

GCSE Computer Science

Topic 2.1 Algorithms

To find middle item:
 $(\text{amount of data items} + 1) / 2$

MERGE SORT example (ascending)

13	3	50	7
----	---	----	---

COMPUTATIONAL THINKING:

tackling a problem through abstraction, decomposition and algorithmic thinking.

ABSTRACTION: picking out important bits of information

DECOMPOSITION: breaking down a problem into smaller parts.

ALGORITHMIC THINKING: coming up with an algorithm to solve a problem.

ALGORITHM: a step by step set of instructions to solve a problem

BINARY SEARCH example:

1	3	5	7	9
---	---	---	---	---

Find 7:

INSERTION SORT example (ascending)

13	3	50	7
----	---	----	---

LINEAR SEARCH example

1	3	5	7	9
---	---	---	---	---

Find 7:

BUBBLE SORT example (ascending)

13	3	50	7
----	---	----	---

FLOWCHART: a visual way of representing algorithms.

Fake

Pseudocode

A set of instructions in the style of programming language, written in plain English.

INPUT , OUPUT, IF, THEN, ELSE

What I need to know:

- Define computational thinking.
- Define abstraction.
- Define decomposition.
- Define algorithmic thinking.
- Define algorithm.
- Name the two most common ways of displaying algorithms.
- Define flowchart.
- Define pseudocode.
- Outline the steps of a binary search.
- Write an ordered list of numbers or words and perform a binary search to find an item.
- Outline the steps of a linear search.
- Write a list of numbers or words and perform a binary search to find an item.
- Outline the steps of a bubble sort.
- Perform a bubble sort on a list of unordered numbers / words to put them into ascending/descending order.
- Outline the steps of a insertion sort.
- Perform a insertion sort on a list of unordered numbers / words to put them into ascending/descending order.
- Outline the steps of a merge sort.
- Perform a merge sort on a list of unordered numbers / words to put them into ascending/descending order.
- Draw and label the shapes used in flowcharts.
- List the keywords used in pseudocode.

Warm-Up

Cross out the commands that don't go with the flow diagram symbol.

Bernard has written the algorithm on the right using pseudocode.

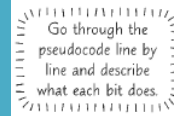

```
VAR height, width, area as INT
height = INPUT("Enter the height.")
width = INPUT("Enter the width.")
area = height * width
print(area)
```

a) Define what is meant by an 'algorithm'.

.....

..... [1]

b) Describe what Bernard's algorithm does.

.....

..... [3]

Nicola has a list of numbers: 2, 3, 7, 5, 13, 11.

a) She says, "I can't use a binary search to find 13." Why is this the case?

..... [1]

b) Show the steps of a linear search to find 13 in the list above.

..... [2]

[Total 3 marks]

Sonia has a sorted list of ice cream flavours that she sells in her shop.

a) Show the stages of a binary search to find the word 'butterscotch' in the list below.

butterscotch	chocolate	mint	strawberry	vanilla
--------------	-----------	------	------------	---------
