

Yr7/8 Colour Reading homework.

Colour theory is both the science and art of using **colour**. It explains how humans perceive **colour**; and the visual effects of how **colours** mix, match or contrast with each other.

In **colour theory**, **colours** are organised on a **colour wheel** and grouped into 3 categories: primary **colours**, secondary **colours** and tertiary **colours**.

Other **colour** groups include warm and cold **colours** and complimentary **colours**.

Perceive – This means how you see something, **synonyms include; consider, view or judge.**

Contrast – This means something that is **different** or **stands out**.

Organised – This means to **plan things carefully and keep things neat**.
