

Upton Junior School

Growing Together, Learning Together, Achieving Together

14th February 2025

Newsletter

Dear Parents

HAPPY VALENTINES DAY!

As you will have been already informed, Mr Churchill has been seconded to the position of Executive Head of Upton Junior and Upton Infant Schools starting in the summer term. To facilitate bringing the two schools together, the Trust have given both schools an additional training day. School will be closed on Tuesday 22nd April for this, so the schools will reopen after Easter on Wednesday 23rd April.

For those who were asking what I am doing, I have a position as Assistant head at a secondary school in Guernsey. I am moving to live with my fiancée as we're getting married in July.

World Book Day

Our World Book Day is on Monday 3rd March. Mr Long has already sent out information regarding this and we are looking forward to having a thrilling day. I know you'll have started on your potato characters already.

PSFA Non-Uniform Day

We previously communicated that the 3rd March would be non-uniform day for Easter eggs, but with World Book Day taking place, this will now be Monday 10th March instead. The eggs are used as prizes for the Bunny Bingo event later in the week.

Lost Property

We still have lots of lost property. We are now removing the lost clothing from the large green bin and giving it to the charity box. The clothing in this bin was collected prior to the summer holidays. The collection we have since September will now be moved to the green bin instead.

Mental Health Non uniform day

We raised £243.10 for the charity Little Lives, which will go towards supporting our children with counselling. Many thanks for your support.

Have a super half term and I look forward to seeing you all again next half term. School reopens to children on Tuesday 25th February.

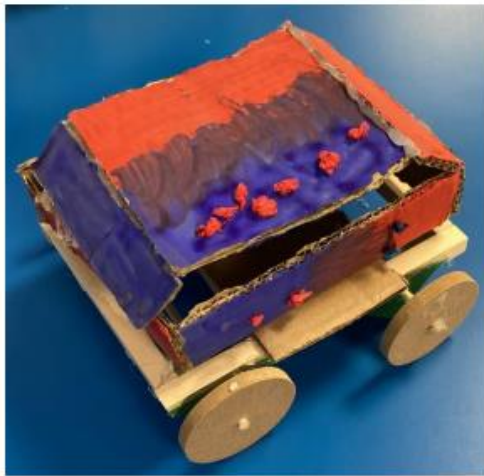

Many thanks,

Tony

Year 6 DT - February 2025

In Year 6 this half term, our DT topic has been focused on mechanical systems using gears and pulleys. The children have designed and made their own moving vehicles. They then had the opportunity to race their cars using battery powered circuits!
