

## To be a Computer Scientist, I...

Use a variety of software to accomplish different outcomes.	To create and debug computer programs.	To use computer systems for communication and collaboration.	To recognise a range of E-Threats and ways to minimise and avoid them.	To recognise the positives and negatives of using ICT.	To be discerning what evaluating sources and digital content.
---	--	--	--	--	---

I can create steps by step programs and instructions to perform tasks and overcome problems.

I persevere when making content to solve problems and overcome errors.

I can use what I have learnt when completing a different task.

I can use technology to store, manage and answer questions with data and information.

I can combine software to create, change and share content.

I can explain what I am seeing and doing using correct terminology.

To think about the content that I am seeing and if it is safe and

I can solve problems using a variety of different solutions.
