Compared to my plan, I think my mask is much better and stands out with its bright colours.

It has a cut-out star for an eye, and this is my favorite and best part about my mask, which really remembers celebration, and no other. Sadly, I did have to change my mask to my plan, putting black stars only over the pink, because it stood out more, but if I were to do it again I would paint my stars better.

A great Mask Togo, well done.

I like that my mask has a cute flower crown. Also, the rainbow parts colours all represent something special, but all of them together represent something to. If I were to make it again, I would make two colours only, it would be a death or a war mask. I think my mask is as much as a celebration mask as I thought of. I think the best thing about my mask was the face because every time I see it, it always makes me happy. ✓

Super-wake Ellie - sounds like your mask is very fit for purpose if it always makes you happy, well done!
