

1. Fatima is the Chief Executive Officer (CEO) of her own social enterprise company called "YouthTalk". YouthTalk provides support for young people and their families who have disabilities. The support can be: advice on their website, online chat, talks to groups of young people, hospital visits and group meetings. Fatima herself has a disability meaning that she has difficulty with moving her fingers.
 - (a) Give **two** accessibility technologies Fatima can use to support herself in her day to day work.
 - (b) Fatima has employed a partially sighted person to support in the day to day office tasks. Discuss the accessibility features that can be used within operating systems for this employee to use.
 - (c) Explain how **two** modern day technologies can be used by Fatima so that she can complete work whilst she is away from her office.
 - (d) Fatima is working with a company that makes apps. They wish to design an interface that is as inclusive and accessible as possible to all users. Discuss how the interface can be made accessible.
