

# Designing an Efficient User Interface

## Task 1

(a) Keyboard shortcuts are used by most programs to make it quicker to perform certain tasks. The table below identifies a number of common keyboard shortcuts. Identify what each of these do.

Function	
CTRL + X	
CTRL + V	
CTRL + S	
CTRL + A	

(b) Informative feedback can help improve the speed of the interface. Explain why this is below.

---

---

## Task 2

The image below shows a user interface for a mobile app. Annotate these images to identify the features used to create an efficient user interface.
