

## Guide for using Learning Music by Ableton

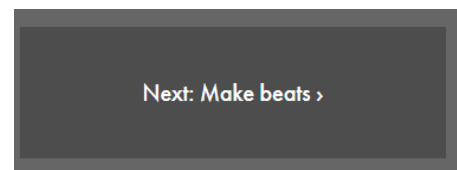

<https://learningmusic.ableton.com/>

When you first open the website it will look something like this:

Firstly, you will find a box that looks like this. Take some time to experiment with the different compositions you can make by clicking on different arrows.

When you have spent some time experimenting, click on this button to get started with the lessons.

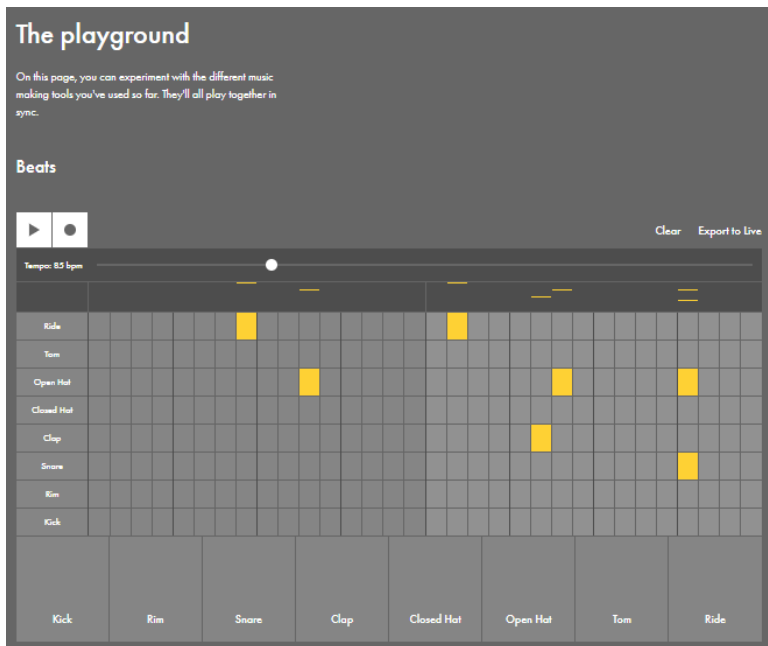

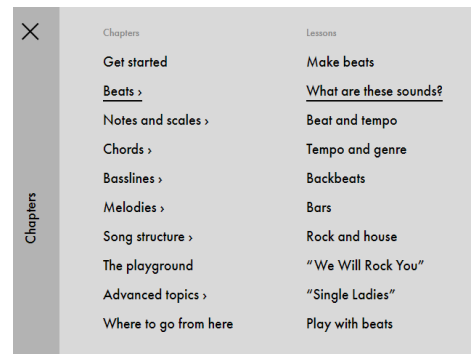

1/10: Beats

Follow the instructions for each lesson of the chapter. And click the "Next:" button at the bottom when you have finished.

If you are returning to the program on a different day, or if you already feel confident with a chapter and would like to move on to the next, click the icon with five white lines. This will open up all of the different options of chapters and lessons for you to choose from.

In the final section, The Playground, you have an opportunity to combine all of the different functions you have been learning to use: beats, basslines, chords and melodies.

Experiment in this section to create different pieces of layered music.
