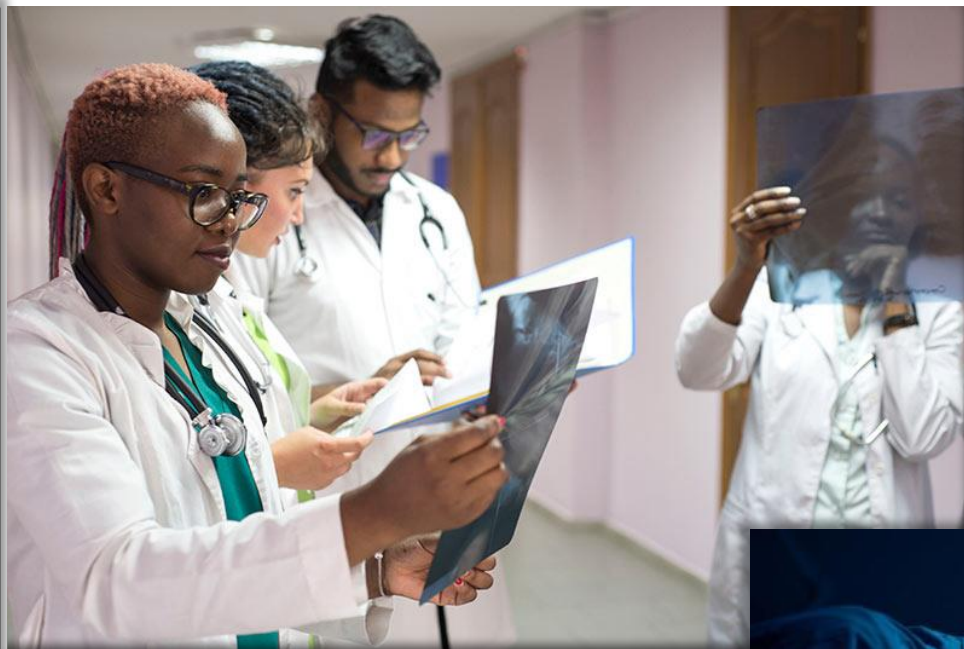

Virtual work experience is now recognised by the Medical Schools and Dental Schools Council as a valuable alternative to in-person shadowing. This is supported by the Health Education England Discovery report, which highlights the positive impact of virtual placements.

Not only is this a reliable alternative to in-person shadowing, but it also plays a significant role in preparing students for their in-person work placements with structured teaching and opportunities to speak directly with healthcare professionals.

UNIT LONDON

**UNIT Gallery
Art
Gallery Event**

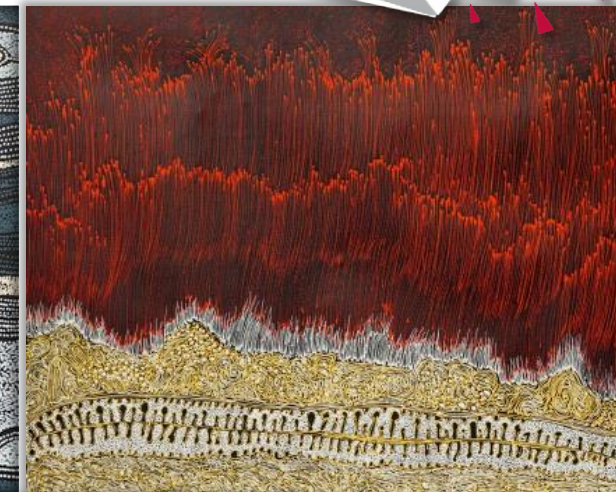

Open All Students

Unit is proud to present Tjukurrpa: The Dreaming, a landmark exhibition showcasing nine leading Aboriginal and Torres Strait Islander artists, opening in London on Wednesday 9 July.

The exhibition spotlights the extraordinary work of Indigenous Australian artists, most notably Emily Kam Kngwarray (c.1910-1996), the celebrated Anmatyerr painter now recognised globally as one of the 20th century's most influential artists.

In anticipation of Kngwarray's upcoming retrospective at Tate Modern also opening in July, Tjukurrpa: The Dreaming arrives in London as a unique opportunity to take a broader look at the sublime power of one of the world's oldest continuous painting traditions, featuring work from Kngwarray herself, as well as her contemporaries and others later impacted by her work.

Foundation Apprenticeships launch

Open to Sixth Form Students

Harrow, Richmond & Uxbridge Colleges (HRUC) are thrilled to announce the launch of Foundation Apprenticeships – a brand-new pathway designed to open doors for young people aged 16–21 and others who need support accessing skilled careers.

Key features of a Foundation Apprenticeship

Develop new or secondary skill set apprentices can do a foundation apprenticeship at the same or lower level than a qualification they already hold, if it develops new knowledge, skills and behaviours

Shorter duration: foundation apprenticeships are typically 8 months long

Non-mandatory assessment: Maths and English remain required, but the assessment is not mandatory before completion.

Scholarship Opportunities

Open to Sixth Form Students

Thinking about a medical career? Take a look at this. Optometry is more than just glasses. It's detecting and diagnosing abnormalities and diseases using the latest technology. It's identifying problems with health – think high blood pressure and diabetes. It's about changing and saving lives. Interested? If you are, you should see what we have on offer through our Bright Stars university scholarship. Our exclusive university scholarship offers future Optometry students the chance to receive £10,000 (or €10,000 in the Republic of Ireland) over four years, towards the cost of their university experience. It's aimed at STEM students, with only 40 spots across the UK.

It includes paid part-time work at one of our practices, with protected clinical time and mentorship from store colleagues. And that's not all – you'll join in a cohort, so you'll have the support of your peers, plus there'll be social events and community activities to get involved with, as well as the chance to be selected for placements abroad and to secure a place on our business owner development programme. This is a one-of-a-kind opportunity to begin a promising career as an Optometrist.

Green Skills Map Skills Resources

Open to All Students

Green Skills Map is an open-source framework initiated by HolonIQ for the purpose of cataloging, evaluating, and contextualizing the different components of the rapidly expanding field of green jobs. This comprehensive taxonomy will serve as a resource for understanding the full spectrum and complexity of green skills required across various sectors, thereby enabling a cohesive approach toward achieving net zero and decarbonizing the global economy.

This established taxonomy serves as a foundational tool for aligning educational efforts, workforce development, and policy initiatives with the goals of a sustainable and resilient economy.

CLICK HERE

By **2030**, there
could be **694,000**
green jobs in the
low-carbon and
renewable energy
sector across
England

MID GREEN OCCUPATION

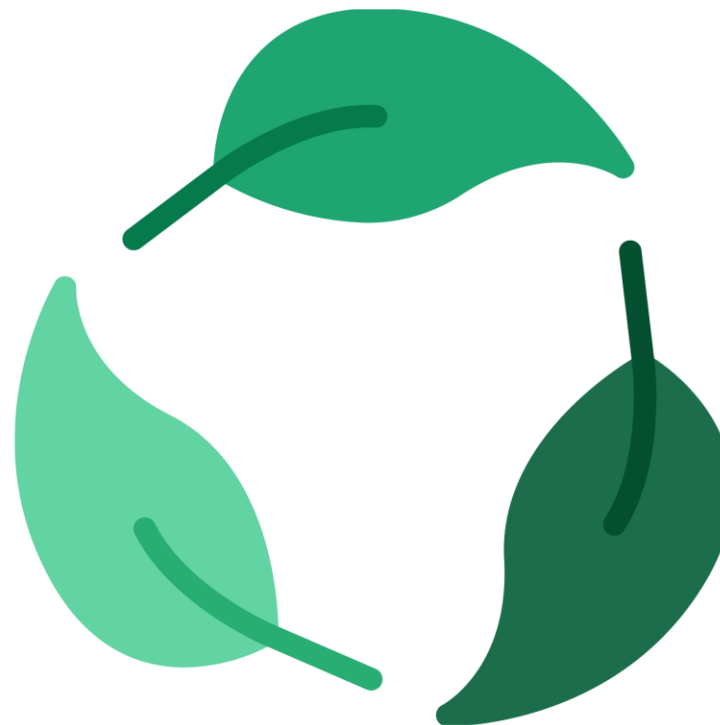

A mid green occupation is where the principles of an occupation remain the same, but there is likely to be the need for significant new knowledge, skills and behaviours to be embedded to enable the use of new technologies and approaches.

LIGHT GREEN OCCUPATION

A light green occupation is one where the underlying intrinsic nature of the occupation is unchanged by sustainable/green requirements, but there may be additional duties that are done differently or in a consciously sustainable way.

DARK GREEN OCCUPATION

A dark green occupation would be one such as wind turbine engineer, which is intrinsically embedded within the green occupational map and delivering sustainable outcomes is inherent in the occupation. The impact of the occupation on net carbon zero goes beyond the way the individual carries out their duties.

TEDI London
AI and Data Tech

Open to Sixth Form Students

We're excited to share that applications are now open for TEDI-London's brand-new degree: BEng (Hons) Engineering with Artificial Intelligence, launching this September.

This innovative programme is designed for students interested in the intersection of engineering, computing and data. It blends core engineering principles - such as systems thinking, design, and sustainability - with the smart application of AI tools like machine learning, data analytics, and automation.

Unlike traditional courses, TEDI-London delivers a project-based, hands-on curriculum from day one. Students collaborate with industry partners to tackle real-world challenges, gaining practical experience and developing in-demand skills like digital fluency, problem-solving and interdisciplinary thinking.
