

Distance time graph homework

Time (s)	Distance (m)
0	0
2	10
4	19
6	28
8	37
10	37
12	37
14	37
16	60
18	80
20	100

1) Plot a distance time graph using the data in the table

2) Describe the journey in as much detail as possible using words like steady speed, stationary etc

3) Making sure that you show your working out on your graph calculate the speed between the following times

- a) 0-2 seconds
- b) 4-8 seconds
- c) 14 – 20 seconds
