

## Year 9 Geography - Remote Learning Instructions

Geography Google Classroom, Class Code: **n3keahy**

Staff email: [geography@unity.fcat.org.uk](mailto:geography@unity.fcat.org.uk)

This work should be completed from Monday 18th May. Each lesson is estimated to take 40 minutes to complete. For each lesson, students should read through the information and then complete the tasks or questions in the 'Activities' box. Work can be shared with the geography teachers by completing a Weekly Learning Review via the Google Classroom. If you are struggling with a section - don't worry - just leave it for another time. Make sure you use your revision guides, knowledge organisers and books that you've taken home to help with the tasks.

Week Beginning Monday 18th May		
Lesson 1	Natural and tectonic hazards	Page 1
Lesson 2	Tectonic movement	Page 2
Week beginning Monday 1st June		
Lesson 1	Tectonic distribution and plates	Page 3
