

User Interface Assessment

1. Identify 4 different types of user interface. (4)
2. Describe how the user interacts with each type of user interface. (3)
3. Explain why the following users' needs must be considered when designing a user interface for example: accessibility, skills and demographics. (4)
4. Explain why different design principles are used when designing effective user interfaces. (4)

Take it further

1. Consider the possible ethical issues that each of the chosen user interfaces may create for groups of people with different demographics. (5)
2. For each issue explain why it is an ethical issue and suggest ways that the user interface can be adapted to resolve these issues (5)
