

Density H

1. The mass of 5 m^3 of copper is 44 800 kg. Calculate the density of copper and give the unit. (3)

.....

.....

.....

- 2) The diagram shows a solid cuboid which has a mass of 240g. The cuboid is made of wood. Calculate the density of the wood and give the unit. (4)

.....

.....

.....

.....

.....

- 3) Zinc has a density of 7130 kg/m^3 . Calculate the mass of 5 m^3 of Zinc and give the unit. (3)
