

How can you protect yourself
from online identity theft?

What types of information do you think are okay to share publicly online, on a profile that others will see, for instance?

What are some examples of websites where you must register in order to participate?

If you were to sign up to a website, what information would they require from you?

www.neopets.com

SAFE – Personal information

- Your favourite food
- Your favourite colour
- Your first name

- Can you think of anymore?

UNSAFE – Private Information

- Parents credit card information
 - Home address
 - Your date of birth
-
- Can you think of anymore?

Why would someone want to steal someone else's identity on the Internet?

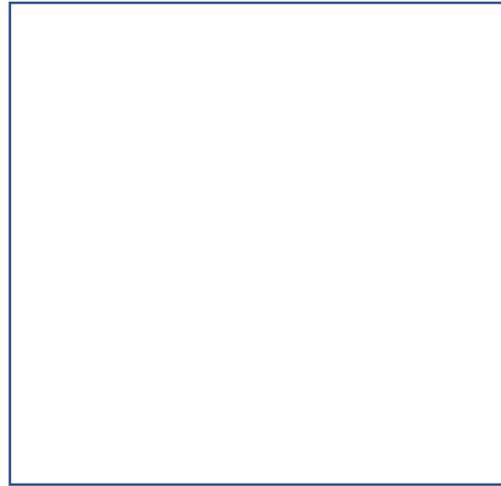

Directions

Decide if each piece of information below is an example of personal information or private information. Then check the box to show your answer.

Information	Personal	Private
