

MCAS - My Child At School App

At Unity Academy, our primary channel of communication between school and home is the My Child At School (MCAS) app.

The MCAS app is a secure and easy way for parents to stay connected with their child's school life. It helps you keep track of progress and stay up to date with school communication in one convenient place.

Through the app, you can:

- View your child's attendance, timetable, and achievements
- Check school reports and key information
- Receive important messages and updates from school
- Make online payments for meals, trips, or other activities

There are two ways to access the MCAS app:

1. Open a web browser and visit www.mychildatschool.com
2. Download the MyChildAtSchool mobile app (available on the Apple App Store for iPhone users and Google Play Store for Android users)

You will need the following information to create an account and sign in:

- School Postcode: FY2 0TS
- School ID: 14676

Scan the QR code below for further guidance on accessing the MCAS app and creating/signing in to your account.
